

Report on Toll Projects For Fiscal Year 2025

Pursuant to HB 803, 86TH Texas Legislature

February 27, 2026

Introduction

House Bill 803, 86th Legislature, Regular Session (2019) added Transportation Code, §372.054, which requires a toll project entity to publish certain financial information on each of its toll projects. The Texas Department of Transportation (TxDOT), a toll project entity pursuant to Section 372.001 and Chapter 228, Texas Transportation Code, has prepared this report solely for the purpose of satisfying this requirement. Information presented in this report is for the fiscal year ended August 31, 2025.

TxDOT-Operated Toll Projects

Revenues and Expenses for Financed Toll Projects

The table below sets forth for each TxDOT-operated toll project or system financed with toll revenue debt, the final maturity of the debt, operating revenues, operating expenses, repairs and maintenance expenses and debt service for fiscal year 2025 (FY 2025). The table includes relevant excerpts of financial data solely for satisfying the requirements of HB 803.

Table 1: FY 2025 Revenues and Expenses of Financed Toll Projects¹

System/Project (in millions)	Final Maturity of Project/ System Debt	Operating Revenues	Operating Expenses ²	Repairs & Maintenance Expenses	Debt Service
Central Texas Turnpike System (SH 130 Segments 1 – 4, Loop 1, SH 45N & SH 45SE)	2042	\$337.64	\$101.87	\$65.14	\$160.34
Grand Parkway System	2053	\$393.32	\$59.11	\$18.97	\$175.38
I-35E Managed Lanes Project	2052	\$40.39	\$6.52	\$8.75	\$8.36
SH 249 System	2057	\$29.41	\$4.51	\$1.53	\$7.80

¹ A State Highway Fund loan was made to the Texas Transportation Finance Corporation to terminate the SH 288 Comprehensive Development Agreement in 2024. However, the corporation did not have access to the revenues during fiscal year 2025 and no debt service was paid before the State Highway Fund loan was refunded by bonds in October 2025. All revenues after expenses were applied to the refunding transaction and the continued maintenance costs of the facility.

² Excludes Depreciation and Amortization

Source: Amounts were obtained from the Annual Financial Report for the FY ended August 31, 2025, of TxDOT or of the respective toll project or system, as applicable.

Surplus Revenues - Financed Toll Projects

For TxDOT-operated toll projects that are financed with toll revenue debt, revenues in excess of debt service and expenses are used to fund project reserve accounts customarily required by bond indentures and trust agreements, which results in no “surplus revenues” reportable for any system or project listed in Table 1 for FY 2025.

Note that the term “surplus revenues” in this report may differ from similar terms defined by the toll project bond indentures.

Revenues and Expenses for Non-Financed Toll Projects

The table below sets forth operating revenues and operating and maintenance expenses attributable to each TxDOT-operated toll project not financed with toll revenue debt.

Table 2: FY 2025 Revenues and Expenses of Non-Financed Toll Projects

System/Project (in millions)	Operating Revenues	Operating Expenses	Maintenance Expenses	Surplus Revenue
DFW Connector Managed Lanes (SH 114 in Tarrant County)	\$2.67	\$0.47	\$1.04	\$1.16
I-30 Managed Lanes	\$3.40	\$0.81	\$2.61	(\$0.02)
I-635/LBJ East Express Lanes	\$0.02	\$0.00	\$0.00	\$0.02
Midtown Express Managed Lanes (SH 183, SH 114 in Dallas County and Loop 12)	\$44.09	\$6.08	\$2.16	\$0.00 ¹
SH 288 Managed Lanes (SH 288 in Harris County) ²	\$107.35	\$11.36	\$2.73	\$93.26

¹ The excess of \$35.85 million will be reserved in the State Highway Fund for use on potential future expansions to the corridors.

² The Texas Transportation Finance Corporation bond financed the SH 288 Managed Lanes project in October 2025. The project will be displayed in Table 1: Revenues and Expenses of Financed Toll Projects in future reports to reflect the financing. All revenues after expenses were applied to the refunding transaction and the continued maintenance costs of the facility.

Surplus Revenues – Non-Financed Toll Projects

The TxDOT-operated toll projects that are not financed are shown in Table 2. Please note that reconstruction of the I-635/LBJ East Express Lanes began in spring 2020

and tolls were temporarily removed. TxDOT does not have any operating or maintenance expenses during the reconstruction. Operating revenues reported during fiscal 2025 represent amounts collected during fiscal 2025 that were billed to customers prior to the cessation of tolling.

Anticipated Capital Plans

Table 3 sets forth the anticipated capital plans for each toll project or system with such a plan. Excluded from the estimates are construction activities funded with bond proceeds or non-toll revenue. Projects to be funded from the surplus revenues of certain non-financed toll projects in the Dallas-Fort Worth region shown in Table 2 will be programmed in coordination with the North Central Texas Council of Governments.

Estimated Capital Plan Expenditures are necessarily based on various assumptions and estimates that are inherently subject to change. Assumptions related to the foregoing involve judgments with respect to, among other things, future economic, competitive and market conditions and future business decisions, and may be revised.

Table 3: FY 2026 – FY 2030 Capital Plans ¹

System/Project	Estimated Capital Plan Expenditures	Planned Capital Activities
Central Texas Turnpike System	\$189 million	<ul style="list-style-type: none"> • SH 130 Expansion Pre-development • Major Maintenance
Grand Parkway System	\$440 million	<ul style="list-style-type: none"> • Segment B-1 Pre-development • System Expansions • Major Maintenance
I-35E Managed Lanes Project	\$18 million	<ul style="list-style-type: none"> • Toll Equipment • Major Maintenance
SH 249 System	\$5 million	<ul style="list-style-type: none"> • Capital Maintenance • Major Maintenance
SH 288 Managed Lanes	\$17 million	<ul style="list-style-type: none"> • ROW: Operation Center Parking Project • Major Maintenance
Midtown Express Managed Lanes	\$11 million	<ul style="list-style-type: none"> • Major Maintenance

¹ For additional information about proposed capital projects, please see the most recent Unified Transportation Program at the following link: [Unified Transportation Program](#)

Toll Projects Operated Under a Comprehensive Development Agreement

TxDOT may enter into a comprehensive development agreement (CDA) with a private developer to design, construct, finance, operate and maintain an eligible toll project for up to 52 years. A CDA may authorize the private developer to impose and collect tolls from users of the project over the term of the agreement until the termination date. (State law specified which TxDOT projects may be developed under a CDA. CDA authorization expired in 2017 for all TxDOT projects except the Grand Parkway.)

TxDOT has entered into such CDAs for the development of four projects, as shown in Table 4.

Table 4: Project Cost and Termination Year for CDA Projects

Project	Contract Value for Design and Construction	CDA Termination Year
SH 130 Segments 5 & 6	\$1 billion	2062
North Tarrant Express Segments 1 & 2W	\$1.9 billion	2061
I-635/LBJ Managed Lanes	\$2.1 billion	2061
North Tarrant Express Segments 3A, 3B & 3C	\$2 billion	2061
