

PROPOSITION 12 IMPLEMENTATION REPORT

DESCRIPTION:

This is a briefing on development progress of Prop. 12-funded projects with a focus on the My35 – One DOT Plan

ISSUES:

- Current project development status
- Letting status by project type
- Bid summary
- One DOT Plan for I-35

REFERENCES:

Voters approved Prop. 12 in November 2007 authorizing \$5 billion in General Obligation bonds for transportation improvements. HB 1 authorized \$2 billion in general obligation bonds and the commission selected projects for Prop. 12 funding in November 2009. LBB/BRB approved the bond request in June 2010. Bond issuance is in September 2010.

DESIRED RESULTS:

- An understanding from the commission that each Prop. 12-funded project is being developed and managed according to identified schedule and budget.
- Each Prop. 12 project is resourced assigned and managed to be within the project development schedule.
- Review of bidding status and results
- A One DOT plan is implemented to successfully accomplish I-35 projects efficiently and effectively.

FURTHER ACTIONS

- Regular briefings will be provided to the commission on the progress of developing and letting Prop. 12-funded projects.
- An I-35 Communication Plan developed for the public and stakeholders in Texas.
- A mobility coordination contract is being secured with TTI to insure efficient traffic flow throughout corridor during construction.

Greg A. Malatek, P.E.

