# TEXAS PORT MISSION PLAN EXECUTIVE SUMMARY

89<sup>TH</sup> Legislative Session

## INTRODUCTION

In a state where the maritime industry accounts for more than 28% of the GDP<sup>1</sup>, the Texas economy is largely driven by commodity supply chains that move goods to and from the state. Inland markets across the state rely on a strong multimodal freight network to get their goods to the ports for export. Improving the port systems help Texas compete in the global market by ensuring that its inland export commodities continue to reach their destinations worldwide.

Texas seaports require continual maritime infrastructure, seaport connectivity, and ship channel improvements to meet the needs of our Texas's booming economy, as they are a crucial link in the supply chain. The projects identified in this plan represent the needs of Texas ports and their implementation will secure the State's continued economic growth.

## Successes Since 88th Legislative Session

Following the 88th Legislature's historic **\$640 million** appropriation to Texas seaports, the Texas Transportation Commission awarded the funding to Texas seaport projects to help increase trade, improve safety, and provide a more robust supply chain for our state and the nation.

- Signed into law as the first funding of its kind in Texas, the Commission approved eligible port development and infrastructure projects for **\$200 million** in funding awards through the Maritime Infrastructure Program (MIP). TxDOT and recipient ports were successful in initiating the letting process for all projects selected for funding within the first year of the biennium.
- Additionally, the Texas Transportation Commission approved eligible state highway and other publicly accessible roadway projects for **\$40 million** in funding awards through the Seaport Connectivity Program (SCP).
- The 88th Legislature appropriated **\$400 million** in general revenue to fund the Ship Channel Improvement Revolving Fund (SCIRF). The entire \$400 million was approved for award to two ports.

## Maritime Infrastructure

Maritime infrastructure addresses port facility and capital improvement needs. Port facilities, including things like storage yards, docks and wharves, entry gates, and interior roadway systems are the backbone of a port's operations. The port's interior infrastructure and equipment help to move workers and goods between vessels and other modes of transportation outside of the port. Investment in port infrastructure allows for ports to maintain efficient business operations, support continued growth of existing businesses, attract new clients, and adapt to ever-changing domestic and global economic conditions all while remaining economically viable and competitive. A port without functional, modern infrastructure will lose out on significant growth, job creation, and revenue generation, while a port that is able to continually invest in infrastructure improvements will actively contribute to the economic health of the region and the state, helping to improve the quality of life in the local area.

## Seaport Connectivity

Texas seaports have a robust intermodal transportation system connecting the state and the nation to domestic and foreign markets. A strong, viable network of road, rail, and pipeline connections to facilitate the movement of materials, goods, and personnel is key to the success of the state's port system. Transportation investments not only make individual ports more competitive, but also contribute to economic vibrancy generally, growing job opportunities, bringing resources to the state's coastal cities, and developing connections across regions.

## Ship Channels

Texas ship channels have a powerful impact on the Texas and U.S. economies and help transfer Texas's respected exports all over the world. As key features of the supply chain, these assets must be looked after to ensure that they meet future demands to continue economic success. An investment in ship channel improvements typically brings an immediate return-on-investment. As vessels have grown larger to enhance trade efficiency, there has been a need for deeper and wider channels to accommodate them to have access to the ports.

# TEXAS PORT SYSTEMS

**SEAPORT  
CONNECTIVITY**

**MARITIME  
INFRASTRUCTURE**

**SHIP  
CHANNELS**

# MARITIME INFRASTRUCTURE

The maritime infrastructure needs presented encompass a wide variety of projects or studies including waterway projects such as turning basins, connectivity projects such as internal roadway or railroad improvements, and port facilities projects such as bulkheads and storage facilities.

The maritime infrastructure projects presented in this plan include 82 projects, 78 capital projects and four studies, submitted by 17 ports whose total project cost is \$3.11 billion.

## Maritime Infrastructure Projects

Project Types	# of Projects	Total Cost
Docks, Berths, and Wharfs*	31	\$1.12 Billion
Terminals	10	\$816.85 Million
Roadway/Railroad/Runway Improvements	10	\$325.07 Million
Building/Facilities	6	\$305.39 Million
Yards	8	\$221.07 Million
Bulkheads	11	\$216.20 Million
Other	6	\$103.70 Million
<b>TOTAL</b>	<b>82</b>	<b>\$3.11 Billion</b>

*Costs provided by ports/navigation districts, \*Includes four studies*

*Construction progress on the Port Houston Barbours Cut Wharves; this project was funded in part by money allocated by the 88th Texas Legislature*

*Railyard near channel at Port of Port Arthur*

## SEAPORT CONNECTIVITY

The seaport connectivity needs include potential solutions to address safety issues, congestion, mobility deficiencies, or improvements between the interaction of vehicles, rail, and adjacent land use. Solutions targeting freight movement can provide regional benefits and benefits to general travel. Projects identified in this report were submitted by the ports and are developed at least to a conceptual level.

