

Summary of Chapter 9 Proposed Changes

The Texas Department of Transportation proposes amendments to §§9.152 and 9.153, concerning design build contracts, to clarify that the department reserves the right to suspend a procurement for a design-build project and to clarify the contents of a request for proposal necessary for such a project. The amendments to §9.153 also provide the conditions under which the department will make a payment for a work product that is prepared for a proposal and that can be used by the department if a procurement is terminated before the design-build contract is executed.
