

The Texas Department of Transportation proposes amendments to §25.1, Uniform Traffic Control Devices, to adopt by reference a new version of the Texas Manual on Uniform Traffic Control Devices (Texas MUTCD) as required by Transportation Code, §544.001. The Texas MUTCD is revised periodically to maintain substantial conformance with the federal Manual on Uniform Traffic Control Devices (MUTCD), which defines the standards used by road managers nationwide to install and maintain traffic control devices on all streets, highways, pedestrian and bicycle facilities, and site roadways open to public travel.
