ALL Districts

On February 17, 2009, President Obama signed into law the American Recovery and Reinvestment Act (ARRA). The ARRA created an economic stimulus package that provides \$64.1 billion nationwide for infrastructure projects, including \$27.5 billion for highway and bridge construction, and \$1.5 billion for surface transportation grants to be administered by the Secretary of Transportation.

Texas' share of the funding for highway and bridge construction is expected to be approximately \$2.25 billion, based on the existing apportionment formula.

In anticipation of the enactment of the ARRA, the Texas Department of Transportation (department) collaborated with the Texas Division of the Federal Highway Administration (FHWA), MPOs, tolling authorities and transit providers to develop a unified approach to identifying and prioritizing projects that potentially qualify for funding. Department staff and local officials agreed upon a list of criteria to be used for evaluating projects. FHWA also issued a guidance document on funding, project selection, eligible activities, and other specific requirements to assist states in implementing the ARRA. The priority and preference selection criteria described in the ARRA and the FHWA guidelines were subsequently used in the evaluation process to develop the lists of projects recommended for funding under the ARRA.

Time is a critical element with regard to the selection and prosecution of projects. States must have 100 percent of the funds obligated within one year of receiving the apportionment from FHWA or the remaining funds will be redistributed to other states. The department received the Notice of Apportionment from FHWA on March 2, 2009. States initially submitted data on projects to be funded completely or partially with ARRA funds to FHWA on March 17, 2009. States must continue to update the data on projects to be funded with ARRA funds in a timely manner.

In Minute Order 111734, dated March 5, 2009, the Texas Transportation Commission (commission) approved the funding, under the provisions of the ARRA, of approximately \$500 million in preventive maintenance and rehabilitation projects. In Minute Orders 111777 and 111808, dated April 30, 2009 and May 28, 2009 respectively, the commission made revisions to the previously approved list of preventive maintenance and rehabilitation projects.

The department has continued to monitor the progress of these projects to ensure that they comply with the criteria identified in the minute orders, the ARRA, and the project selection requirements established by FHWA. Due to current national economic conditions and the accompanying effects on construction contracting and material supplies, the preventive maintenance and rehabilitation projects that have gone to letting in April and May 2009 have experienced a significant under run of the originally obligated ARRA funds. This under run allows additional preventive maintenance and rehabilitation projects to be brought forward for ARRA funding.

TEXAS TRANSPORTATION COMMISSION

VARIOUS Counties

MINUTE ORDER

Page 2 of 2

ALL Districts

The department has developed a proposed list of additional preventive maintenance and rehabilitation projects, which is set forth in Exhibit A. No previously approved preventive maintenance and rehabilitation projects are affected by the selection of these additional projects.

All projects are subject to federal and state laws, including the provisions of the ARRA. No matching funds are required for preventive maintenance and rehabilitation projects.

IT IS THEREFORE ORDERED by the commission that the preventive maintenance and rehabilitation projects set forth in Exhibit A are hereby approved for funding under the provisions of the ARRA.

IT IS FURTHER ORDERED that the executive director or the director's designee is authorized to proceed with project development and contract awards for the projects described in Exhibit A and to enter into any necessary agreements associated with these projects and activities.

IT IS FURTHER ORDERED that the department shall track the progress of the projects set forth in Exhibit A separately from other ongoing projects and place information regarding the status of these projects on the department's web site.
