

Labor-Hours Modeling: Transparency and Accountability in Contract Negotiation

2022 PEPS Conference

Michael Haithcock, P.E. – Abilene District

Cliff Hallford, PMP – PEPS Division

Lauren D. Garduño, P.E. - Ports to Plains Alliance

Safety: Mission

ZERO

If we could save time in getting to
contract Notice To Proceed,
... and ultimately to our finished project,
... we could take a big step,
... in Ending The Streak.

Mission Zero – Safety Is Intentional

Safety Never Stops!

REMEMBER THIS???

Negotiating Labor-Hours

2021 PEPS Conference

Michael Haithcock, P.E. – Abilene District

Cliff Hallford, PMP – PEPS Division

Lauren Garduño, P.E.

Fair and equitable contracts without regard to:

- Hourly wages
- Overhead rates
- Direct Costs
- Percent Profit

Consultants would receive a “market-rate” of labor hours based on historical data from the last three years.

This would be a support tool for inexperienced TxDOT project managers

Significantly less time to get a contract under NTP

Labor hours normalized, and outliers eliminated

Knowledge sharing tool for inexperienced TxDOT PMs

PEPS has the ability to predict consultant budgets

+ Significantly less time to get a contract under NTP

+ Negotiations without regard to consultant salaries

+ Consistency among TxDOT project managers

+ Negotiations without regard to project construction cost

The Original Data Set – 9 Environmental and Schematic Contracts

| | |

How would negotiations work?

CCSJ / CSJ: 012504-033

County: Shackelford

Project Description:

Widen and overlay US 283 from Albany to the Throckmorton

County line

Target letting date: 1/2019

Design: Project Justification Statement: US 283 is located in the Barnett Energy Sector. This project was selected as a Tier 1 energy sector project and funded with energy sector funds. This section of US 283 is the only section of US 283 in the Abilene District that has not been widened to at least a 40' roadway section.

Existing conditions: The existing pavement consist of flexbase, sealcoats and an overlay. The existing roadway has predominantly 12-foot lanes and 4-foot shoulders.

Project Scope: The following personnel meet on this project Michael Haithcock, Dan Richardson, Martin Sotelo and Cliff Hallford. The following was determined to be the scope of this project: widen pavement to 40' with flex base, overlay 2" SP D, culvert widening, safety end treatment, new signs, new metal beam guard fence and milled in rumble strips and stripping. Once the PSE is developed and a more detailed estimate is created the SP D may be increased to 3"

Projected Traffic:

ADT or AADT

24 HR T: 26.7%

Current Year (2014): 550

Future (2034): 817

Functional Classification: 5 Rural major collector

Design Standard: 3R

Major Structures: There are 6 bridge class structures on this project. Bridge reports and locations are attached.

UTILITY COORDINATION

Utility Involvements: Utilities should be located where structures are widened otherwise utilities should not be an issue

RIGHT OF WAY

Right-of-Way (ROW): Existing width: typically, 100 ft.

Required Right-of-Way anticipated: None Yes Undetermined

Easements anticipated None Temporary Permanent Utility Other

ENVIRONMENTAL & PERMITS

Anticipated Environmental Document: Categorical Exclusion 22

MS4 Permit Compliance – Is the project located in a MS4? No

Environmental Permits/Variations/Commitments/Coordination anticipated: Na

Environmental Comments and Information: CE documentation

CONSTRUCTION

Preliminary Construction Schedule: 18 Months

Issues potentially affecting constructability/construction schedule: Unknown at this time

Early Completion Incentives recommended for consideration: None at this time as daytime lane closures are all that should be required.

Special Provisions: Unknown at this time.

