

Status Report - Highway Projects Being Processed Under the Procedures of Transportation Code, Chapter 201, Subchapter I-1

November 2025

Prepared for members of the Texas Legislature by Texas Department of Transportation (TxDOT) Environmental Affairs Division (ENV).

1.0 Explanation of report

Transportation Code, §201.762 requires TxDOT to, no later than December 1 of each year, submit to the members of the standing legislative committees with primary jurisdiction over matters related to transportation a report regarding implementation of *Transportation Code, Chapter 201, Subchapter I-1*. The statute requires this report to include the status of each project being processed under the procedures of Subchapter I-1, including:

- how the project was classified for environmental review;
- the current status of the environmental review;
- the date on which the department is required to make an environmental decision under applicable deadlines;
- an explanation of any delays; and
- any deadline under *Section 201.759* missed by the department.

The statute also requires TxDOT to provide a copy of this report to each member of the legislature who has at least one project covered by the report in the member's district.

Subchapter I-1 is primarily aimed at establishing procedures for allowing a local government to become the official project sponsor for the environmental review of a highway project, and then holding TxDOT accountable to deadlines on the review of materials prepared and submitted by the local government project sponsor. For example,

most of the review deadlines set forth at §201.759 are stated in terms of a deadline after a document is “received from a local government sponsor,” “received by the department,” or “submitted to the department.” Therefore, ENV has prepared this report using data from only those projects for which a local government has chosen to be the official project sponsor for purposes of environmental review. TxDOT projects for which a TxDOT district is serving as the official project sponsor for purposes of environmental review are not included in this report.

In terms of timing, this report includes those projects with a local government project sponsor for which an Environmental Impact Statement (EIS), Environmental Assessment (EA), Categorical Exclusion (CE), or Reevaluation was either completed between November 1, 2024 and October 31, 2025 (which is when this report was prepared) or was in development as of October 31, 2025.

For many of the projects listed on this spreadsheet, the “date environmental decision required” is listed as “TBD,” or “to be determined.” This is because the deadlines for making an environmental decision in §201.759 are stated in terms of a certain number of days after specified documentation is submitted to the department (or, in the case of an EA, a certain number of days after the public involvement process concludes). Additionally, as explained in TxDOT’s implementing rules at *43 Texas Administrative Code (TAC) §2.50*, these deadlines are suspended while the local government sponsor is working to address issues or comments raised by TxDOT staff during its review. For those projects for which TxDOT is yet unable to determine the deadline for making an environmental decision because either the final document has not yet been provided to TxDOT or because the review deadline is in suspension at the time this report is being prepared, the report lists “TBD” under “date environmental decision required.”

2.0 Deadlines missed

TxDOT did not miss any deadlines under §201.759 with respect to local government sponsored projects during the twelve months covered by this report.

3.0 Abbreviations and Acronyms

Table 1 Abbreviations and Acronym Definitions

Abbreviation or Acronym	Definition
