

## **SH 360 Project**

The proposed SH 360 Project will provide needed safety improvements, congestion relief and economic development benefits to the public.

The project will provide a controlled-access urban tollway that will reduce intersection conflicts with local streets and reduce anticipated congestion within the project area, improving traffic flow for local businesses and residents along both the SH 360 frontage roads and on US 287 at SH 360.

### **Project Improvements**

The SH 360 Project will add two toll lanes in each direction from approximately two miles south of I-20 near East Sublett Road/West Camp Wisdom Road to US 287.

In addition, the project will provide intersection enhancements and frontage road improvements that would deliver continuous non-tolled frontage roads throughout the corridor.

The project also includes grade-separating the US 287 mainlanes with the SH 360 frontage roads.

### **Schedule (subject to change)**

- Final RFP issued Sept. 8, 2014
- Contract conditionally awarded Feb. 26, 2015
- Contract executed and NTP1 issued on May 15, 2015
- Construction to begin September 2015
- Construction expected to be substantially complete by September 2017