Construction Inspection: Abilene Area Office

Labor-Hours Modeling

Model can predict ranges for consultant contract cost and predict consultant budget for projects in the STIP and UTP

Transportation Program Operations and Reporting

Transportation Program Operations and Reporting

Highest correlated variables to “Total Hours / Mile”

- 1) Functional Classification / District
- 2) Highway Designation
- 3) District
- 4) Construction Cost / Mile

LOE Labor Hour Example Negotiation

- Winter Weather and heavy energy sector traffic has taken its toll on 4.4 miles of US 277 in Taylor County south of the City of Abilene.
- The Design Criteria is PM or 2R depending on the site visit with the Area Engineer.
- On this corridor there are 13 culverts that need safety treatments and Preventative Maintenance is needed on a two-span bridge.
- The Abilene District would also like to address all these issues in a single construction project and Let ASAP.
- Consultant assigned to the project has 1 Project Manager, 1 Senior Engineer, No Design Engineer, 1 Project Engineer, 4 EITs, 2 Engineer Tech, 1 CADD.

**ABILENE DISTRICT GENERAL NOTES
 2014 SPECIFICATIONS**

Contractor questions on this project are to be addressed to the following individual(s):

Bryce Turentine, P.E.: Bryce.Turentine@txdot.gov
 Chad Carter, P.E.: Chad.W.Carter@txdot.gov
 (Abilene Area Office)

Contractor questions will be accepted through email, phone, and in person by the above individuals.

All contractor questions will be reviewed by the Engineer. Once a response is developed, it will be posted to TxDOT's Public FTP at the following Address:
<https://ftp.dot.state.tx.us/pub/txdot-info/Pre-Letting%20Responses/>

All questions submitted that generate a response will be posted through this site.
 The site is organized by:
 District
 Project Type (Construction or Maintenance)
 Letting Date
 CCSJ/Project Name.

Failure to make necessary corrections to SW3P based on SW3P inspections will be cause for withholding the monthly estimate until such corrections have been made.

Failure to make necessary corrections to traffic control items based on barricade inspections will be cause for withholding the monthly estimate until such corrections have been made.

Provide ingress/egress to the adjacent properties in areas under construction. Phased construction of driveways and streets shall be required to provide uninterrupted access to adjacent properties. Coordinate work with the property owners before beginning any construction in the vicinity of the drive.

Cut neat, straight lines with vertical faces along pavement edges or along joints between existing asphalt or concrete pavement and new pavement perpendicular or parallel to the direction of traffic by methods described in applicable bid items, or as directed. Provide clean edges or joints without jagged appearance or chunks broken out. This work is considered subsidiary to various bid items.

General Notes

Sheet A

CCSJ: 0407-06-047
 County: TAYLOR
 Highway: US277

Environmental

Endangered and Protected Species

– Migratory Birds

- a. **Bird nesting season is typically 15Feb through 15Sep annually.**
- b. The Contractor will avoid disturbing, destroying, removing, or relocating migratory birds and active nests found in trees, culverts, bridges, on the ground, or anywhere they are encountered.
- c. Perform all tree trimming and other vegetation clearing activities during the non-breeding seasons (typically 15Sep-15Feb annually). Perform any invasive nest removal and bird exclusion methods to prevent birds from establishing nests. Phasing of work during construction may be necessary to stay in compliance.
- d. When active nests are unexpectedly encountered on-site during construction, the Contractor will stop work and immediately notify the Engineer. Take measures to avoid disturbance of these birds, their occupied nest, eggs, and/or young, in accordance with the Migratory Bird Treaty Act, Texas Parks and Wildlife Code, and TxDOT policy.
- e. The Engineer will notify the Contractor when work may resume.
- f. The Contractor should be prepared to prevent migratory birds from building nests by utilizing nest prevention methods, such as bird-deterrent netting and bird-repelling sprays and/or gels, between 15Feb and 15Sep. The Contractor can discuss other preventative measures with the Engineer and/or District Environmental Staff.

Best Management Practices

- 1. **Bird BMPs**
 - a. Not disturbing, destroying, or removing active nests, including ground nesting birds, during the nesting season.
 - b. Avoiding the removal of unoccupied, inactive nests, as practicable.
 - c. Preventing the establishment of active nests during the nesting season on TxDOT owned and operated facilities and structures proposed for replacement or repair.
 - d. Not collecting, capturing, relocating, or transporting birds, eggs, young, or active nests without a permit.

Item 5, "Control of Work"

Use Method C for construction surveying.

