

Draft

Project Coordination Plan

Loop 9 – Segment A, Dallas District

From US 67 to IH 35E

CSJs: 2964-10-006 & 0261-01-041

Dallas and Ellis Counties, Texas

June 2019

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

REVISION HISTORY

The following table shows the revision history for this document.

Effective Date Month Year	Reason for and Description of Change
June 2, 2019	Appendices update. Date changes in document.

1.0 PURPOSE OF THE COORDINATION PLAN

To provide for more efficient environmental reviews for project decision making, Section 6002 of Public Law 109-59, “Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users,” (SAFETEA-LU), enacted on August 10, 2005, implemented the development of a Coordination Plan for all projects for which an environmental impact statement (EIS) is prepared under the National Environmental Policy Act (NEPA) of 1969.

On December 16, 2014, the Texas Department of Transportation (TxDOT) assumed responsibility from the Federal Highway Administration (FHWA) for reviewing and approving certain assigned NEPA environmental documents including the Loop 9 Draft and Final EIS. The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding (MOU) dated December 16, 2014, and executed by FHWA and TxDOT.

In accordance with 23 U.S. Code § 139(g), TxDOT (as lead agency) has prepared this Coordination Plan (“Plan”) for the proposed Loop 9 project in Dallas and Ellis Counties to reflect the completed coordination and planning by TxDOT, and to outline TxDOT’s current and future responsibilities for providing opportunities for input from the public and other agencies, in accordance with applicable laws, regulations, and policies.

Full public and agency participation in and comment on the environmental review process for the proposed project is invaluable in achieving meaningful input. In this spirit, this Plan is intended to promote early and continuous involvement from stakeholders, agencies, and the public. The Plan describes the proposed project, the roles of the agencies and the public, the project purpose and need, schedule, and the proposed process for coordination and communication.

This Plan is a flexible and fluid document and will be available for public review at public meetings, including scoping meetings, and hearings held throughout the NEPA evaluation process, and upon request at the TxDOT Dallas District office. The Plan is developed early in the environmental and planning process and will be adjusted and updated as input is received from cooperating and participating agencies and as the complexity of potential environmental issues is identified.

2.0 PROJECT DESCRIPTION

2.1 Project Location

The proposed Loop 9 project includes the construction of a six-lane new location frontage road system between United States 67 (US 67) and Interstate 35 East (IH 35E) through Dallas and Ellis counties, Texas, and is approximately 9.4-miles in length. The proposed Loop 9 roadway system would pass through the communities of Cedar Hill, Midlothian, Ovilla, Glenn Heights, and Red Oak. The proposed project right of way (ROW) would include a median that would accommodate the future construction of an ultimate access-controlled mainlane facility. Construction of the ultimate access-controlled mainlane facility would be based on projected traffic and funding and would require additional environmental analysis prior to construction.

The new location Loop 9 frontage road system would include an eastbound and westbound frontage road facility, each consisting of three 12-foot lanes, an 8-foot inside shoulder, and an 8-foot outside shoulder for bicycle accommodations within the rural section of the proposed roadway. The proposed project ROW would include a median (358 to 512-feet wide) that would accommodate the future construction of an ultimate access-controlled mainlane facility.

The proposed project would also construct intersections at eight (8) major cross roads as follows: Tar Road, future Clark Road, S. Joe Wilson Road, S. Duncanville Road, S. Cockrell Hill Road, S. Westmoreland Road, S. Hampton Road, and Uhl Road. The proposed project would also construct a grade separation at US 67 (construction of this grade separation would be phased); a grade separation at the BNSF Railroad; and would tie into the grade separation at IH 35E (the grade separation at IH 35E would be constructed prior to this project under Section B of the Loop 9 Transportation Study, a segment of independent utility with limits from IH 35E to IH 45).

The proposed Loop 9 project, from US 67 to IH 35E, would likely be constructed in two phases based on traffic needs and project funding. A logical sequence for staging the various elements for construction of the new location frontage road system could be as follows:

- Phase 1 would construct a single two-lane, two-way frontage road, and would also acquire the proposed ROW to accommodate the frontage roads and the future ultimate access-controlled mainlane facility.
- As traffic warrants and funding becomes available, Phase 2 would involve the construction of the three-lane frontage road in each direction, which would include the conversion of the two-way frontage road built in Phase 1 to a one-way operation, and the construction of grade separations at specific high-volume intersections.
- Phase 3 would involve the construction of the ultimate access-controlled mainlane facility in both directions. Construction of the ultimate access-controlled mainlane

facility would be based on projected traffic and funding and would require additional environmental analysis prior to construction.

2.2 Purpose and Need

The project is needed to address transportation demand resulting from population and economic growth in the region, system linkages, and connectivity among the existing roadway facilities. Loop 9 would provide a direct east/west link from IH 35E to US 67 and would serve the residents in the area. Additionally, transportation demand exceeds the current and future capacity of the existing transportation infrastructure. The purpose of the proposed project is to develop a facility that would help address the regional growth, transportation demand and system linkage within the study area by increasing capacity, mobility and accessibility; efficiently link suburban communities and major roadways; and accommodate population growth.

2.3 Project History

Feasibility Study/Major Investment Study (MIS): 1995 – 1997

In an effort to address future regional transportation needs, a South Outer Loop (Loop 9) Feasibility Study/Major Investment Study (MIS) was initiated. The objective of the study was to identify a “Locally Preferred Alignment” that could provide sufficient detail to jurisdictions and the public for them to understand what would ultimately be constructed. Based on public involvement, alternatives developed to avoid and minimize impacts and the results of the alternatives analysis, a “Technically Preferred Alignment” was developed. Many of the cities and agencies involved in the study adopted this alignment; however, a couple of cities requested additional alternatives be considered, therefore study efforts were temporarily suspended before a Locally Preferred Alignment could be identified.

Feasibility Study/MIS: 2002 – 2006

In May 2002, the Loop 9 Feasibility Study was reinitiated with a directive to identify viable corridor alignments and modal alternatives for the study area. From 2002 to 2006, alignment and environmental constraints, coupled with the growth and desires of surrounding communities, resulted in further alignment revisions to avoid and minimize impacts.

By 2006, a possible connection between the Loop 9 project and other statewide transportation improvements required Loop 9 stakeholders to consider substantial design modifications so that the project would conform to TxDOT highest-speed roadway design criteria. In 2006, TxDOT became the lead agency for advancing the Loop 9 Southeast project through the NEPA process.

Draft Environmental Impact Statement: 2006-2011

Between 2006 and 2011, TxDOT prepared the Loop 9 Southeast Preliminary Draft Environmental Impact Statement (DEIS) and associated concept designs. The proposed project presented a six-lane new location, controlled access tollway with intermittent one-way access roads between IH 20 and US 287, a distance of approximately 44 miles. The proposed ROW varied from 450 to 600 feet depending on the interchange configuration and location. The Loop 9 Southeast project was included in Mobility 2030 – 2009 Amendment as a toll road with a total project cost estimate of \$5.76 billion.

While the Loop 9 Southeast DEIS was under review in 2009, TxDOT published the Innovative Connectivity in Texas/Vision 2009 which defined a new vision for the TxDOT corridor development process and resulted in the retirement of the Trans-Texas Corridor (TTC) concept. However, in 2010 the Federal Highway Administration (FHWA) issued a Record of Decision (ROD) for the Tier One Environmental Impact Statement (EIS) for the TTC-35 project, which advanced No Action as the selected alternative. In late 2011, NCTCOG concluded the Regional Outer Loop Corridor Feasibility Study. This study determined that a continuous, circumferential outer loop was not warranted based on the forecasted year 2035 travel demand and the lack of statewide connections.

The changes in TxDOT policy, the No Action recommendation on the TTC-35 EIS, funding constraints for transportation projects, and the current economic climate impacted the assumptions and development of the Regional Transportation Council (RTC) approved Mobility 2035: The Metropolitan Transportation Plan for North Central Texas (Mobility 2035). As a result of these changes, work on the Preliminary Loop 9 Southeast DEIS was suspended until a determination on how the project should proceed was made. The DEIS was put on hold in November 2011 and was officially concluded in January 2012. The Notice of Intent (NOI) was rescinded in the Federal Register on March 20, 2013 and in the Texas Register on July 23, 2013.

Several planning factors/considerations used in the development of Mobility 2035 influenced the change in direction for the Loop 9 Southeast project. These factors include:

- Changes in the travel model and Metropolitan Planning Area boundary,
- Changes to the transportation network (e.g., the deferral of over \$45 billion in transportation projects due to limited transportation funding),
- Revised regional demographics which forecasted more focused growth and development in Dallas and Tarrant Counties in comparison to previous forecasts,
- No Action on the TTC-35 EIS, and
- Removal of the Regional Outer Loop concept and its connectivity to Loop 9 Southeast.

Additionally, traffic studies conducted by NCTCOG indicated that the portion of the Loop 9 Southeast project between US 287 and US 67 would not be warranted. As a result, the Loop 9 Southeast project western terminus was changed to US 67.

These factors contributed to a substantial decrease in the projected travel demand for the proposed project by 2035, the horizon year of the MTP. The lower traffic levels in the project corridor would not warrant full implementation of the Loop 9 Southeast project by 2035 as proposed in the DEIS. As a result, TxDOT, NCTCOG, and local leaders recommended a Corridor/Feasibility Study to determine a new direction for the project corridor. To the extent possible, the studies, data, and public/agency input gathered for the DEIS has been used as a basis for the new project.