The seaport connectivity projects presented in this plan include 24 port-requested connectivity projects submitted by 10 ports and two projects submitted by one of the five coastal TxDOT Districts to address freight mobility at a regional scale. The total cost to implement these projects is estimated to be \$584.85 million.

### Seaport Connectivity Projects

Project Types	# of Projects	Total Cost
Roadway Improvements	16	\$448.11 Million
Bridge Replacements	2	\$68.15 Million
Entrance/Exit Gate	1	\$40.00 Million
Truck Staging and Queuing Areas	4	\$24.37 Million
Wayfinding and Accessibility	1	\$1.60 Million
Public Parking	1	\$1.50 Million
Pedestrian Improvements	1	\$1.12 Million
<b>TOTAL</b>	<b>26</b>	<b>\$584.85 Million</b>

*Costs provided by ports/navigation districts*

*East Ostos Road at the Port of Brownsville*

Shrimping boats at the Port of Palacios

## SHIP CHANNELS

Receiving federal authorization for ship channel deepening and widening requires that a feasibility study first be completed to demonstrate that there are no negative environmental impacts resulting from the project and that the project is of national economic interest. Beyond just channel deepening and widening projects, other ship channel needs can include non-federal projects like dock deepening to match the deeper channel, areas for ship queuing while waiting for berthing space at the port or major alongside channel infrastructure improvements, like jetty structure improvements at the entrance channel.

Ship channel improvement projects are investments that are costly and time sensitive. Delays in funding and implementing projects can lead to missed opportunities for attracting tenants, increases in overall construction costs, operational and safety issues with vessels, and loss of returns on the overall investment.

### Ship Channel Projects

Project Types	# of Projects	Total Cost
Channel Deepening and Widening	8	\$4.96 Billion
Dock or Harbor Improvements	2	\$340.00 Million
Entrance Channel Jetties	1	\$90.00 Million
Other Dredging Needs	2	\$61.20 Million
Feasibility Study	4	\$11.56 Million
<b>TOTAL</b>	<b>17</b>	<b>\$5.46 Billion</b>

*Costs provided by ports/navigation districts*

# PROJECT DEVELOPMENT PROCESS

## FEASIBILITY STUDY INITIATION

- Section 203 of Water Resources Development Act (WRDA) 1986 and amendments from recent WRDA issuances allow the non-federal sponsor to initiate the study through a Memorandum of Agreement (MOA)
- U.S. Army Corps of Engineers (USACE) funding and participation require allocations in their annual Work Plan budget for the specific study

## FEASIBILITY STUDY

- 3 YEARS

UP TO 10 YEARS
- Evaluates proposed solutions and alternatives
  - Identifies plan that maximizes National Economic Development (NED) benefits
  - Culminates with a USACE-approved signed Chief's Report by the Assistant Secretary of the Army (Civil Works)

# Ship Channel Improvement Revolving Fund

In 2017, the 85th Texas Legislature passed Senate Bill 28, establishing the Ship Channel Improvement Revolving Fund (SCIRF). This creates a revolving loan program to help finance the modernization of ship channels. In 2023, the 88th Legislative Session appropriated \$400 million to fund the SCIRF.

SCIRF-eligible projects must:

- Deepen or widen a ship channel
- Be authorized by Congress
- Meet any other standards set by the Texas Transportation Commission
- Maintenance dredging is not qualified per current statute

## Federal Ship Channel Appropriations

Ship channels that have been authorized by the federal government for improvement or where the federal government has assumed maintenance responsibilities are dredged under the U.S. Army Corps of Engineers Civil Works program. However, ports act as non-federal sponsors of the projects and are responsible for funding a portion of the construction and maintenance costs.

The ship channel improvement projects presented in this plan include seven federally authorized deepening projects, representing a \$2.54 billion federal share and \$1.92 billion

local share, for a total estimated first cost of \$4.46 billion. These federally authorized projects are eligible to use SCIRF funds. Loan funds will be utilized to cover construction costs and will be paid back into the fund over time. Additionally, this plan reflects four projects in the feasibility study phase for future Congressional authorization, and five non-federal projects, which are ineligible for SCIRF funding according to the current statute. The total cost of all ship channel needs is estimated to be \$5.46 billion.

