

Grouts for Post-Tensioning

Material Producer List
Materials and Tests Division

Fibers for Class A and Class B Concrete Applications

The following post-tensioning grout products have been pre-qualified according to DMS-4670, "Grouts for Post-Tensioning."

The Department reserves the right to conduct random sampling and testing of materials from qualified manufacturers of thixotropic grouts for post-tensioning. Department representatives may sample material from the manufacturing plant, warehouse, or the project site. The Materials & Tests Division reserves the right to test samples to verify compliance with DMS-4670.

For more information, contact the Materials & Tests Division's Rigid Pavements and Concrete Materials Section at (512) 484-6484.

Table 1: Post-Tensioning Grout Products