Loop 9 Southeast Corridor/Feasibility Study: 2012-2014

In September 2012, TxDOT began the Loop 9 Southeast Corridor/Feasibility Study for the revised Loop 9 Southeast project concept from US 67 to IH 20 within Dallas, Ellis, and Kaufman Counties. The purpose of this Corridor/Feasibility Study was to guide future infrastructure investment to advance the proposed Loop 9 Southeast project. This Corridor/Feasibility Study also follows the Planning and Environment Linkages (PEL) approach to help evaluate environmental issues early in the planning process. The Loop 9 Southeast Corridor/Feasibility Study incorporated more flexible design standards, a reduced right of way (ROW), and a shorter project length, and minimized the overall impacts when compared to past studies. These changes altered the project to be more closely aligned with the transportation and development needs of the southeast Dallas region.

The ultimate goal of the Corridor/Feasibility Study was to develop a program of independent projects to advance into the NEPA process based on mobility needs, engineering and environmental data, and coordination with the NCTCOG, local officials, the public, and resource agencies. As a result, it identified the US 67 to IH 35E independent segment represented in this Coordination Plan. The NOI signifies that TxDOT will start the work preparing the EIS. The EIS may use and rely on the planning studies already prepared.

2.4 Projected Cost of Project

The total estimated cost of Phase I of the proposed Loop 9 facility is \$315,000,000.

3.0 AGENCY ROLES AND RESPONSIBILITIES

Early identification of the roles and responsibilities of the various agencies involved in the NEPA process will facilitate the timely review and resolution of issues. The environmental coordination process will involve the following entities:

- **Lead Agency** – TxDOT. TxDOT will serve as the lead agency and will be responsible for facilitating the expeditious resolution of the environmental review process and ensuring that the EIS is completed under the requirements of NEPA and SAFETEA-LU. TxDOT will ensure compliance with all design and mitigation commitments in the Record of Decision, and that the document is appropriately supplemented if project changes become necessary.
- **Project Sponsor** – TxDOT. TxDOT is the agency, or entity, that seeks approval from the U.S. Department of Transportation (DOT) for a highway or transit project.
- **Cooperating Agencies** - Agencies with jurisdiction by law or special expertise are invited to serve as cooperating agencies in the preparation and review of the EIS. These agencies will have a higher degree of authority, responsibility, and involvement in the environmental review process than participating agencies. Cooperating agencies must approve schedule changes if affected by the proposed change. **Appendix A** includes the copies of the invitation letters inviting the cooperating agencies to take part in the study.
- **Participating Agencies** – Agencies involved with coordination and review of the project include the federal and non-federal agencies listed in Table 1. The agencies will participate in meetings with the project team during the study and will be invited to attend public meetings. If a participating agency is not able to attend scheduled meetings, the project team will offer the agency an alternative opportunity to provide input. **Appendix A** contains copies of the invitation letters and a copy of the mailing list for all agencies and non-elected municipal representatives who received a letter inviting participation in the Loop 9 Transportation Study.

Table 1 summarizes the roles and responsibilities of participating and cooperating agencies identified to date.

TABLE 1. COOPERATING AND PARTICIPATING AGENCIES

Agency	Roles		Response	Responsibility
	Cooperating	Participating		
Federal Agencies				
U.S. Army Corps of Engineers	X	X		Section 404 of CWA permit jurisdiction Section 10 of the General Bridge Act of 1946 permit jurisdiction Section 408 of the Rivers and Harbors Act permit jurisdiction.
U.S. Department of the Interior - USFWS	X	X		Section 7 of Endangered Species Act permit jurisdiction Ensure compliance with the Migratory Bird Treaty Act Ensure compliance with the Bald and Golden Eagle Protection Act Ensure compliance with the U.S. Fish and Wildlife Coordination Act.
Environmental Protection Agency	X	X		Ensure compliance with Section 309 of Clean Air Act Ensure compliance with hazardous materials regulations.
Bureau of the Census		X		Provide access to demographic data relevant to the project study area.
Department of Housing and Urban Development		X		Ensure compliance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.
Federal Aviation Administration		X		Determination regarding navigable air space per 14 CFR Part 77.
Federal Railroad Administration		X		Identification and resolution of any issues of concern regarding railroads in the project area.
Federal Transit Administration		X		Provide guidance related to public transit systems.
U.S. Coast Guard		X		Responsible for ensuring compliance with Section 9 of the Rivers and Harbors Act and the General Bridge Act related to the construction of structures over navigable waters of the U.S.
U.S. Department of Homeland Security – FEMA		X		Review matters related to floodplain management including the National Flood Insurance Program.

Agency	Roles		Response	Responsibility
	Cooperating	Participating		
U.S. Department of Agriculture - NRCS		X		Ensure compliance with the Farmland Protection Policy Act.
State Agencies				
Public Utility Commission of Texas		X		Identification and resolution of any issues of concern regarding public electric, telecommunication, and water and sewer utilities in the project area.
Texas Commission on Environmental Quality		X		Ensure compliance with Section 401 of the Clean Water Act. Ensure compliance with state surface water quality standards. Evaluate Texas Pollutant Discharge Elimination System permits.
Texas Department of Housing and Community Affairs		X		Review project impacts and provide information related to affordable housing for impacted homeowners.
Texas Historical Commission		X		Determine Section 106 compliance and eligibility, Ensure compliance with the Texas Antiquities Code. Ensure compliance with Section 4(f) of the Department of Transportation Act of 1966. Ensure compliance with the TxDOT THC/SHPO programmatic agreement.
Texas Parks and Wildlife Department		X		Review project effects under Memorandum of Understanding and Memorandum of Agreement between TxDOT and TPWD.
Texas State Soil & Water Conservation Board		X		Identification and resolution of any issues of concern regarding the project's potential environmental effects on soil and water conservation.
Texas Railroad Commission		X		Identification and resolution of any issues of concern regarding railroads in the project area.
Texas General Land Office		X		Identification and resolution of any issues of concern regarding lands regulated by the GLO.
Governor's Office of Planning and Budget		X		Identification and resolution of any State planned projects associated with the proposed project area.
Local Agencies				

Agency	Roles		Response	Responsibility
	Cooperating	Participating		
City of Ovilla		X		Identification and resolution of project effects to areas within the city limits and area of extraterritorial jurisdiction.
City of Glenn Heights		X		Identification and resolution of project effects to areas within the city limits and area of extraterritorial jurisdiction.
City of Red Oak		X		Identification and resolution of project effects to areas within the city limits and area of extraterritorial jurisdiction.
City of Cedar Hill		X		Identification and resolution of project effects to areas within the city limits and area of extraterritorial jurisdiction.
City of Midlothian		X		Identification and resolution of project effects to areas within the city limits and area of extraterritorial jurisdiction.
Dallas Area Rapid Transit		X		Project area stakeholder. Cooperate with the project team to identify potential connections between the proposed project and transit functions.
Dallas County Trail and Preserve Program		X		Identification and resolution of any issues of concern regarding the project's potential environmental effects on county parks/open space.
Dallas County		X		Identification and resolution of any issues of concern regarding the project's potential environmental effects within the county's jurisdiction.
Ellis County		X		Identification and resolution of any issues of concern regarding the project's potential environmental effects within the county's jurisdiction.
North Central Texas Council of Governments		X		Provide regional data related to funding, air quality conformity and traffic.

4.0 PROJECT COORDINATION

4.1 Agency Coordination

TxDOT will facilitate the agency coordination process through the scheduling of an agency scoping meeting to ensure meaningful participation during the project development process. **Table 2** identifies key agency coordination points throughout the project development and NEPA process. This list does not preclude additional coordination opportunities with these agencies during the EIS process.

TABLE 2. AGENCY COORDINATION

Agency Coordination Activity	Timeframe
Agency Meeting Introduce the project, project team and tentative project schedule.	February 6, 2019
Publication of NOI*	Spring 2019
Agency Scoping Meeting Including participating and cooperating agencies to gather input on draft Coordination Plan, Purpose and Need, review of preliminary of alternatives, and identify potential resource issues or constraints.	Summer 2019
Notice of Availability and DEIS Circulation	Summer 2020
Public Hearing	Summer 2020
Notice of Availability of FEIS/Record of Decision	Fall 2021
FEIS/ROD	Fall 2021
*A copy of the published NOI is included as Appendix B	

4.2 Public Involvement and Stakeholder Outreach

Given the local and regional importance of the Loop 9 project, the planned public involvement activities include a comprehensive public involvement program designed to proactively engage and encourage participation of all interested stakeholders. A copy of the Draft Public Involvement Plan (PIP) is included in **Appendix C**. The Draft PIP will be periodically updated as a result of ongoing public involvement and input. Additionally, issues specific to this project may require adjustments to the PIP to address communication obstacles encountered during public outreach efforts. Objectives to achieve a successful public involvement program include:

- Fulfill NEPA and TxDOT requirements for public involvement;
- Demonstrate to the public that their input is being incorporated into the project development process;
- Establish and maintain widespread community involvement in the study process by providing the media and public with current communications;

- Provide frequent opportunities for the public, including the business community, environmental interest groups, and neighborhood organizations to provide input;
- Be inclusive of individuals in the study area who are minorities and those who have limited English proficiency, low incomes, and special communication or physical requirements. Presentations, meeting notices, and communication materials will accommodate persons with special communication needs by providing translations. Public meeting and workshop handouts will be provided in Spanish or other appropriate languages as determined through community analysis. All meetings and workshops will be held in locations accessible to persons with disabilities;
- Ensure that all persons who wish to provide input have the opportunity and that all ideas are given fair consideration;
- Emphasize the public involvement program as a learning process for both the public and project team members;
- Use visually informative slides, boards, postcards, handouts, and computer-generated presentations to help communicate technical concepts and retain public interest; and
- Consider and respond to public input received during the study process.

As discussed in Section 2.3 – Project History, the project team has conducted robust public involvement and stakeholder outreach throughout the life of the Loop 9 Transportation Study. This will continue as the project moves forward with the latest alternatives. A copy of the PIP is included in **Appendix C**.

