Concrete Rated Source Quality Catalog

Overview

The Materials and Tests Division oversees the Texas Department of Transportation (TxDOT) Aggregate Quality Monitoring Program (AQMP) in accordance with Tex-499-A. The AQMP was created by TxDOT to improve efficiency of TxDOT operations. The program provides rated values for aggregate products from sources demonstrating continued quality and uniformity. Districts are allowed to use aggregates from rated sources qualified through the AQMP without project specific testing.

Sources are subject to sampling and testing at least twice a year to publish the Concrete Rated Source Quality Catalog (CRSQC) bi-annually. Aggregate sources are added to the catalog based on their testing history of material only supplied to TxDOT projects. Participation is at TxDOT's discretion and not at the option of the aggregate supplier.

The AQMP does not exempt sources from project level quality assurance testing. Districts are required to perform project testing in accordance with TxDOT's Guide Schedule to determine specification compliance for those aggregate requirements not rated by this catalog.

TxDOT reserves the right to conduct random sampling & testing of these materials to ensure quality. TxDOT representatives may sample material stockpiled at any location.

Contact the Soils and Aggregates Section at (512) 902-7706 for more information or if you have any questions.

Legends

Producer Code Number

The producer code number for each aggregate source provides information to the quarry or pit location.

- The first two digits identify the district in which the source is located. Sources located outside Texas have '00' as the first two digits of the code.
- The middle three digits identify the county in which the source is located. The counties are numbered beginning with Anderson County as '001' and ending with Zavala County as '254.' A list of counties, in alphabetical order, can be found on the official Texas Travel Map.
- Out of state sources are denoted with the following middle three digits:
 - 401 – Mexico
 - 501 – Arkansas
 - 502 – Louisiana
 - 503 – New Mexico
 - 504 – Oklahoma
 - 509 – Colorado
- The last two digits stand for the sequential order the sources have been assigned within the corresponding county.

Material Codes

Coarse Aggregate

- 010 – Siliceous Gravel
- 012 - Partly Crushed Siliceous Gravel
- 013 - Siliceous & Limestone Gravel
- 014 - Crushed Siliceous and Limestone Gravel
- 015 - Partly Crushed Siliceous & Limestone Gravel
- 018 - Crushed Limestone
- 019 - Crushed Dolomite
- 022 - Partly Crushed Limestone Gravel
- 023 - Limestone & Siliceous Gravel
- 024 - Crushed Limestone & Siliceous Gravel
- 025 - Partly Crushed Limestone and Siliceous Gravel
- 029 - Crushed Sandstone
- 032 - Crushed Rhyolite
- 033 - Crushed Rhyolite Gravel
- 048 - Lightweight Aggregate
- 051 - Crushed Granite

Fine Aggregate

- 060 - Limestone and Siliceous Sand
- 061 - Manufactured Sand
- 062 - Siliceous Sand
- 063 - Siliceous and Limestone Sand
- 064 - Rhyolite Sand
- 065 - Manufactured Limestone and Siliceous Sand Blend
- 066 - Siliceous and Calcareous Sand
- 068 - Siliceous and Manufactured Limestone Sand Blend

Tests

- SAC = Surface Aggregate Classification for Wet Surface Crash Reduction Program
- RSLA = Rated Source Los Angeles Abrasion
- RSSM = Rated Source Soundness
- RSMD = Rated Source Micro-Deval
- CA - RSAI = Coarse Aggregate Rated Source Acid Insoluble
- CoTE = Rated Coefficient of Thermal Expansion
- FA - RSAI = Coarse Aggregate Rated Source Acid Insoluble
- * = Requires project testing for HMAC and/or surface treatment aggregates.