Make necessary arrangements with utility owners regarding temporary protections such as bracing power poles, and de-energizing power lines. The Department will not reimburse the cost of such temporary protections to the Contractor, unless the Engineer determines that inadequate information was available at the time the project was bid. **"Call Before You Dig" "Call 811"**

SEQUENCE OF WORK

GENERAL

1. ALL ROADWORK TO BE COMPLETED DURING DAYTIME HOURS WITH FOLLOWING CRITERIA: USE FLAGGERS FOR ROAD INTERSECTIONS, BUSINESS AND RESIDENTIAL DRIVES TO REMAIN
2. PLACE ADVANCE WARNING SIGNS AND BARRICADES IN ACCORDANCE WITH TMDOT AND APPL
3. FOLLOW THE REQUIREMENTS OF THE EDGE CONDITION WORKSHEET AS WORK PROGRESSES.
4. THE STEPS OF THE CONSTRUCTION SEQUENCE MAY BE MODIFIED AS APPROVED, IN WRITEN ENGINEER. ANY CHANGES IMPLEMENTED, SHALL HAVE DETAILS THAT ARE SIGNED AND SE LICENSED PROFESSIONAL ENGINEER.

PHASE 1: MBOG AND CULVERT END TREATMENTS

1. PLACE ALL EROSION PREVENTION BMPs ALONG PROJECT AS SHOWN IN SWSP SITE PLAN
2. INSTALL NEW MBOG ALONG BOTH SIDERS OF ROADWAY AT CULVERTS 2 AND 4.
3. INSTALL SAFETY END TREATMENTS TO EACH END OF CULVERTS 1, 3, AND 6.
4. INSTALL SAFETY END TREATMENTS AT WEST END OF CULVERTS 5, 6, 7, AND 9.

NOTE: -NO CHANGE ON EAST END OF CULVERTS 5, 6, 7 (EXISTING MBOG TO REMAIN)
 -9 (OUTSIDE OF CLEAR ZONE)---

PHASE 2: MILLING

1. LOCATE AREAS FOR PAVEMENT REPAIR PRIOR TO MILLING OPERATIONS.
2. MILLING OPERATIONS SHALL PROGRESS IN SEGMENT LENGTHS THAT WILL ALLOW THE FULL THE PAVEMENT TO BE MILLED IN ONE DAY.
3. KEEP EXISTING SUPER ELEVATIONS IN PLACE WHEN MILLING.
4. TAPER MILLING DEPTH AT THE END OF EACH SEGMENT TO PROVIDE A SMOOTH TRANSITION FROM THE MILLED TO EXISTING SURFACE.
5. REMOVE ALL LOOSE DEBRIS AND PLACE TEMPORARY PAVEMENT MARKING TABS PRIOR TO OPEN LANE TO TRAFFIC OR AS DIRECTED.

PHASE 3: PAVEMENT REPAIR

1. COMPLETE PAVEMENT REPAIRS AT LOCATIONS DIRECTED BY THE ENGINEER.
2. REMOVE ALL LOOSE DEBRIS FROM CLOSED LANES BEFORE OPENING TO TRAFFIC.
3. MAINTAIN TEMPORARY PAVEMENT MARKINGS AS NEEDED.

GENERAL NOTES

1. Flagg attached to signs where shown, are REQUIRED.
2. All traffic control devices that are REQUIRED, except those denoted with the triangle symbol may be omitted when stopped elsewhere in the plans, or for route maintenance work, when approved by the Engineer.
3. The "BE PREPARED TO STOP" sign may be replaced after the CR0-4 "ONE LANE ROAD AHEAD" sign, but proper sign spacing shall be maintained.
4. Flagger should use roadway radio or other method of communication to control traffic.
5. Length of work zone should be based on the traffic flow to communicate.
6. A shakedown vehicle with a TMA should be used anytime it can be positioned 30 to 100 feet in advance of the area of work to provide the advance notice of the duration and quality of the work. If workers are no longer present but road work conditions require the traffic control to remain in place, Type 3 Barricades or other channelizing devices may be substituted for the Shakedown vehicle and TMA.
7. Additional shakedown vehicles with TMA may be positioned off the paved surface, next to those shown in order to protect a wider work space.