Table 3 identifies key public involvement and stakeholder outreach efforts undertaken through the project development and NEPA process.

TABLE 3. PUBLIC INVOLVEMENT/STAKEHOLDER OUTREACH

Public Involvement/Stakeholder Outreach Point	Timeframe
Project Websites: <i>The following websites will provide project details, contact information, links to meetings and opportunities to provide input.</i> • www.KeepItMovingDallas.com • www.txdot.gov	2019-2021
Project Fact Sheet: <i>Fact sheets will inform the public about the project, the status of the project development process and other pertinent information such as comment opportunities. This fact sheet will be updated as the project progresses.</i>	2019-2021
Project email address: <i>The consultant team has set up (with the assistance of the TxDOT Dallas District PIO) a project email account to streamline communications with the public and stakeholders: Loop9@eprusa.net</i>	2019-2021

Meeting and Project Flyers: <i>Meeting notices will be distributed to community gathering places such as libraries, civic locations, restaurants, convenience stores, post offices, and businesses to inform citizens of the project status and any upcoming meetings or input opportunities. Flyers are translated reflective of community demographics.</i>	2019-2021
Social Media: <i>As the consultant team reaches major project milestones, they will work with the TxDOT Dallas District PIO to create content for social media posts.</i>	2019-2021
MetroQuest Surveys: <i>As part of the survey efforts conducted for the open houses/public meetings, the consultant team will gather input from the community utilizing the MetroQuest software. MetroQuest, a public-involvement software, is a graphical and on-line survey format intended to provide a user-friendly experience.</i>	2019-2021
Public Meetings – Open House Format <i>The Public Scoping Meeting will include presentation of the project history, draft purpose and need, draft project Coordination Plan, and preliminary alternatives for public consideration and comment.</i> <i>A subsequent Public Meeting will include presentation of refined alternatives, alternatives analysis s and environmental constraints for public consideration and comment.</i>	Summer 2019 Winter 2019
Public Hearing <i>A Public Hearing will be conducted after approval of the DEIS in order to present the recommended preferred alternative.</i>	Anticipated Summer 2020

5.0 PROJECT MILESTONES/SCHEDULE

5.1 Project Milestones

Major milestones and general timeframes are identified in **Table 4**. The schedule is reflective of these milestones.

TABLE 4. MAJOR PROJECT MILESTONES

Milestone	Timeframe
Initiation of EIS process	August 2018
Draft Purpose and Need Traffic Corridor Analysis	Spring-Summer 2019
Publish NOI in Federal and Texas Register	Spring 2019
Develop preliminary universe of alternatives for Draft EIS and identify preliminary corridors	2018-2019

Public Scoping Meeting	July 2019
Evaluate and Refine Alternatives	Spring-Summer 2019
Public Meetings (non-Scoping Meetings)	2019-2020
Preparation of Technical Reports	Spring-Fall 2019
DEIS preparation and identification of recommended alternative and potential environmental impacts	Winter 2019-Summer 2020
DEIS Circulation	Summer 2020
Public Hearing and presentation of Preferred Alternative	Summer 2020
FEIS preparation	Fall 2020-Summer 2021
Final decision on EIS and request for issuance of Record of Decision	Fall 2021

5.2 Project Development Process

- **Notice of Intent** – An NOI to prepare an EIS was published in the Federal Register in May 2019.
- **Development of Purpose and Need** – The project team coordinated with TxDOT to develop the purpose and need of the proposed project. Input from the public will also be solicited during the public scoping meetings.
- **Public Scoping Meeting** – The purpose of the public scoping meeting will be to solicit public input on the Loop 9 project. A variety of data will be presented to the public, including project information sheets, the purpose and need, the draft Project Coordination Plan, and an outline of the environmental process. Comment forms will allow the public to provide their comments during the meeting or to be sent in after the meeting via letters and email.
- **Agency Scoping Meeting** – The project team will solicit input from the cooperating and participating agencies to develop the methods to be used and the level of detail required in the analysis of the alternatives. The agencies will also have the opportunity to review the purpose and need and the draft Project Coordination Plan.
- **Analysis of Alternatives** – Evaluation criteria will be established based upon the purpose and need of the Loop 9 project, guidance from NEPA, and public and agency input. Impacts from the identified alternatives will be evaluated and compared at an equal level of detail, leading to the final alternatives identified for evaluation in the DEIS.
- **Public Meeting**– If warranted, a public meeting will be held in an open house format in order to present the most recent development in the alternatives analysis.
- **Preparation of a DEIS** – A printed report for public review and comment documenting the need for the project, describing the alternatives analysis process, analyzing likely impacts from each alternative, and describing steps to avoid impacts or minimize harm to the environment will be prepared by TxDOT and will be circulated prior to a public hearing. The DEIS will identify a Preferred Alternative.

- **Public and Agency Review of the DEIS** – The review time for the DEIS is no less than 45 days and no more than 60 days. The DEIS will be available for review online, at the TxDOT Dallas District office, and at other locations.
- **Public Hearing for Public Comments on the DEIS** – A Public Hearing will be held to present the results of the preliminary engineering and environmental analysis studies. The Preferred Alternative will be presented. Verbal and written public comments will be solicited. The Public Hearing will be held at least 30 days after the DEIS is available for public and agency review. The comment period will end no sooner than 45 days after the public review begins.
- **Identification of the Preferred Alternative and Level of Design Detail** – The Preferred Alternative presented at the Public Hearing will be developed to a higher level of detail to facilitate the development of mitigation measures or to facilitate concurrent compliance with other applicable environmental laws.
- **Preparation of a Final Environmental Impact Statement** – A FEIS will document the Selected Alternative and will provide a response to comments made on the DEIS.
- **Combined FEIS/Record of Decision (ROD)** – TxDOT plans to prepare a combined FEIS/ROD for the project as required by section 1319(b) of the Moving Ahead for Progress in the 21st Century Act (MAP-21). The ROD will document TxDOT's decision and will commit to mitigation of anticipated impacts. If the FEIS makes substantial changes to the proposed action that are relevant to environmental or safety concerns, or if there are significant new circumstances or information relevant to environmental concerns that bear on the proposed action or its possible impacts, TxDOT will consider separating the FEIS and ROD and providing additional time for public comment.
- **Completion of Permits, Licenses, or Approvals** – Applications for permits, licenses, and/or approvals required to authorize the proposed project will be prepared and coordinated as impacts from the preferred project alternative are identified and quantified. Issuance of any required permits/licenses/approvals will be necessary prior to the initiation of construction activities.

5.3 Project Schedule

As the lead agency, TxDOT has developed a detailed project schedule for completion of the Loop 9 EIS (**Appendix D**). During schedule development, the following factors were taken into consideration:

- The responsibilities of the participating agencies under applicable laws;
- The resources available to the cooperating agencies;
- The overall size and complexity of the project;
- The overall schedule for and cost of the project; and,

- The sensitivity of the natural and historic resources that could be affected by the project.

Potential issues that may affect the schedule include the size and complexity of the project, community concerns, impacts to cultural resources (such as archeological sites and historic structures), and impacts to natural resources (such as wetlands and threatened and endangered species habitat). The schedule may be extended pending unforeseen circumstances, but may only be shortened with the concurrence of affected cooperating agencies. The updated schedule reflecting major project milestones will be available at public and agency coordination meetings and on the TxDOT website.

Ms. Jennifer Walker
Chief, Evaluation Branch Regulatory Division
U.S. Army Corps of Engineers
819 Taylor Street
Fort Worth, TX 76102

Re: Loop 9, Segment A: US 67 to IH 35E

Dear Ms. Walker,

In 2009, the Texas Department of Transportation (TxDOT) and Federal Highway Administration (FHWA) initiated the Loop 9 Southeast Draft Environmental Impact Statement (DEIS) from Interstate Highway (IH) 20 to United States (US) 287. Prior to completing this study, in 2012, TxDOT began the Loop 9 Southeast Corridor/Feasibility Study of a revised Loop 9 concept from US 67 to IH 20. The intent of this study was to develop a program of shorter, independent projects to advance into the NEPA process based on mobility needs, engineering and environmental data, and coordination with local and resource agencies. As a result of this study, the subject project was developed: Loop 9, Segment A from US 67 to IH 35 East (E) (Project Vicinity Map included). In the Spring of 2019, TxDOT intends to publish a Notice of Intent which signifies that TxDOT will start the work preparing the EIS for Loop 9, Segment A. The EIS may use and rely on the planning studies previously prepared.

Your agency has been identified as an agency that may have interest in the proposed project due to the potential impacts of the proposed Loop 9, Segment A project. With this letter, we extend your agency an invitation to become a Participating Agency with TxDOT in the development of the *DEIS* and *FEIS* for the subject project. This designation does not imply that your agency either supports the proposed project or has any special expertise with respect to evaluation of the project. Participating agencies are responsible to identify, as early as practicable, any issues of concern regarding the project's potential environmental or socioeconomic impacts that could substantially delay or prevent an agency from granting a permit or other approval that is needed for the project.

TxDOT also requests the participation of the U.S. Army Corps of Engineers as a Cooperating Agency in the preparation of the DEIS and FEIS, in accordance with 40 CFR 1501.6 of the Council on Environmental Quality's (CEQ) Regulations for Implementing the Procedural Provision of the National Environmental Policy Act. As a Cooperating Agency, your special expertise permits you, as requested by TxDOT, to develop information and prepare environmental analyses for the EIS.

