

Chapter 30.502 summary

The Texas Department of Transportation proposes amendments to §§30.502 and 30.503 that change the definition of definition of “meteorological evaluation tower” and change the requirements related to the collection and dissemination of information about the building and operation of specified towers used for wind measurement. These changes are being made in accordance with statutory changes made by H.B. 2898 (89th Leg., R.S., 2025).