Some federal funding has already been appropriated to date for federally authorized channel improvement projects and feasibility studies. Through 2024, federal appropriations for ship channel improvement projects in this plan total approximately \$1.23 billion.

### Federal Appropriations for Texas Ship Channel Projects Through 2024

Project Name	Amount Appropriated
Brazos Island Harbor Channel Improvement	\$68.00 Million
Corpus Christi Ship Channel Improvement	\$405.68 Million
Freeport Harbor Channel Improvement	\$207.72 Million
Galveston Harbor Channel Extension	\$10.78 Million
Houston Ship Channel Expansion	\$172.72 Million
Matagorda Ship Channel Improvement	\$1.81 Million
Sabine-Neches Waterway Channel Improvement	\$367.00 Million
<b>TOTAL</b>	<b>\$1.23 Billion</b>

#### CONGRESSIONAL PROJECT AUTHORIZATION

2 YEARS 10+ YEARS

- An individual project requires Congressional authorization for construction through a signed bill or WRDA
- WRDAs have been issued as frequently as biennially or as infrequently as once a decade

#### PROJECT FUNDING, DESIGN AND CONSTRUCTION

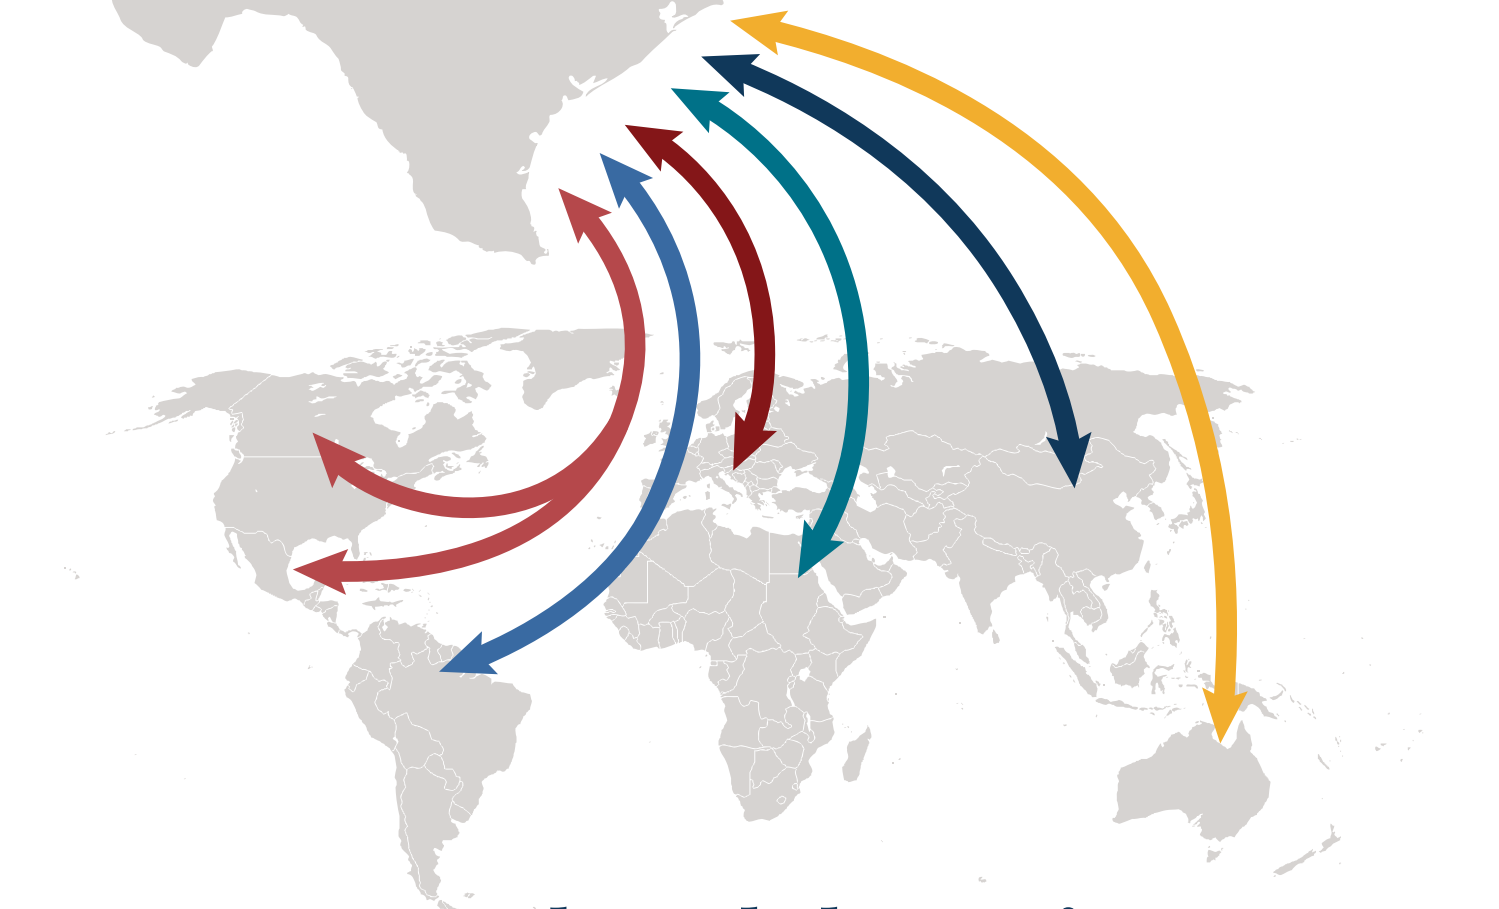

PROJECT DEPENDENT

- A Project Partnership Agreement (PPA) provides a legally binding agreement between the federal government and non-federal sponsor for construction
- Be authorized and have funding allocated by Congress

# TEXAS PORTS

## IMPACT THE GLOBAL ECONOMY

### Annual Trade by Region<sup>3</sup>:

Canada & Mexico	South & Central America	Europe	Africa	Asia	Australia & Oceania
<b>\$50.77 B</b>	<b>\$67.44 B</b>	<b>\$123.27 B</b>	<b>\$9.77 B</b>	<b>\$150.01 B</b>	<b>\$2.34 B</b>