Please respond to TxDOT in writing with an acceptance or denial of the invitation within three weeks from the date of this letter. If your agency declines the invitation; in the response, please state the reason/reasons for declining the invitation. If you choose to decline, please specifically state in your response that your agency:

- Has no jurisdiction or authority with respect to the proposed project;

OUR VALUES: People • Accountability • Trust • Honesty

Re: Loop 9, Segment A: US 67 to IH 35E

Dear Mr. Cervantes,

In 2009, the Texas Department of Transportation (TxDOT) and Federal Highway Administration (FHWA) initiated the Loop 9 Southeast Draft Environmental Impact Statement (DEIS) from Interstate Highway (IH) 20 to United States (US) 287. Prior to completing this study, in 2012, TxDOT began the Loop 9 Southeast Corridor/Feasibility Study of a revised Loop 9 concept from US 67 to IH 20. The intent of this study was to develop a program of shorter, independent projects to advance into the NEPA process based on mobility needs, engineering and environmental data, and coordination with local and resource agencies. As a result of this study, the subject project was developed: Loop 9, Segment A from US 67 to IH 35 East (E) (Project Vicinity Map included). In the Spring of 2019, TxDOT intends to publish a Notice of Intent which signifies that TxDOT will start the work preparing the EIS for Loop 9, Segment A. The EIS may use and rely on the planning studies previously prepared.

Your agency has been identified as an agency that may have interest in the proposed project due to the potential impacts of the proposed Loop 9, Segment A project. With this letter, we extend your agency an invitation to become a Participating Agency with TxDOT in the development of the *DEIS* and *FEIS* for the subject project. This designation does not imply that your agency either supports the proposal or has any special expertise with respect to evaluation of the project. Participating agencies are responsible to identify, as early as practicable, any issues of concern regarding the project's potential environmental or socioeconomic impacts that could substantially delay or prevent an agency from granting a permit or other approval that is needed for the project.

Please respond to TxDOT in writing with an acceptance or denial of the invitation within three weeks from the date of this letter. If your agency declines the invitation; in the response, please state the reason/reasons for declining the invitation. If you choose to decline, please specifically state in your response that your agency:

- Has no jurisdiction or authority with respect to the proposed project;
- Has no expertise or information relevant to the proposed project; or
- Does not intend to submit comments on the proposed project.

If you have any questions or would like to discuss in more detail the proposed project for Loop 9 or our agencies' respective roles and responsibilities during the preparation of the Loop 9 EIS, please contact Matthew Atkinson, P.E., at 214-320-6154.

OUR VALUES: People • Accountability • Trust • Honesty

OUR MISSION: Through collaboration and leadership, we deliver a safe, reliable, and integrated transportation system that enables the movement of people and goods.

An Equal Opportunity Employer

Mr. Vence Haggard
Regional Administrator
Federal Railroad Administration
Region 5
4100 International Plaza, Suite 450
Fort Worth, TX 76109

Re: Loop 9, Segment A: US 67 to IH 35E

Dear Mr. Haggard,

In 2009, the Texas Department of Transportation (TxDOT) and Federal Highway Administration (FHWA) initiated the Loop 9 Southeast Draft Environmental Impact Statement (DEIS) from Interstate Highway (IH) 20 to United States (US) 287. Prior to completing this study, in 2012, TxDOT began the Loop 9 Southeast Corridor/Feasibility Study of a revised Loop 9 concept from US 67 to IH 20. The intent of this study was to develop a program of shorter, independent projects to advance into the NEPA process based on mobility needs, engineering and environmental data, and coordination with local and resource agencies. As a result of this study, the subject project was developed: Loop 9, Segment A from US 67 to IH 35 East (E) (Project Vicinity Map included). In the Spring of 2019, TxDOT intends to publish a Notice of Intent which signifies that TxDOT will start the work preparing the EIS for Loop 9, Segment A. The EIS may use and rely on the planning studies previously prepared.

Your agency has been identified as an agency that may have interest in the proposed project due to the potential impacts of the proposed Loop 9, Segment A project. With this letter, we extend your agency an invitation to become a Participating Agency with TxDOT in the development of the *DEIS* and *FEIS* for the subject project. This designation does not imply that your agency either supports the proposal or has any special expertise with respect to evaluation of the project. Participating agencies are responsible to identify, as early as practicable, any issues of concern regarding the project's potential environmental or socioeconomic impacts that could substantially delay or prevent an agency from granting a permit or other approval that is needed for the project.

Please respond to TxDOT in writing with an acceptance or denial of the invitation within three weeks from the date of this letter. If your agency declines the invitation; in the response, please state the reason/reasons for declining the invitation. If you choose to decline, please specifically state in your response that your agency:

- Has no jurisdiction or authority with respect to the proposed project;
- Has no expertise or information relevant to the proposed project; or
- Does not intend to submit comments on the proposed project.

OUR VALUES: People • Accountability • Trust • Honesty

OUR MISSION: Through collaboration and leadership, we deliver a safe, reliable, and integrated transportation system that enables the movement of people and goods.

An Equal Opportunity Employer

Re: Loop 9, Segment A: US 67 to IH 35E

Dear Mr. Barks,

In 2009, the Texas Department of Transportation (TxDOT) and Federal Highway Administration (FHWA) initiated the Loop 9 Southeast Draft Environmental Impact Statement (DEIS) from Interstate Highway (IH) 20 to United States (US) 287. Prior to completing this study, in 2012, TxDOT began the Loop 9 Southeast Corridor/Feasibility Study of a revised Loop 9 concept from US 67 to IH 20. The intent of this study was to develop a program of shorter, independent projects to advance into the NEPA process based on mobility needs, engineering and environmental data, and coordination with local and resource agencies. As a result of this study, the subject project was developed: Loop 9, Segment A from US 67 to IH 35 East (E) (Project Vicinity Map included). In the Spring of 2019, TxDOT intends to publish a Notice of Intent which signifies that TxDOT will start the work preparing the EIS for Loop 9, Segment A. The EIS may use and rely on the planning studies previously prepared.

Your agency has been identified as an agency that may have interest in the proposed project due to the potential impacts of the proposed Loop 9, Segment A project. With this letter, we extend your agency an invitation to become a Participating Agency with TxDOT in the development of the *DEIS* and *FEIS* for the subject project. This designation does not imply that your agency either supports the proposal or has any special expertise with respect to evaluation of the project. Participating agencies are responsible to identify, as early as practicable, any issues of concern regarding the project's potential environmental or socioeconomic impacts that could substantially delay or prevent an agency from granting a permit or other approval that is needed for the project.

Please respond to TxDOT in writing with an acceptance or denial of the invitation within three weeks from the date of this letter. If your agency declines the invitation; in the response, please state the reason/reasons for declining the invitation. If you choose to decline, please specifically state in your response that your agency:

- Has no jurisdiction or authority with respect to the proposed project;
- Has no expertise or information relevant to the proposed project; or
- Does not intend to submit comments on the proposed project.

If you have any questions or would like to discuss in more detail the proposed project for Loop 9 or our agencies' respective roles and responsibilities during the preparation of the Loop 9 EIS, please contact Matthew Atkinson, P.E., at 214-320-6154.

OUR VALUES: People • Accountability • Trust • Honesty

OUR MISSION: Through collaboration and leadership, we deliver a safe, reliable, and integrated transportation system that enables the movement of people and goods.

An Equal Opportunity Employer

Vice President of Planning and Development
Dallas Area Rapid Transit
PO Box 660163
Dallas, TX 75266-0163

Re: Loop 9, Segment A: US 67 to IH 35E

Dear Mr. Plesko,

In 2009, the Texas Department of Transportation (TxDOT) and Federal Highway Administration (FHWA) initiated the Loop 9 Southeast Draft Environmental Impact Statement (DEIS) from Interstate Highway (IH) 20 to United States (US) 287. Prior to completing this study, in 2012, TxDOT began the Loop 9 Southeast Corridor/Feasibility Study of a revised Loop 9 concept from US 67 to IH 20. The intent of this study was to develop a program of shorter, independent projects to advance into the NEPA process based on mobility needs, engineering and environmental data, and coordination with local and resource agencies. As a result of this study, the subject project was developed: Loop 9, Segment A from US 67 to IH 35 East (E) (Project Vicinity Map included). In the Spring of 2019, TxDOT intends to publish a Notice of Intent which signifies that TxDOT will start the work preparing the EIS for Loop 9, Segment A. The EIS may use and rely on the planning studies previously prepared.

Your agency has been identified as an agency that may have interest in the proposed project due to the potential impacts of the proposed Loop 9, Segment A project. With this letter, we extend your agency an invitation to become a Participating Agency with TxDOT in the development of the *DEIS* and *FEIS* for the subject project. This designation does not imply that your agency either supports the proposal or has any special expertise with respect to evaluation of the project. Participating agencies are responsible to identify, as early as practicable, any issues of concern regarding the project's potential environmental or socioeconomic impacts that could substantially delay or prevent an agency from granting a permit or other approval that is needed for the project.

Please respond to TxDOT in writing with an acceptance or denial of the invitation within three weeks from the date of this letter. If your agency declines the invitation; in the response, please state the reason/reasons for declining the invitation. If you choose to decline, please specifically state in your response that your agency:

- Has no jurisdiction or authority with respect to the proposed project;
- Has no expertise or information relevant to the proposed project; or
- Does not intend to submit comments on the proposed project.

If you have any questions or would like to discuss in more detail the proposed project for Loop 9 or our agencies' respective roles and responsibilities during the preparation of the Loop 9 EIS, please contact Matthew Atkinson, P.E., at 214-320-6154.

OUR VALUES: People • Accountability • Trust • Honesty

OUR MISSION: Through collaboration and leadership, we deliver a safe, reliable, and integrated transportation system that enables the movement of people and goods.