TPC (2-2a)
 2-LANE ROADWAY WITHOUT PAVED SHOULDERS
 ONE LANE TWO-WAY
 CONTROL WITH YIELD SIGNS
 (Less than 2000 ADT - See Note 9)

TPC (2-2b)
 2-LANE ROADWAY WITHOUT PAVED SHOULDERS
 ONE LANE TWO-WAY
 CONTROL WITH FLAGGERS

Roadway Layouts with Horizontal Alignments

1. First Negotiate the Labor Hours for the Function Code
2. Start at the Average Hours per Mile then use Engineering Judgement
3. After Agreement on Function Code, then examine Job Titles
4. Distribution of Labor Hours per Job Titles is unique to each firm
5. Be Flexible, but make sure Labor Hours are in correct Function Code
6. Distribution amongst Job Titles must make sense to that project

1. Transparency is very important and key to successful negotiations
2. How the data would be used and ultimately shared has not been determined
3. It is early in development of the LOE model, and we are working on the process
4. We have a joint committee with ACEC to ensure consultant input and fairness
5. We will keep you posted next year and will do an in-person presentation once complete

Function Code 102 Route Studies

“The LOE Tool will be used for all types of TxDOT Projects”

- We are loading data for low-risk Preventative Maintenance projects, the model will not be complete for six months, then needs reviewing, testing, tweaking, and testing some more – we are very, very early in the process.

“The LOE Tool has already been developed without consultant input and is being sold to us.”

- | | | |
|-------------------------------------|---------------------------|---------|
| • Phase 1 (May 2021 – August 2021) | Abilene | 9 E&S |
| • Phase 2 (Sept 2021 - August 2022) | Abilene, PEPS | 104 PSE |
| • Phase 3 (Sept 2022 – present) | Abilene, PEPS, MPPM, ACEC | |

The Labor-Hour data must be correct / accurate for the proposed project.

- In the case of the 9 x \$9M West Texas Environmental and Schematic corridors, we had a near perfect sample to examine.
- Imperative that TxDOT only use historical data from successful contracts on highly similar projects.

The Labor-Hour data must be applied accurately to each project.

- Each project has unique unknowns and risk involved for each job title.
- A contract will often be higher than the average number of labor-hours per mile due to the various complexity of a project.

No two projects are the same

- The purpose of this tool is to get TxDOT and consultants closer to a contract that is fair and equitable for both sides.
- The tool does not replace engineering judgement or common sense in negotiations.

What if we use subconsultants for some services in the contract?

- Labor-hours can be reviewed by the Function Code instead of by the entire Job Title.
- The Prime can add the sub-consultant's hours to the Prime's Job Title for those services or that Function Code can be reviewed separately.

What if we have multiple Senior Engineers or EITs on our contract?

- The Labor-Hours for each Job Title are added regardless of the number of employees at that position.

This system favors some consultant firms.

- Labor-Hours are reviewed regardless of wages, overhead rates, direct cost or profit.
- The number of Labor-Hours should be the same regardless of a firm's specifics.

The model has been tweaked and the data is highly accurate

All Contracts beginning in 2024 or 2025 are entered

IT has perfected the format of the data and tableaus

TxDOT PMs have been trained on how to use the tool

Consultants are receiving the market rate of Labor Hours

Negotiations are much faster and more efficient

Contract information is much more transparent

Some Other Contract Types That We Would Like to Examine in the Future:

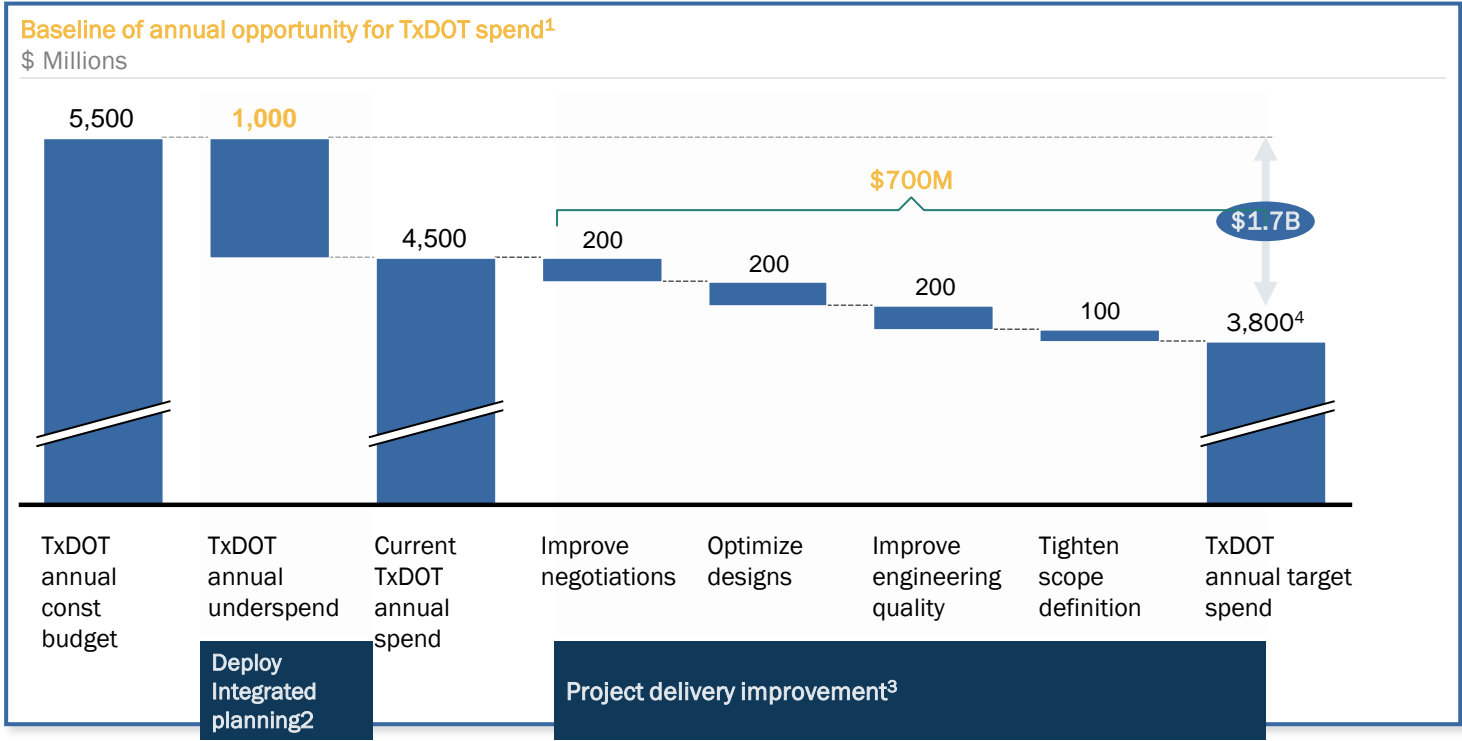

- ★ John Lamb, Lamb-Star
- ★ Dawn Green, KCI
- ★ Doug Dillon, BGE
- ★ Don Green, RS&H
- ★ Todd Thurber, LJA
- ★ Lee Ann Dixon, Walter P. Moore
- ★ Kelly Kaatz, HDR
- ★ Dave Lubitz, Aguirre & Fields
- ★ John Hamilton, Parkhill
- ★ Travis Isaacson, The Rios Group

Why is this important?

Lauren Garduño, P.E.

3 Capturing planning and project delivery opportunities will allow TxDOT to deliver \$1.7B in additional project value per year (2014)

1 Assumes steady state operation of enhanced project delivery organization
 2 Assumes TxDOT can spend its total annual budget through enhanced budget planning and capital deployment
 3 Assumes the capture of \$300 million of the \$450 million in annual over runs due to unpreventable scope changes, estimation errors, etc.
 4 Opportunity excludes optimizing labor and labor management as currently that is outside TxDOT scope and is self-performed by contractors

Questions and Discussion

A background image of a city skyline at dusk or dawn, featuring several tall skyscrapers with illuminated windows. The sky is a mix of light blue and soft orange/pink hues.
