

FACT SHEET

Why Improvements Are Needed

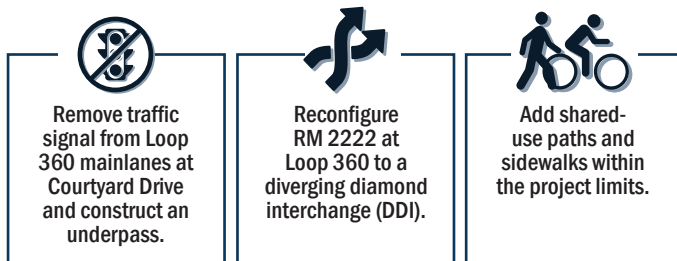

Loop 360 is a major north/south transportation corridor for the capital area region, acting as a thoroughfare and commuter route for residents in west Austin as well as those passing through. The 14-mile corridor runs from US 183 on the north end to US 290/SH 71 on the south end.

Increased traffic congestion at Courtyard Drive, RM 2222 and elsewhere along Loop 360 has resulted in a lack of mobility and increased safety concerns. Unless something is done, traffic conditions will worsen as our population grows.

Project Overview

The purpose of the project is to improve mobility and safety at the Loop 360 intersections of Courtyard Drive and RM 2222.

Proposed solutions for the intersections include:

Details and Timeline

The project was environmentally cleared in spring 2021 and is now in the utility relocation phase.

Construction is anticipated to begin in 2026.

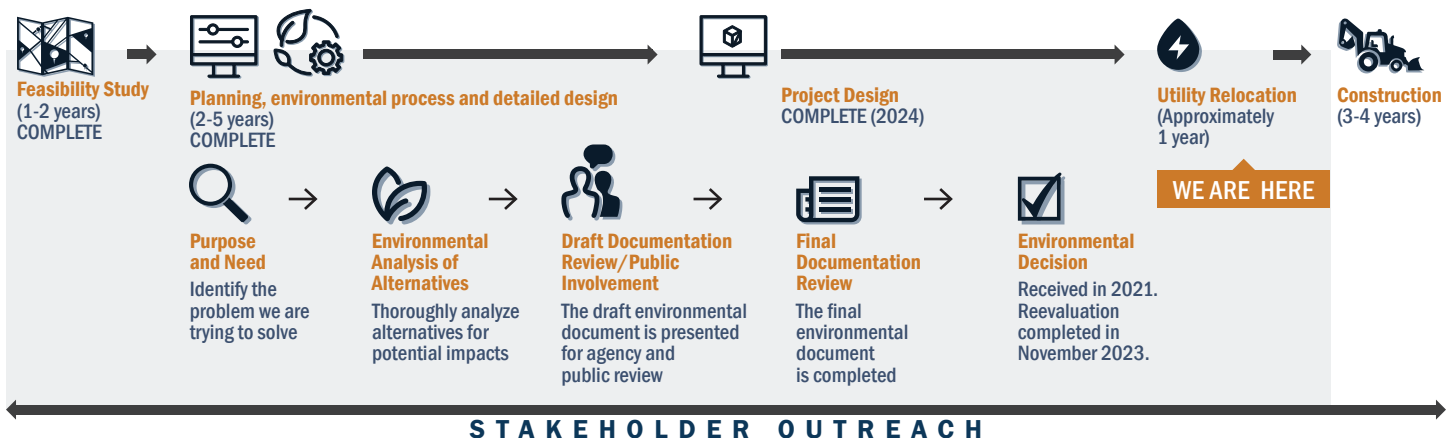

West Cliffs Stabilization Project

The purpose of this project is to stabilize the limestone cliffs. Excavation will remove 155,000 cubic yards prior to the Courtyard/RM 2222 start date.

Construction is anticipated to begin in fall 2025 to accommodate migratory birds.