An Equal Opportunity Employer

Dear Mr. McWilliams,

In 2009, the Texas Department of Transportation (TxDOT) and Federal Highway Administration (FHWA) initiated the Loop 9 Southeast Draft Environmental Impact Statement (DEIS) from Interstate Highway (IH) 20 to United States (US) 287. Prior to completing this study, in 2012, TxDOT began the Loop 9 Southeast Corridor/Feasibility Study of a revised Loop 9 concept from US 67 to IH 20. The intent of this study was to develop a program of shorter, independent projects to advance into the NEPA process based on mobility needs, engineering and environmental data, and coordination with local and resource agencies. As a result of this study, the subject project was developed: Loop 9, Segment A from US 67 to IH 35 East (E) (Project Vicinity Map included). In the Spring of 2019, TxDOT intends to publish a Notice of Intent which signifies that TxDOT will start the work preparing the EIS for Loop 9, Segment A. The EIS may use and rely on the planning studies previously prepared.

Your agency has been identified as an agency that may have interest in the proposed project due to the potential impacts of the proposed Loop 9, Segment A project. With this letter, we extend your agency an invitation to become a Participating Agency with TxDOT in the development of the *DEIS* and *FEIS* for the subject project. This designation does not imply that your agency either supports the proposal or has any special expertise with respect to evaluation of the project. Participating agencies are responsible to identify, as early as practicable, any issues of concern regarding the project's potential environmental or socioeconomic impacts that could substantially delay or prevent an agency from granting a permit or other approval that is needed for the project.

Please respond to TxDOT in writing with an acceptance or denial of the invitation within three weeks from the date of this letter. If your agency declines the invitation; in the response, please state the reason/reasons for declining the invitation. If you choose to decline, please specifically state in your response that your agency:

- Has no jurisdiction or authority with respect to the proposed project;
- Has no expertise or information relevant to the proposed project; or
- Does not intend to submit comments on the proposed project.

If you have any questions or would like to discuss in more detail the proposed project for Loop 9 or our agencies' respective roles and responsibilities during the preparation of the Loop 9 EIS, please contact Matthew Atkinson, P.E., at 214-320-6154.

OUR VALUES: *People • Accountability • Trust • Honesty*

OUR MISSION: *Through collaboration and leadership, we deliver a safe, reliable, and integrated transportation system that enables the movement of people and goods.*

An Equal Opportunity Employer

Mr. Alan McWilliams

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Request for public comment.

SUMMARY: The Federal Aviation Administration is requesting public comment on a request by the City of Tallahassee to change a portion of airport property from aeronautical to non-aeronautical use at the Tallahassee International Airport, Tallahassee City, Florida. The request consists of approximately 317.37 acres of vacant property located on the western side of the airport property boundary. Present fair market value of the property is \$157,098 annually. Documents reflecting the Sponsor's request are available, by appointment only, for inspection at the Tallahassee International Airport and the FAA Airports District Office.

DATES: Comments are due on or before June 19, 2019.

ADDRESSES: Documents are available for review at Tallahassee International Airport, and the FAA Orlando Airports District Office, 8427 SouthPark Circle, Suite 524, Orlando, FL 32819. Written comments on the Sponsor's request must be delivered or mailed to: Pedro Blanco, Community Planner, FAA Orlando Airports District Office, 8427 SouthPark Circle, Suite 524, Orlando, FL 32819.

FOR FURTHER INFORMATION CONTACT: Pedro Blanco, Community Planner, FAA Orlando Airports District Office, 8427 SouthPark Circle, Suite 524, Orlando, FL 32819.

SUPPLEMENTARY INFORMATION: Section 125 of The Wendell H. Ford Aviation Investment and Reform Act for the 21st Century (AIR-21) requires the FAA to provide an opportunity for public notice and comment prior to the "waiver" or "modification" of a sponsor's Federal obligation to use certain airport land for non-aeronautical purposes.

Bart Vernace,

Manager, Orlando Airports District Office, Southern Region.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Dallas And Ellis Counties, Texas

AGENCY: Texas Department of Transportation (TxDOT), Federal Highway Administration (FHWA), Department of Transportation.

ACTION: Federal Notice of Intent to prepare an Environmental Impact Statement (EIS).

SUMMARY: The FHWA, on behalf of TxDOT, is issuing this notice to advise the public that an EIS will be prepared for a proposed transportation project to construct a six-lane new location frontage road system between United States 67 (US 67) and Interstate 35 East (IH 35E) through Dallas and Ellis Counties, Texas.

FOR FURTHER INFORMATION CONTACT: Carlos Swonke, Division Director, TxDOT Environmental Affairs Division, 125 East 11th Street, Austin, Texas 78701; Phone (512) 416-2734; email: carlos.swonke@txdot.gov. TxDOT's normal business hours are 8:00 a.m.–5:00 p.m. (central time), Monday through Friday.

SUPPLEMENTARY INFORMATION: The environmental review, consultation, and other actions required by applicable

Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

TxDOT will prepare an EIS for the proposed construction of a six-lane new location frontage road system for the portion of the proposed Loop 9 Southeast roadway system between United States 67 (US 67) and Interstate 35 East (IH 35E) through Dallas and Ellis Counties, Texas, which is known as "Segment A." The project is approximately 9.4-miles in length and would pass through the communities of Cedar Hill, Midlothian, Ovilla, Glenn Heights, and Red Oak. The new location frontage road system would include an eastbound and westbound frontage road facility, each consisting of three 12 foot (ft.) lanes, an 8-ft inside shoulder, and an 8 ft. outside shoulder for bicycle accommodations within the rural section of the proposed roadway. The proposed project ROW would include a median (358 to 512 ft. wide) that would accommodate the future construction of an ultimate access-controlled mainlane facility. Construction of the ultimate access-controlled mainlane facility would be based on projected traffic and funding and would require additional environmental analysis prior to construction.

The EIS will evaluate a range of build alternatives and a no-build alternative. Possible build alternatives include the three alternatives developed to date to be considered and evaluated in the EIS. In general, from Tar Road to approximately 0.9 miles east of S. Joe Wilson Road, a distance of approximately 2.8 miles, three build alternatives are being considered. East and west of these limits, each alternative shares a common alignment to the project termini.

Alternative 1 (2.78 miles), the northernmost alternative, diverges from the common alignment at Tar Road heading east, then immediately turns northeast before crossing S. Joe Wilson Road and converging back with the common alignment.

Alternative 2 (2.76 miles), the central most alternative, diverges from the common alignment at Tar Road heading east, then immediately turns northeast; however, this alignment follows a straighter path between Tar Road and S. Joe Wilson Road. After S. Joe Wilson Road, the alternative continues in a northeast direction before converging back with the common alignment.

Alternative 3 (2.84 miles), the southernmost alternative, diverges from the common alignment at Tar Road and

keeps east for a distance of 0.8 miles centered on existing Knight Street. At the end of Knight Street, the alternative shifts northeast before crossing S. Joe Wilson Road and converging back with the common alignment.

TxDOT will issue a single Final Environmental Impact Statement and Record of Decision document pursuant to 23 U.S.C. 139(n)(2), unless TxDOT determines statutory criteria or practicability considerations preclude issuance of a combined document.

In accordance with 23 U.S.C. 139, cooperating agencies, participating agencies, and the public will be given an opportunity for continued input on project development. A public scoping meeting is planned for Summer 2019. An agency scoping meeting will also be held with participating and cooperating agencies. The agency and public scoping meetings will provide an opportunity for the participating/cooperating agencies and public to review and comment on the draft coordination plan and schedule, the project purpose and need, the range of alternatives, and methodologies and level of detail for analyzing alternatives. In addition to the agency and public scoping meetings, a public hearing will be held. Public notice will be given of the time and place of the meetings and hearing.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction.)

Issued on: May 14, 2019.

Michael T. Leary,
Director, Planning and Program Development,
Federal Highway Administration.

BILLING CODE 4910-22-P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Notice of Final Federal Agency Actions on Proposed Southern Extension of SR-186 and the US 45 Bypass Project in Tennessee

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of limitation on claims for judicial review of actions by FHWA and other Federal agencies.

SUMMARY: This notice announces actions taken by FHWA and other Federal agencies that are final. The actions relate to a proposed highway project for the Southern Extension of State Route (SR) 186 and the US 45 Bypass from SR-1 (US 70/Airways Boulevard) to SR-5 (US 45/South Highland Avenue) on

the south side of Jackson in Madison County, Tennessee. Those actions grant licenses, permits, and approvals for the project. The FHWA's Finding of No Significant Impact (FONSI) provides details on the Selected Alternative for the proposed improvements.

DATES: By this notice, FHWA is advising the public of final agency actions subject to 23 U.S.C. 139(l)(1). A claim seeking judicial review of the Federal agency actions on the highway project will be barred unless the claim is filed on or before OCTOBER 17, 2019. If the Federal law that authorizes judicial review of a claim provides a time period of less than 150 days for filing such claim, then that shorter time period still applies.

FOR FURTHER INFORMATION CONTACT: For FHWA: Ms. Theresa Claxton; Planning and Program Management Team Leader; Federal Highway Administration; Tennessee Division Office; 404 BNA Drive, Building 200, Suite 508; Nashville, Tennessee 37217; Telephone (615) 781-5770; email: Theresa.Claxton@dot.gov. FHWA Tennessee Division Office's normal business hours are 7:30 a.m. to 4 p.m. (Central Time). You may also contact Ms. Susannah Kniazewycz, Environmental Division Director, Tennessee Department of Transportation (TDOT), James K. Polk Building, Suite 900, 505 Deaderick Street, Nashville, Tennessee 37243-0334; Telephone (615) 741-3655, Susannah.Kniazewycz@tn.gov. The TDOT Environmental Division's normal business hours are 8 a.m. to 5 p.m. (Central Time).