Exports: \$36.16 B Imports: \$14.62 B	Exports: \$49.76 B Imports: \$17.67 B	Exports: \$87.85 B Imports: \$35.42 B	Exports: \$7.94 B Imports: \$1.83 B	Exports: \$87.89 B Imports: \$62.12 B	Exports: \$1.72 B Imports: \$0.62 B

**\$403.61 billion in trade value overall annually\***

\$271.32 billion in exports and \$132.28 billion in imports

*\*Values in dollars for annual combined waterborne import and export trade value for Texas in 2023.*

Other

*The Port of Brownsville is the only deep water seaport directly on the U.S.-Mexico border, servicing a wide range of industries across North America. It is the largest land-owning public port authority in the county with more than 40,000 acres. The port transships more steel into Mexico than any other U.S. port and is a major gateway for shipping refined petroleum products, green energy components, and aggregates, among other commodities.*

## Port Priorities & Opportunities

The Port of Brownsville is deepening its ship channel from 42 to 52 feet through the Brazos Island Harbor Channel Improvement Project, which has received congressional authorization and \$68 million in funding from the Infrastructure Investment and Jobs Act (IIJA). Once completed, the channel will be one of the deepest in the Gulf of Mexico.

The Port of Brownsville is seeing major expansion projects come to fruition: the Valley Crossing and Rio Grande pipelines; the South Port Connector Road, which received a \$1.53 million TxDOT grant and opened in March 2022; construction of a sixth oil cargo dock; rehabilitation of its grain elevator, liquid cargo dock, and bulk cargo dock; rehabilitation of internal roads and utility infrastructure; and expansion of patios and laydown areas to accommodate project cargo and wind energy components.

