MINUTE ORDER

Page 1 of 2

ALL Districts

On February 17, 2009, President Obama signed into law the American Recovery and Reinvestment Act (ARRA). The ARRA created an economic stimulus package that provides \$64.1 billion nationwide for infrastructure projects, including \$27.5 billion for highway and bridge construction, and \$1.5 billion for surface transportation grants to be distributed based on a competitive selection by the Secretary of Transportation. The ARRA also includes \$8.4 billion for transit projects, \$9.3 billion for rail projects, and \$1.3 billion for aviation projects.

Texas' share of the funding for highway and bridge construction is expected to be approximately \$2.25 billion, based on the existing apportionment formula. Of that amount, 67 percent will be obligated to projects selected at the discretion of the Texas Transportation Commission (commission) and 30 percent will be sub-allocated through the Surface Transportation Program to metropolitan planning organizations (MPOs) and rural areas. The remaining three percent of the funds are set aside for enhancement projects.

Texas' share of transit funds is estimated at \$372 million. The commission has been designated by the governor as the administering agency for the Federal Transit Administration program under 49 USC §5311, and has the authority to award approximately \$50 million in nonurbanized (rural) funds. Transportation Code, Chapter 455, assigns a broad spectrum of public transportation roles and missions to the Texas Department of Transportation (department), and Chapter 456 authorizes the commission to administer funds appropriated for public transportation. Federal program regulations require the department to ensure that these grant funds are distributed fairly and equitably within the state.

Texas' share of funding for aviation projects is yet to be determined and the Federal Aviation Administration (FAA) will distribute these funds as discretionary grants. Funds are available for airport development projects as provided by 49 USC Chapter 471. Transportation Code, Chapter 21, authorizes the department to provide a statewide airport system to serve the state's air transportation needs.

In anticipation of the enactment of the ARRA, the department collaborated with the Texas Division of the Federal Highway Administration (FHWA), MPOs, tolling authorities and transit providers to develop a unified approach to identifying and prioritizing projects that potentially qualify for funding. Projects have been identified that are ready to proceed to contract within the time requirements stipulated in the ARRA, meaning that all environmental requirements, design work, and right of way acquisition are sufficiently complete now to allow projects to proceed to construction or a development agreement to be executed.

Time is of the essence with regard to the selection of projects. The ARRA requires that 50 percent of the discretionary funds allocated to the state for highway and bridge projects must be obligated within 120 days of receiving the apportionment from FHWA or the funds will be redistributed to other states. The ARRA also requires that 50 percent of the public transit funds be obligated within 180 days following apportionment, and that the FAA shall award grants totaling not less than 50 percent within 120 days of the enactment. States must have 100 percent of the funds obligated with one year or the remaining funds will be redistributed.

MINUTE ORDER

Page 2 of 2

ALL Districts

The approximately \$500 million in preventative maintenance and rehabilitation projects set forth in Exhibit A were identified by the department's district engineers. The funding level for each district was based on population, lane miles, vehicle traffic, and pavement conditions. Once the funding level was allocated, the district engineers identified projects based on bridge and pavement conditions, as well as geometric needs.

The approximately \$49 million in aviation projects set forth in Exhibit B were selected for submission to the FAA for approval based on the priority list developed for the Airport Improvement Program annual funding program for general aviation. Seven of these projects have received approval by the commission under previous minute orders, with funding to be paid from the federal Aviation Trust Fund and local matches. Three of the projects are new projects to be approved by the commission.

The public transit projects set forth in Exhibit C represent an award of approximately \$32 million in §5311 nonurbanized (rural) funds to rural program operators for capital funding for fleet, facilities, and information technology equipment. These awards were calculated in accordance with the formula stated in 43 TAC §31.36(g). The balance of the §5311 funds will be awarded within the timeframe specified in the ARRA.

All projects are subject to federal and state laws, including the provisions of the ARRA. No matching funds are required.

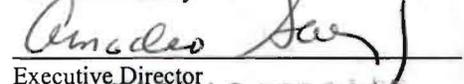

IT IS THEREFORE ORDERED by the commission that the transportation projects set forth in Exhibits A, B, and C are hereby approved for funding under the provisions of the ARRA.

IT IS FURTHER ORDERED that the executive director or the director's designee is authorized to proceed with project development and contract awards for the projects described in Exhibit A, transit grant agreements for the activities described in Exhibit C, presenting a recommendation to the FAA for consideration of funding for the projects described in Exhibit B, and to enter into any necessary agreements associated with these projects and activities.