SUPPLEMENTARY INFORMATION: Notice is hereby given that FHWA and other Federal agencies have taken final agency actions subject to 23 U.S.C. 139(l)(1) by issuing licenses, permits, and approvals for the following highway project in the State of Tennessee: Southern Extension of SR-186 and the US 45 Bypass, Project Number HPP-NHE-1(225), PIN 109926.00, Madison County, Tennessee. The proposed action will improve local and regional mobility by providing an alternate route for through traffic separate from the developed commercial corridor along existing US 45. The Selected Alternative proposes the construction of two roadway sections within the project. The southern portion of the Bypass from north of Edwards Drive to Boone Lane consists of two 12-foot travel lanes in each direction, 6-foot inside shoulders, 12-foot outside shoulders, and a variable width depressed grass median, within an approximate 250-foot right-of-way (ROW). The northern portion of the

Bypass from Boone Lane to Airways Boulevard consists of two 12-foot travel lanes in each direction, 7-foot inside shoulders, 12-foot outside shoulders, and center concrete barrier, within an approximate 200-foot ROW. Portions of the corridor include: (1) An interchange with ramps on the southern terminus of the project at US 45/South Highland to provide unimpeded access for traffic on the existing US 45/South Highland continuing north on the proposed Bypass; (2) Access via at-grade intersections for several local roads intersected by the proposed Bypass route, including: Raines Springs Road, D Street, Boone Lane, Riverside Drive, and Existing US 45 Bypass; (3) SR 18 Realignment (Raines Springs Road) from the existing SR 18 intersection with Old Malesus Road to north of the proposed US 45 Bypass. Raines Springs Road would be widened to two 12-foot travel lanes with a 12-foot center turn lane.

The actions by the Federal agencies, and the laws under which such actions were taken, are described in the Environmental Assessment (EA) for the project, approved on May 20, 2013, the Reevaluation of the EA approved on July 18, 2018, and in the FHWA FONSI issued on February 14, 2019, and in other documents in the FHWA project records. The EA, Reevaluation, FONSI, and other project records are available by contacting FHWA or TDOT at the addresses provided above. The FHWA EA, Reevaluation, and FONSI can be viewed and downloaded from the project website at <https://www.tn.gov/tdot/projects/region-4/state-route-186-us-45-bypass-southern-extension>, or viewed at the Jackson Planning Department, City Hall, 111 East Main Street, Suite 201, Jackson, Tennessee 38301, the TDOT Region 4, Administrative Building, 300 Benchmark Place, Jackson, Tennessee 38301, or the Jackson-Madison County Library, 433 East Lafayette Street, Jackson, Tennessee 38301.

This notice applies to all Federal agency decisions that are final as of the issuance date of this notice and all laws under which such actions were taken, including but not limited to:

1. *General:* National Environmental Policy Act (NEPA) [42 U.S.C. 4321-4351]; Federal-Aid Highway Act [23 U.S.C. 109 and 23 U.S.C. 128].

2. *Air:* Clean Air Act [42 U.S.C. 7401-7671(q)].

3. *Land:* Section 4(f) of the Department of Transportation Act of 1966 [23 U.S.C. 138 and 49 U.S.C. 303].

4. *Wildlife:* Endangered Species Act [16 U.S.C. 1531-1544 and Section 1536]; Fish and Wildlife Coordination

DRAFT

1.0 TxDOT Mission

Through collaboration and leadership, we deliver a safe, reliable, and integrated transportation system that enables the movement of people and goods.

2.0 Project Description and Background

The proposed Loop 9 project includes the construction of a six-lane new location frontage road system between Interstate 35 East (IH 35E) and United States 67 (US 67) through Dallas and Ellis counties, Texas, and is approximately 9.4-miles in length. The proposed Loop 9 roadway system would pass through the communities of Cedar Hill, Midlothian, Ovilla, Glenn Heights, and Red Oak. The proposed project right of way (ROW) would include a median that would accommodate the future construction of an ultimate access-controlled mainlane facility. Construction of the ultimate access-controlled mainlane facility would be based on projected traffic and funding and would require additional environmental analysis prior to construction.

The new location Loop 9 frontage road system would include an eastbound and westbound frontage road facility, each consisting of three 12-foot lanes, an 8-foot inside shoulder, and an 8 foot. outside shoulder for bicycle accommodations within the rural section of the proposed roadway. The proposed project ROW would include a median (358 to 512 feet wide) that would accommodate the future construction of an ultimate access-controlled mainlane facility.

The proposed project would also construct intersections at eight (8) major crossroads as follows: Tar Road, future Clark Road, S. Joe Wilson Road, S. Duncanville Road, S. Cockrell Hill Road, S. Westmoreland Road, S. Hampton Road, and Uhl Road. The proposed project would also construct a grade separation at US 67 (construction of this grade separation would be phased); a grade separation at the BNSF Railroad; and would tie into the grade separation at IH 35E (the grade separation at IH 35E would be constructed prior to this project under Segment B of the Loop 9, limits from IH 35E to IH 45).

The proposed Loop 9 project, from IH 35E to US 67, would likely be constructed in two phases based on traffic needs and project funding. A logical sequence for staging the various elements for construction of the new location frontage road system could be as follows:

- Phase 1 would construct a single two-lane, two-way frontage road, and would also acquire the proposed ROW to accommodate the frontage roads and the future ultimate access-controlled mainlane facility.
- As traffic warrants and funding become available, Phase 2 would involve the construction of the three-lane frontage roads in each direction, which would include the conversion of the two-way frontage road built in Phase 1 to a one-way operation, and the construction of grade separations at specific high-volume intersections.

- Phase 3 would involve the construction of the ultimate access-controlled mainlane facility in both directions. Construction of the ultimate access-controlled mainlane facility would be based on projected traffic and funding and would require additional environmental analysis prior to construction.

Project Location Map

3.0 Need and Purpose for the Proposed Project

The need for the Loop 9 project is to address population growth, regional transportation demand, system linkages, and intermodal connections in the study area and Dallas–Fort Worth (DFW) Region. The purpose of the Loop 9 project is to increase capacity, mobility, and accessibility for the region, serve a population that is currently limited on roadway facilities for east-west travel routes, and provide access to major arterial roadway facilities located within the study area. In addition, the purpose of the project is to help manage the long-term regional congestion from population and employment growth.

4.0 Purpose of Public Involvement Plan

This plan will define and guide the public involvement effort based on the TxDOT Public Involvement Policy tenets to:

- Purposefully involve the public
- Provide access to information and decision-making processes (early, continuous, transparent and effective)

- Use best practices and a range of strategies
- Be reflective of needs

5.0 Public Involvement Plan Goals and Objectives

Effective public involvement provides opportunities for input and mechanisms to report back to the public how the input was used; establishes and maintains effective two-way communication; collaborates with the community on identification of issues, prioritization of issues, or potential solutions; and incorporates public input during the decision-making process.

Key elements for effective public involvement are:

1. Establish early and continuous public participation opportunities that provide timely information about transportation issues and decision-making processes to all interested parties;
2. Provide reasonable public access to educational, technical, and policy information to enhance the public's knowledge and ability to participate in the development of the study;
3. Provide adequate public notice of participation opportunities during the development of the study, and time for public review and comment at key decision points in the planning and design process;
4. Ensure that public participation opportunities are held at convenient and accessible locations and times (in compliance with the Americans with Disabilities Act of 1990);
5. Make information accessible with visualization techniques, and available in appropriate electronically-accessible formats and means, via the TxDOT website, technology-enabled media, and video-teleconferencing;
6. Include measures for seeking input from and considering the needs of those traditionally underserved by existing transportation systems as defined in Title VI of the Civil Rights Act of 1964 (Title VI), such as low-income, minority, and non-English speaking households who may face challenges accessing employment and other services; and
7. Provide for the periodic review of the public engagement process to ensure the effectiveness of TxDOT's public engagement efforts and revise the process as appropriate.
8. Provide a contact to listen, acknowledge, and respond promptly to public questions and issues.
9. Manage expectations and promote long-term benefits.
10. Build upon TxDOT's reputation as a transparent, credible agency and a good partner to the community.

6.0 Current Issues to Address

Prior to reaching out to the public, it's important that the project team define and understand the issues and problems the proposed project is designed to address, and that the project team can clearly and effectively describe these problems to the public. When public input begins, the public will be asked to identify issues and problems to be listed in this section.

Currently, traveling through the Dallas and Ellis county study area can be a challenge. Interstate 20 (IH 20), the closest east-west freeway, lies miles to the north. There are gaps in the arterial street network that force east-west traffic to take circuitous routes that use FM 664, IH 20 or US 287. In addition, arterial roadways are growing more congested as the area adds residential, commercial, and industrial development. Loop 9 would provide important east-west connectivity, reduce travel times, and support economic development opportunities in the study area.