## ECONOMIC IMPACT

FISCAL YEAR 2023

Annual Truck Traffic

**458,800**

Annual Rail Cars

**85,216**

Direct Jobs

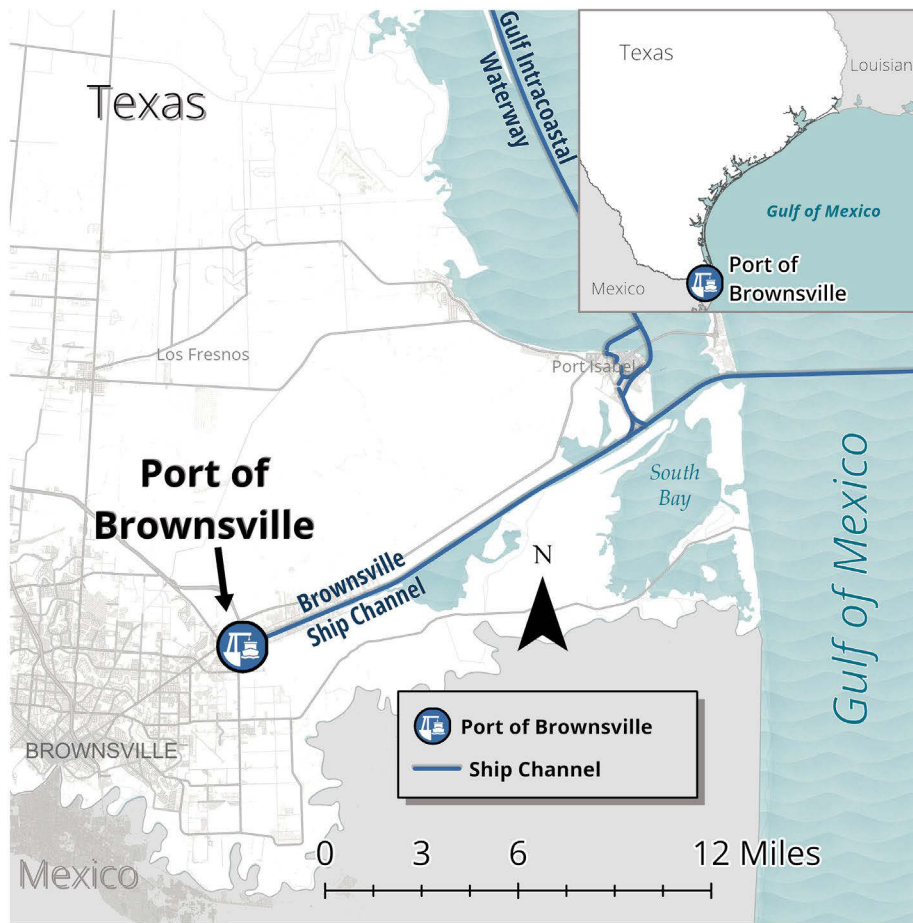

**6,000+**

## Port Projects

Project Name	Project Type	Total Project Cost
Bulk Cargo Dock Engineering Design and Study	Maritime Infrastructure	\$1.5 Million
Liquid Cargo Dock Engineering Design and Study	Maritime Infrastructure	\$1.5 Million
Mobile Harbor Crane	Maritime Infrastructure	\$6.0 Million
Oil Dock No. 3 Construction	Maritime Infrastructure	\$35.0 Million
Oil Dock No. 5 Upgrade	Maritime Infrastructure	\$1.5 Million
Rail Access Preservation Program	Maritime Infrastructure	\$16.8 Million
Cargo Dock 15 Engineering Design and Study	Maritime Infrastructure	\$1.5 Million
Cargo Dock 16 Engineering Design and Study	Maritime Infrastructure	\$1.5 Million
East Ostos Road Paving Improvement Project	Maritime Infrastructure	\$10.0 Million
Brazos Island Harbor Channel Improvement Project	Ship Channel	\$141.6 Million
Fishing Harbor Improvement Project	Ship Channel	\$10.0 Million

*Costs provided by port/navigation district*

## PORT FACILITIES

### DOCKS, WHARVES & STORAGE

- 6 liquid cargo docks
- 12 general cargo docks
- 1 bulk cargo dock/grain carrier
- 1 million+ sf covered storage
- 3 million+ sf open storage

### BROWNSVILLE FISHING HARBOR

- Three 14-ft fishing basins
- 10,000 linear ft of docks
- Houses up to 500 fishing boats

## SHIP CHANNEL

**Ship Channel Name:** Brownsville Ship Channel (Brazos Island Harbor Channel)

**Current Depth:** 42 ft

**Authorized Depth:** 52 ft

## INTERMODALITY

### ROAD

- Highway connections to I-69 E, I-69C, I-2, SH 550, SH 48, and SH 4. The port's overweight corridor offers overweight trucks unimpeded access to commercial international bridges to Mexico. There are 10 million consumers within a 3-hour drive of the port.

### RAIL

- Brownsville & Rio Grande International Railway offers on-port rail services and connection to Class 1 rail providers BNSF, KSCM, and Union Pacific

### BARGE

- Direct access to GIWW (M-10, M-69)

### AIR

- Air freight service at Brownsville/South Padre Island International Airport

### PIPELINE

- Access to U.S. and Mexico terminals

## CARGO CONNECTIONS

Only deepwater seaport on the U.S. & Mexico border

## Top Trading Partner

Mexico 90% of total commodities arriving at the Port of Brownsville ship to Mexico

## Top Commodities

### EXPORTS

- Refined Petroleum Products
- Steel & Other Metals
- Iron Ores & Minerals
- Aggregates & Cement
- Wind Energy Components

### IMPORTS

- Refined Petroleum Products
- Steel & Other Metals
- Iron Ores & Minerals
- Aggregates & Cement
- Wind Energy Components
