Material Producers List

Traffic Safety Division – Traffic Management Section

Traffic Signals

The following materials are pre-qualified for use with the Department's *Standard Specifications for Construction and Maintenance of Highways, Streets, and Bridges* and are associated with Department Material Specifications (DMS) referenced in Standard Specification Items 680, 681, 682, 685, and 690, which pertain to the installation of highway traffic signals.

MATERIAL PRODUCER LIST (MPL) FOR DMS-11120, "VEHICLE SIGNAL HEADS"

The following products are pre-qualified for use on projects where vehicle signal heads are furnished or installed as required by the item descriptive code. Signal heads are subject to testing. No substitutions of products will be allowed when pre-qualified products are shown. Where miscellaneous parts, brackets, hardware, nuts, bolts, washers, or other incidentals are necessary and are not shown as pre-qualified products, the contractor will furnish products that meet the requirements of the plans and specifications.

Traffic Signals (SS)

The following materials are pre-qualified for use with the Department's Standards Specifications for Construction and Maintenance of Highways, Streets, and Bridges and are associated with TO Specifications, which pertain to the installation of highway traffic signals. This is unique to statewide special specifications. District wide and one-time use (OTU) are not represented in this list.

The TO specs were traditionally created as "Traffic Operations" special specifications that were used as purchasing specifications. These TO specs were part of traffic item descriptions for materials that are stocked at the TxDOT warehouses that supply districts maintenance items to maintain current traffic signal equipment along TxDOT roadways. These TO specs were also referenced in other contract procurements where these items were procured (i.e. TxSmartBuy)