7.0 Stakeholders

Public involvement must encompass the full range of community interests. Following is a list of preliminary stakeholders based on initial contact with the community:

Elected Officials

U.S. Senator John Cornyn

U.S. Senator Ted Cruz

U.S. Rep. Ron Wright, Dist. 6

U.S. Rep. Eddie Bernice Johnson Dist. 30

Texas State Senator Brian Birdwell, Dist. 22

Texas State Senator Royce West, Dist. 23

Texas State Rep. Carl Sherman, Dist. 109

Texas State Rep. John Wray, Dist. 10

Dallas County:

County Judge Clay Lewis Jenkins

Commissioner John Wiley Price, District 3

Ellis County:

County Judge Todd Little

Commissioner Kyle Butler, Precinct 4

City of Cedar Hill:

Mayor Stephan Mason

Council Member Shirley Daniels, Place 1

Council Member Daniel C. Haydin Jr., Place 2

Council Member Alan A. Sims, Place 3

Council Member Chad A. McCurdy, Place 4

Council Member Stephen Mason, Mayor Pro Tem

Council Member Clifford R. Shaw, Place 6

City of DeSoto:

Mayor Curtistene McCowan, Place 1

Council Member Kay Brown-Patrick, Place 2

Council Member Nicole Raphiel, Place 3

Council Member Andre' Byrd, Sr., Place 4

Council Member Dick North, Place 5

Council Member Candice Quarles, Place 6

Council Member Kenzie Moore III, Place 7

City of Glenn Heights:

Mayor Harry Garrett

Council Member Sonja A. Brown, Place 1

Council Member Tony Bradley, Place 2

Council Member Jeremy Woods, Place 3

Council Member Ron Adams, Mayor Pro Tem

Council Member Shaunte Allen, Place 5

Council Member Machanta Newson, Place 6

City of Midlothian:

Mayor Bill Houston

Council Member Wayne Sibley, Place 1

Council Member Mike Rodgers, Place 2

Council Member Theodore "Ted" Miller, Place 3

Council Member Clark Wickliffe, Mayor Pro Tem

Council Member Justin Coffman, Place 5

Council Member Art Pierard, Place 6

City of Ovilla:

Mayor Richard Dormier

Council Member Rachel Huber, Place 1

Council Member Dean Oberg, Place 2

Council Member David Griffin, Mayor Pro Tem

Council Member Douglas Hunt, Place 4

Council Member Michael Myers, Place 5

City of Red Oak:

Mayor Mark Stanfill

Council Member Gordon Toney, Mayor Pro Tem

Council Member Ben Goodwyn, Place 2

Council Member William Drake, Place 3

Council Member Ron Wilson, Place 4

Council Member Michael Braly, Place 5

8.0 Tactics, Tools, Roles, Responsibilities

The public involvement strategies for this project will vary and will include stakeholder meetings, public scoping meetings, an agency scoping meeting, public meetings, meeting with affected property owners and formal public hearings required during the NEPA process. The level of public participation will also vary, depending on the various stages on the project development process. The conceptual design stage will allow for collaborating with the community to decide on the most feasible option for Loop 9. In this stage, TxDOT will partner with the community to further develop and decide on alternatives for the proposed project.

8.1 In-Person Public Involvement Events

8.1.1 Stakeholder Meetings

TxDOT held the following stakeholder meetings with local public officials prior to the beginning of this project:

City of Cedar Hill Stakeholder Meetings: 3/7/2017, 8/14/2017 and 5/8/2018

City of Glenn Heights Stakeholder Meetings: 3/1/2017, 8/14/2017 and 5/8/2018

City of Ovilla Stakeholder Meetings: 3/31/2017 and 8/17/2017

City of Red Oak Stakeholder Meetings: 3/20/2017, 8/15/2017 and 5/8/2018

To date, TxDOT has held the following stakeholder meetings with local public officials as part of the Environmental Impact Statement project:

City of Cedar Hill Stakeholder Meeting: Cedar Hill Government Center 10/09/2018

City of Glenn Heights Stakeholder Meeting: City Council Chambers 11/05/2018

Additional meetings will be determined as needed. Some meetings will be held at the stakeholder's venue and others will be held at TxDOT or other venues to be secured by the technical expert.

8.1.2 Public Scoping Meeting

Two open-house style public scoping meetings (same meeting held at two separate locations) will be held in July 2019. The open house style format will allow the public to come and go any time within a two-hour period (typically 6 p.m. to 8 p.m.). The purpose of the public scoping meetings is to provide the public with a preliminary concept of the project and ask for comments including the identification of environmental constraints and/or issues to be addressed during the environmental analyses.

Each public scoping meeting venue will be reserved and secured after a site visit. The venue will provide adequate capacity, ample parking, ample room/space to disseminate information, and be Americans with Disabilities Act (ADA) accessible. Attempts will be made to secure one meeting location on the western side of the corridor (closer to US 67) and one meeting location on the eastern side of the corridor (closer to IH 35E) while also giving consideration to securing one meeting location north of the corridor (Dallas County) and another meeting location south of the corridor (Ellis County). Uniformed officers will be hired to provide security at the meetings.

Prior to the public scoping meeting, the following draft materials will be prepared for TxDOT review and approval.

Materials to be developed include:

- Meeting Notifications
- Newspaper Display Ad
- Internal FAQ document for anyone staffing the meetings
- Sign-in sheets for elected officials, staff, public and media
- Comment cards (English and Spanish)
- Project fact sheet (English and Spanish)
- Exhibit boards and displays
- Alignment option maps
- TxDOT and consultant team nametags
- Computers/iPad for MetroQuest Surveys

The TxDOT Dallas District Public Information Officer will prepare and distribute a press release and social media posts that publicly announce each public scoping meeting date, time, location and purpose.

Each public scoping meeting shall be conducted so that participants can sign in, obtain informational handouts, freely view project-related exhibits on easels and tables and discuss the information with project representatives and/or subject matter experts.

Informed and easily identifiable team members will support the meeting to perform attendee registration, explain exhibits, answer questions and guide attendees through the public scoping meeting process. Team members will be identified with nametags.

Comment tables will be available with comment forms, pens, and a comment deposit box for attendees to submit questions, suggestions, and concerns. Attendees will have the option to take the form home and mail it back per a return mailing address printed on the back of the form. The deadline for submitting comments will also be printed on the comment forms.

8.1.3 Agency Scoping Meeting

One agency scoping meeting will be held in June 2019 either mid-morning or mid-afternoon to coincide with agency representative's work schedules. The agency scoping meeting will be held at the TxDOT Dallas District office. Meeting invitations will be mailed and/or emailed to participating and cooperating agencies. The meeting format will be conference style. The project team will give a PowerPoint, or similar presentation, followed by a group discussion. Some, or all, of the public scoping meeting exhibits may supplement the presentation.

8.1.4 Public Meeting

Two open-house style public meetings (same meeting held at two separate locations) will be held in December 2019, or a time more appropriate for the project development. The open house style format will allow the public to come and go any time within a two-hour period (typically 6 p.m. to 8 p.m.). The purpose of the public meetings is to provide a status on the development of the project and an opportunity for the public to give feedback on the design options and alternatives.

Each public meeting venue will be reserved and secured after a site visit. The venue will provide adequate capacity, ample parking, ample room/space to disseminate information, and be Americans with Disabilities Act (ADA) accessible. Attempts will be made to secure

one meeting location on the western side of the corridor (closer to US 67) and one meeting location on the eastern side of the corridor (closer to IH 35E) while also giving consideration to securing one meeting location north of the corridor (Dallas County) and another meeting location south of the corridor (Ellis County). Uniformed officers will be hired to provide security at the meetings.

Prior to the public meeting, the following draft materials will be prepared for TxDOT review and approval.

Materials to be developed include:

- Meeting Notifications
- Newspaper Display Ad
- Internal FAQ document for anyone staffing the meetings
- Sign in sheets for elected officials, staff and the public
- Comment cards (English and Spanish)
- Project fact sheet (English and Spanish)
- Exhibit boards and displays
- Alignment option maps
- TxDOT and consultant team nametags
- Computers/IPad for MetroQuest Surveys

The TxDOT Dallas District Public Information Officer will prepare and distribute a press release and social media posts that publicly announce each public scoping meeting date, time, location and purpose.

Each public meeting shall be conducted so that participants can sign in, obtain informational handouts, freely view project-related exhibits on easels and tables and discuss the information with project representatives and/or subject matter experts. Applicable alternatives or scenarios (solutions) will be presented at the public meeting and will be based on project information developed to date. Also, a summary of the public comments collected at the previous public scoping meetings will be presented.

Informed and easily identifiable team members will support the meeting to perform attendee registration, explain exhibits, answer questions and guide attendees through the public meeting process. Team members will be identified with nametags.

Comment tables will be available with comment forms, pens, and a comment deposit box for attendees to submit questions, suggestions, and concerns. Attendees will have the option to take the form home and mail it back per a return mailing address printed on the back of the form. The deadline for submitting comments will also be printed on the comment forms.

8.1.5 Public Hearing

Two public hearings (same hearing held at two separate locations) will be held in August 2020. The purpose of the public hearings is to review environmental findings and the draft environmental impact statement with the community, inform the public about the factors considered in the environmental process, provide a summary of the public input to date, and provide an opportunity for comment.

Each public hearing venue will be reserved and secured after a site visit. The venue will provide adequate capacity, ample parking, appropriate audio/visual capabilities, and be Americans with Disabilities Act (ADA) accessible. Attempts will be made to secure one hearing location on the western side of the corridor (closer to US 67) and one hearing location on the eastern side of the corridor (closer to IH 35E) while also giving consideration to securing one hearing location north of the corridor (Dallas County) and another hearing location south of the corridor (Ellis County). Uniformed officers will be hired to provide security at the hearings.

Prior to the public hearing, the following draft materials will be prepared for TxDOT review and approval.

Materials to be developed include:

- Meeting Notifications
- Newspaper Display Ad
- Internal FAQ document for anyone staffing the meetings
- Sign in sheets for elected officials, staff and the public
- Comment cards (English and Spanish)
- Project fact sheet (English and Spanish)
- Exhibit boards and displays
- Alignment option maps
- TxDOT and consultant team nametags
- Speaker registration cards (English and Spanish)
- Public Hearing presentation

The TxDOT Dallas District Public Information Officer will prepare and distribute a press release and social media posts that publicly announce each public scoping meeting date, time, location and purpose.

Each public hearing shall be conducted so that participants can sign in, sign up to speak (if desired), obtain informational handouts, see and hear the presentation, and state their verbal comments at the public microphone. A court reporter will be present to capture verbatim verbal comments from the public and a transcript will be provided. An open house session will be held immediately prior to the formal public hearing.

Informed and easily identifiable team members will support the meeting to perform attendee and speaker registration, guide attendees through the public hearing process, narrate a PowerPoint presentation, and facilitate a public commenting session (including timekeeping). Team members will be identified with nametags.

Comment tables will be available with comment forms, pens, and a comment deposit box. Attendees will have the option to take the form home and mail it back per a return mailing address printed on the back of the form. The deadline for submitting comments will also be printed on the comment forms.