September 29, 2010

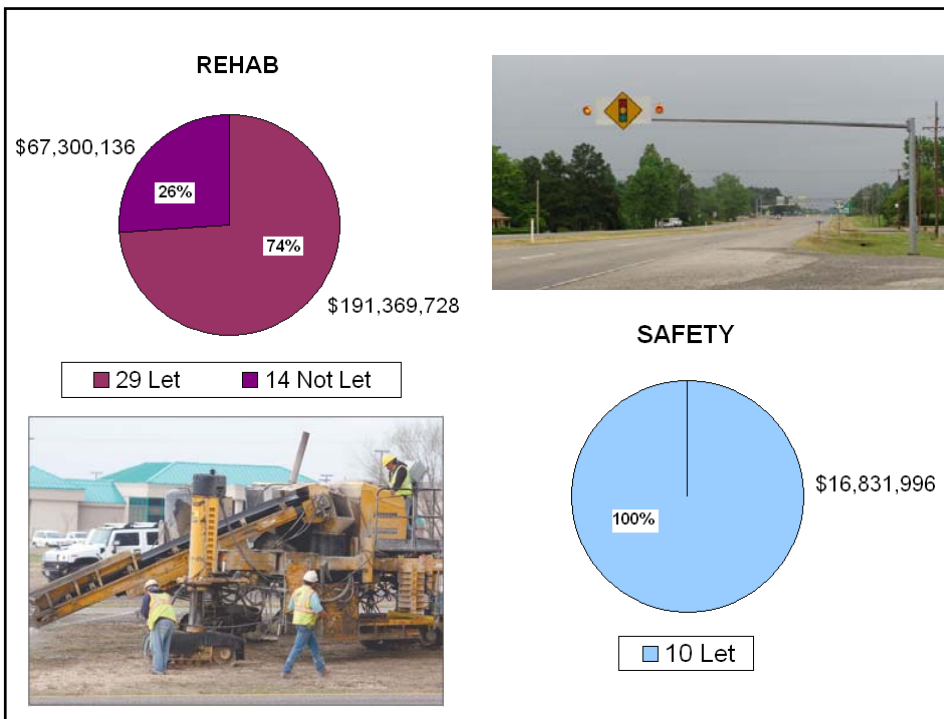

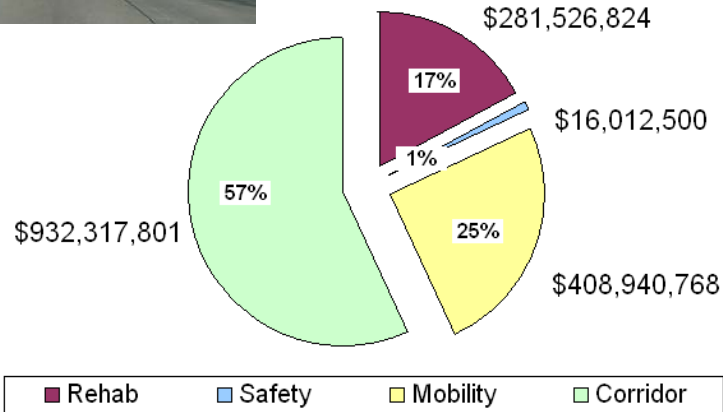

Proposition 12

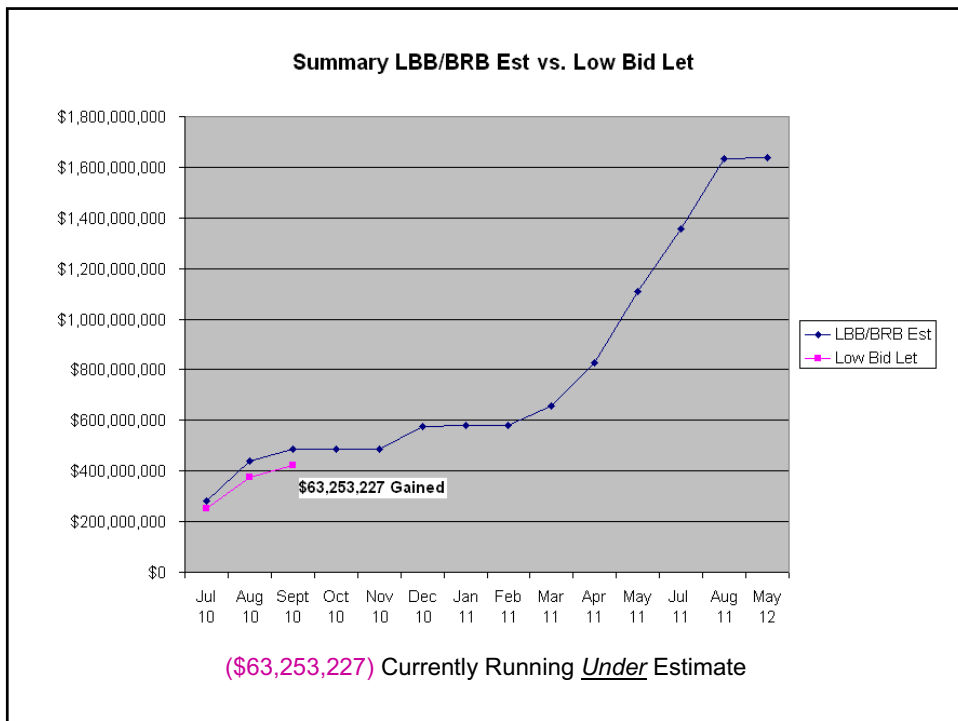

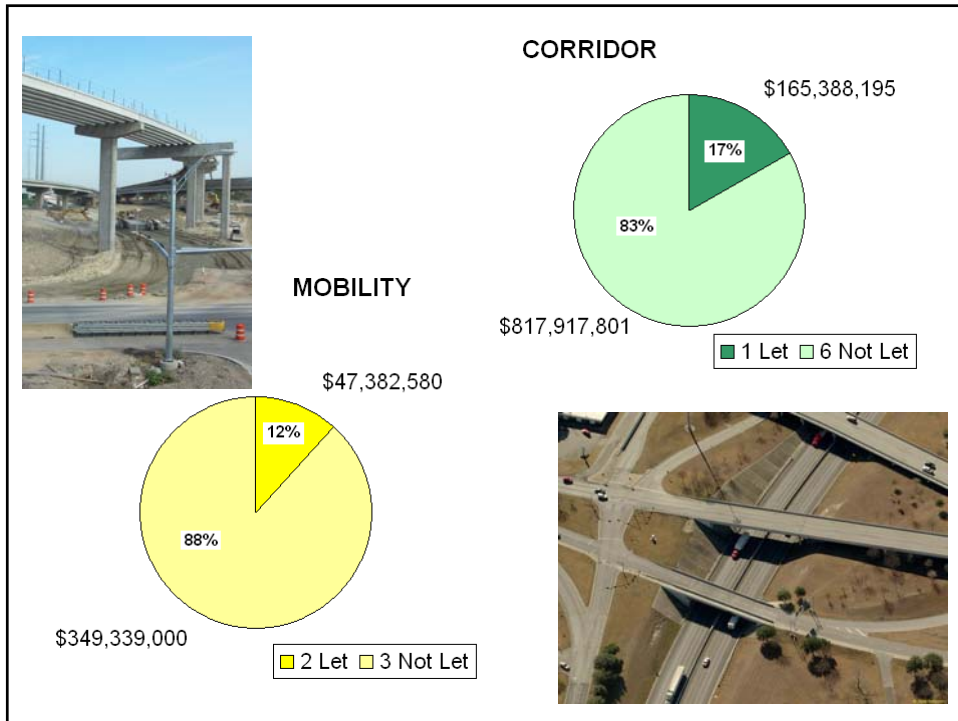

- Commission Selected
 - \$1,758M in construction
 - \$1,639M approved by LBB/BRB
 - \$150M for Rider 56
 - Remaining funds for ROW and consultant engineering

