PARIS District

In Minute Order 109645, dated April 29, 2004, the Texas Transportation Commission (commission) authorized the creation of the Grayson County Regional Mobility Authority (authority), with the boundaries of the authority to be the entire geographic area of Grayson County.

The Texas Department of Transportation (department) and the authority have worked together to identify an approach to pursue the development of certain transportation system improvements within the jurisdictional limits of the authority.

The authority's goals are to improve mobility by providing an extension of the Dallas North Tollway into Grayson County and to provide congestion relief to US 75. This would be accomplished by accelerating the delivery of individual segments and projects with innovative funding and partnerships.

Transportation Code, §370.301 authorizes the department to provide for or contribute to the payment of costs of the design, financing, construction, operation, or maintenance of a turnpike project by a regional mobility authority (RMA) on terms agreed to by the department and the RMA. Transportation Code, §222.103 authorizes the department to participate, by spending money from any available source, in the acquisition, construction, maintenance, or operation of a toll facility of a public or private entity on terms and conditions established by the commission.

Pursuant to Transportation Code, §222.103, the commission adopted Title 43, Texas Administrative Code, §27.50-27.58 (toll equity rules) to prescribe conditions for the commission's financing of a toll facility of a public or private entity.

In accordance with Section 27.53 of the toll equity rules, the authority has submitted a request for a total of \$10 million to secure financial advisors and engineering consultants for the development of a turnpike facility from the Collin County line to US 75 north of the city of Denison (project). The request includes an estimated \$6.5 million for the purposes of developing preliminary engineering documents, and public outreach and education efforts, and an estimated \$3.5 million for the purposes of financial advisory services, traffic and revenue studies, and project management services. The financial assistance may also be used for necessary or incidental administrative, legal, and other expenses relating to the development, acquisition, construction, maintenance, or operation of the project. The financial assistance may be in the form of a grant or loan.

Information and data required by Section 27.53(b) is either contained in the request for financing, in the petition for authorization to form the authority filed with the department on December 23, 2008, or is already in the department's possession. Supplemental information and data required by Section 27.53(c) is contained in the request for financial assistance or has already been provided to the department.

MINUTE ORDER

Page 2 of 2

PARIS District

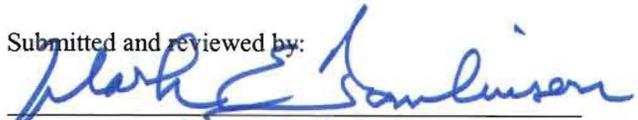

As provided in Minute Order 109645, the authority will benefit the state and the traveling public and improve the efficiency of the state's transportation system through the potential construction and operation of this project, which will enhance mobility and safety within this segment of the state transportation system.

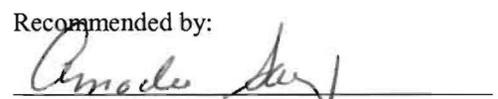

The project is consistent with the approved Texas Transportation Plan and the Metropolitan Transportation Plan of the Sherman-Denison Metropolitan Planning Organization.

The authority has indicated that they will fund a portion of the costs of developing the proposed project through revenue bond sales, local contributions, and various loans, and will consider public private partnerships and other means of private funding. Along with the requested financial assistance, the project has the potential to expand the availability of funding for transportation projects or reduce direct state costs.

The application for financing shows that the project and the authority are likely to have sufficient revenues to assure repayment of the loan.

NOW, THEREFORE, IT IS DETERMINED that the request for financial assistance submitted by the Grayson County Regional Mobility Authority meets the applicable requirements of 43 TAC §27.53 and §27.54(a) and, in accordance with those provisions, the commission grants preliminary approval of the request for financial assistance in the total amount of \$10 million, with \$6.5 million to be provided as an in-kind grant to the authority in the form of preliminary engineering documents, and public outreach and education efforts, and \$3.5 million, in the form of a loan, to be used to fund the costs of financial advisory services, traffic and revenue studies, and project management services, including the costs of necessary administrative, legal, engineering, and other services associated with the development of the project, and directs the executive director to implement the actions authorized and required by those and other applicable toll equity rule provisions.
