

**Q&A Matrix**

I-35E Phase 2 Project  
RFQ Q&A Matrix No. 2  
June 12, 2020

TxDOT Question Number	Document	Reference	Sub Reference	Question	TxDOT Response
22.	Industry Workshop Presentation and Design Schematic	RIDs		Industry Workshop presentation states that "Full reconstruction of the "grandfathered" existing 2 tolled managed lanes (no increase in capacity)" However the Design Schematic shows 4 fixed direction Toll Lanes. Which should be followed for design and pricing?	Both the Industry Presentation and Design Schematic should be followed. The project will reconstruct the existing grandfathered toll lanes at the widths shown on the design schematic.
23.	RFQ	Forms	Form G-2, RFQ Exhibit A Section 2 Table 1	Table 1 in Addendum #1 states that four pages per person are allowed for Form G-2. However, the Word template for Form G-2 is five pages, and the template can't be changed. We request that Table 1 be revised to state that five pages per person are allowed for Form G-2.	In order to limit Form G-2 to four pages, Proposers should limit their responses to seven lines of text in response to the "Additional Relevant Information" prompt in the first Form G-2 table and seven lines of text in response to the "Describe role and services provided relevant to this Project, including the start and end dates that you served in each role:" prompt in the second Form G-2 table. If Proposers fill out Form G-2 in Word, the lines provided in the blank form should be deleted as text is inserted to allow for use of entire available box. Manipulation of the table to provide more room in the boxes is allowed as long as the total number of pages does not exceed four.