SUMMARY OF CATEGORIES

Total Let Under/Over Estimate for All Categories

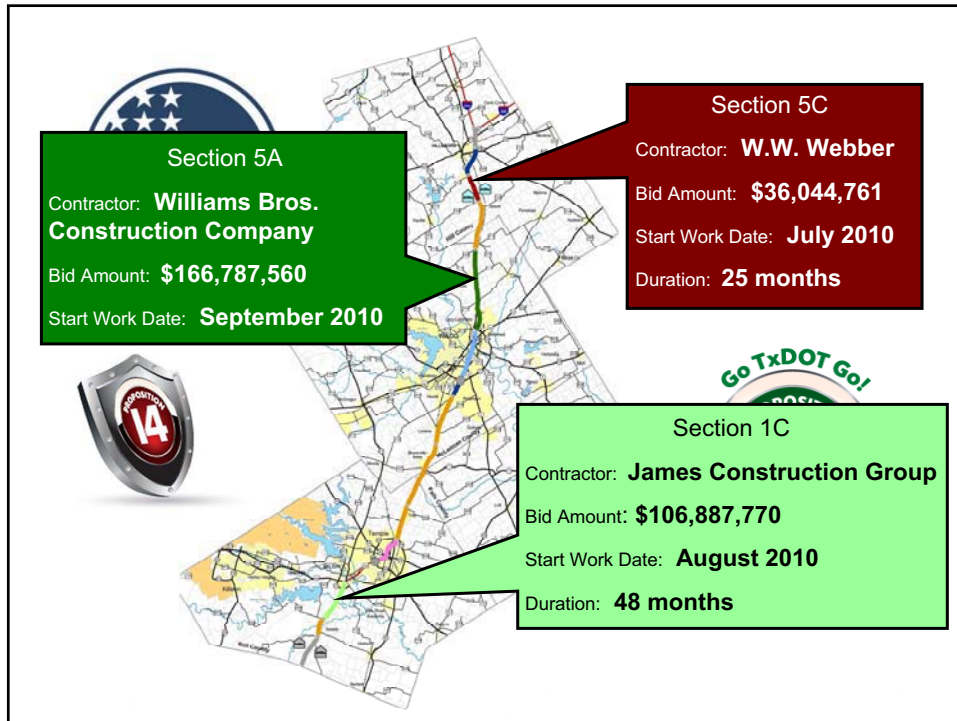

Total Let Under Estimate (\$63,253,227)

Interstate 35 Corridor Improvement Plan For Expansion to Six Lanes

Estimated Fiscal Year Ready For Construction

Communication Challenges

- ★ Coordination of ten (10) segments under construction for 90 miles
- ★ Determining what pertinent information to convey to users (local traffic, frequent users, infrequent users, large trucks) pertaining to construction and traffic
- ★ Informing 60,000 – 100,000 vehicles per day

Measures Taken to Ensure A Well-Managed Project

- ★ Waco District hired a Public Information Specialist to focus on IH 35
- ★ GPA launched My35 website (www.my35.org), which includes project information on IH 35
- ★ Waco District utilized Houston, Dallas, and Ft. Worth districts for experience gained from other large projects

Mobility Coordination

The Texas Transportation Institute has been hired to lead this activity.

- ★ Proactive traffic management
 - Coordinate with contractors, emergency responders, public works, etc.
- ★ Communication of traffic management
- ★ Mitigation of traffic activities
- ★ Public information and outreach
- ★ Project liaison
- ★ Intelligent traffic systems during construction
- ★ Spread the message
 - Business / residential community

Travel-time Monitoring Using Bluetooth Technology

- ★ Uses existing TxDOT infrastructure (poles, power, etc.) where possible
- ★ Can be deployed using low-cost solar technology
- ★ Uses cellular modem for communications
- ★ Completely anonymous; used only to determine real-time traffic data

Results

During construction, ten different projects, totaling ninety miles in length, function as one actively, well-managed job, with pertinent travel information available to users in real-time.
