Solicitation No. 601CT0000005810
Questions & Answers (Q&A)
Q&A Posting Date: 01/03/2024

Ref #	Provider Question	TxDOT Answer
1.	Are we able to add subs that do not currently carry any of the listed precertifications by the advertisement date?	Yes. The team may include subproviders that are not actively precertified in a work category to work on part of a task. The prime provider firm or subprovider firm providing a task leader must have active precertification status in that category by the closing date of the solicitation. See Section 9 of the RFP when posted.
2.	In the event a task lead is on two shortlisted teams, will that task lead be permitted to attend both interviews?	Yes. However, a person who attends an interview as the proposed Project Manager will not be allowed to attend any other interviews, even if the same person is proposed as a Task Leader on other teams. See Sections 13 and 23 of the RFP when posted.
3.	Will the project manager be required to be pre-certified in 6.2.2 AND 6.3.2 prior to the RFP date or can the Tunnel Inspection PM be a separate member of the team?	Refer to slide 8 of the Pre-RFP Meeting presentation: "The project manager must be the task leader of the 6.2.2 Complex Bridge Inspection Project Manager and be precertified in that category by the closing date to be considered responsive." The Task Lead for work category 6.3.2 may be another team member who is pre-certified in this work category.