8.2 *Announcements, Notification and Comment Collection*

8.2.1 Project Website/Web Page

The following websites will provide project details, contact information, newsletters, links to meetings and opportunities to provide input.

- At www.KeepItMovingDallas.com under “Upcoming Public Hearing/Meeting”
- At www.txdot.gov by searching “Loop 9, Segment A” with a link to www.loop9.org

8.2.2 Project Email Account

The consultant team will set up (with the assistance of the TxDOT Dallas District PIO) a project email account to streamline communications with the public. The consultant team will send outgoing emails to stakeholders from the account to set up stakeholder meetings and coordinate public meeting logistics. This account will also be utilized to receive public questions, feedback and comments. This account will also be used to communicate a QR code for the MetroQuest site and to announce upcoming open houses/public meetings. Incoming emails will go directly to the consultant team Public Involvement lead who will forward to the TxDOT PM, TxDOT PIO and the consultant team PM. If needed, the consultant team will include an email draft response for approval. All emails should be acknowledged within 24 to 48 hours and resolved within 15 days.

8.2.3 Fact Sheet

A simple, one-page fact sheet will inform the public about the project, the status of the project development process and other pertinent information such as comment opportunities. This fact sheet will be updated as the project progresses. Fact sheets will be prepared in English and Spanish.

8.2.4 Meeting and Project Flyers

Meeting notices will be distributed to community gathering places such as libraries, civic locations, restaurants, convenience stores, post offices, and businesses to inform citizens of the project status and any upcoming meetings or input opportunities. Flyers are translated reflective of community demographics. Community members can help identify and post flyers at these well-travelled locations.

8.2.5 Mail-out Notices

Notices will be mailed to adjacent residents' homes and inform citizens of upcoming meetings and comment and input opportunities. The notices will be prepared in English and Spanish.

8.2.6 Newspaper Advertisements

Notifications will be published in Dallas County and Ellis County newspapers 30 days prior to each public meeting/hearing. Local newspapers may include Dallas Morning News, Focus Daily News, Ellis County Press, Waxahachie Daily Light and Al Dia (Spanish Language). Affidavits of publication and tear sheets will be obtained from each newspaper as proof of publication.

8.2.7 Posting Hearings and Meetings

Open houses, public meetings and hearings will be posted on the following websites:

- At www.keepitmovingdallas.com under "Upcoming Public Hearing/Meeting"
- At www.txdot.gov under "Hearings and Meetings Schedule"

8.2.8 Changeable Message Signs

Changeable message signs along the road are effective vehicles to alert citizens, especially commuters, of upcoming open houses, meetings or hearings. TxDOT may elect to utilize these signs for display of project information and upcoming meetings.

8.2.9 Media Contact and Press Releases

The voice the media hears about the study should be singular and familiar. Therefore, all media requests and interactions will be handled by the TxDOT Dallas District PIO. The consultant team will assist in providing press releases, study information and/or draft responses to media inquiries. The consultant team will not engage directly with any media outlet or reporter.

8.2.10 Social Media Content

As the consultant team reaches major project milestones, they will work with the TxDOT Dallas District PIO to create content for social media posts.

After content is approved by the TxDOT PM, the following steps will take place:

- PIO staff will post from the District's Twitter account.
- PIO requests Facebook posts on the official TxDOT Facebook page.
- If requested by TxDOT, the consultant team reaches out to stakeholder jurisdictions, agencies and other stakeholders to post content on their social media accounts and/or share or retweet the TxDOT posts.

If necessary, the consultant team will draft social media comment responses. Most generally those would instruct stakeholders on the appropriate time and method to submit formal comments.

8.2.11 MetroQuest Surveys/Summary Reports

As part of the survey efforts conducted for the open houses/public meetings, the consultant team will gather input from the community utilizing the MetroQuest software. MetroQuest, a public-involvement software, is a graphical and on-line survey format intended to provide a user-friendly experience. The consultant team will prepare a list of questions, ranking criteria and graphics for the MetroQuest surveys to provide to the TxDOT Dallas District for the preparation of the surveys. This may include photographs and geographic information system (GIS)-based maps. TxDOT will provide the data results from the MetroQuest surveys to the consultant team for further analysis. The consultant team will provide the results of

the data analysis (summarized in a MetroQuest Summary Report) in an agreed upon format for the TxDOT Dallas District review and approval.

For Public Meeting Series #1, the consultant team will utilize TxDOT's subscription to the online community engagement software, MetroQuest. The Dallas District office incurs no cost for use of the tool. All setup of the tool is handled by TPP PI section staff also at no cost to the Dallas District, aside from staff time to contribute to and review content and analyze resulting input.

If properly advertised, MetroQuest can reach the “silent majority” – those stakeholders who do not attend public meetings but who do want to engage online. The tool gathers focused and quantifiable data that can be used to support planning decisions as the project moves forward. As opposed to the traditional open-ended comment forms, the MetroQuest tool is customized to ask the specific questions and if needed can limit the number of characters in an open-ended response.

The consultant team would encourage Public Meeting participants to use computers or tablets logged in to the MetroQuest tool at the meetings while study information is fresh in their minds. The tool will also be accessible on the study webpage so that stakeholders who attend the meeting may provide input later and stakeholders not attending the meeting can also provide input without physically attending one of the meetings.

The process for development of the MetroQuest tool for this study is described below:

STEP 1: The consultant team will work with the Dallas District Advanced Project Development staff, District PIO and TPP's Public Involvement Section to develop MetroQuest content with templates provided by TPP PI Section. The consultant team is also responsible for providing any graphics, photos, maps and visuals.

STEP 2: Once screens are selected and content is approved, then it is input into MetroQuest by TPP PI section staff assigned to the Dallas District. Labor hours for TPP staff are not charged back to the Dallas District.

STEP 3: TxDOT Dallas District reviews test site and provides final comments.

STEP 4: TPP PI Section staff makes final revisions

STEP 5: MetroQuest tool goes live on the project web page on txdot.gov and KeepItMoving.com on the date of the first public meeting. It will be accessible until the end of the comment period for Public Meeting Series #1.

STEP 6: Market the MetroQuest survey via a variety of methods: news releases, social media, fliers, etc.

8.2.12 Comment Processing

Handwritten comments received on Comment Forms during the Comment Period will be keyed into a Comment Database. All comments will be recorded verbatim. The consultant team will not revise spelling or grammar in an attempt to avoid misinterpreting any comment.

Comments received through MetroQuest will be exported into an Excel file and included in the Comment Database.

The consultant team will provide all raw data housed in MetroQuest data center to the TxDOT PM.

8.2.13 Comment Response Matrix

The consultant team will develop a comment response matrix for each of the comment periods. The assumption is that the consultant will develop a draft response for every comment to submit to TxDOT. The matrix will follow the guidelines and templates set forth in TxDOT's Public Involvement Toolkit. The file will be developed in Microsoft Excel or Microsoft Word and include the required format as specified in the TxDOT's Public Involvement Toolkit.

8.2.14 Quick Response (QR) Codes

A Quick Response (QR) Code will be included on all public outreach materials to lead the reader to the project web page and/or the online survey.

9.0 Environmental Justice & Limited English Proficiency Outreach

Based on U.S. Census Bureau 2016 American Community Survey data, Environmental Justice (EJ) and Limited English Proficiency (LEP) persons are present within the study area. The main language spoken by the LEP population is Spanish. Efforts to include these EJ and LEP persons in public involvement activities shall include:

- Published English and Spanish meeting notices
- English and Spanish comment forms and fact sheets available at the Public Meetings and posted on the study webpage
- A Spanish language interpreter provided for each Public Meeting and at the Public Hearing
- English translation of any Spanish comments made during the comment period and
- To the extent possible, Public Meeting/Hearing venues near public transportation for interested parties that choose an alternate form of transportation, some of which may be EJ and/or LEP persons.

Interpretation services for languages other than Spanish will be accommodated upon request.

10.0 TxDOT Branding

All materials created must be within current TxDOT branding guidelines:

<http://crossroads.org/cmd/templates.html>

<http://crossroads.org/cmd/Assets/PublicationsStyleguide.pdf>

11.0 Posting Public Involvement Documents

The consultant team will coordinate the posting of the final, approved Public Involvement Plan on the study webpage. The plan will include the following items related to Public Involvement:

- Summary of all Public Involvement activities and public input
- All required Public Meeting documentation such as the comment/response matrix, notices, sign-in sheets and description of project modifications resulting from a public meeting.

The purpose of posting these documents is to 1) demonstrate TxDOT's efforts to be transparent and 2) show stakeholders that their input was considered as a part of the study process.

12.0 Project Schedule/Milestones

As the lead agency, TxDOT has developed a detailed project schedule for completion of the Loop 9 EIS project.

Potential issues that may affect the schedule include the size and complexity of the project, community concerns, impacts to cultural resources (such as archaeological sites and historic structures), and impacts to natural resources (such as wetlands and threatened and endangered species habitat). The schedule may be extended pending unforeseen

circumstances. The updated schedule reflecting major project milestones will be available at public meetings and on the TxDOT website.

Task	Deadline
Prepare Draft Notice of Intent	10/04/2018
Stakeholder Meeting – Cedar Hill	10/09/2018
Submit Stakeholder Meeting Minutes – Cedar Hill	10/16/2018

Publish Notice of Availability Final EIS/Record of Decision	09/30/2021

13.0 Evaluation

The following qualitative and quantitative strategies will be evaluated and measured throughout the public involvement effort:

Quantitative:

- Number of meetings conducted including attendance numbers
- Number of comments received by mode (meetings, mail, email, etc.)
- Number of MetroQuest surveys received
- Number of informational materials (flyers, fact sheets, etc.) distributed
- Frequency of updating stakeholder address list

Qualitative:

- Citizen satisfaction survey to be conducted at meetings, through email or snail mail
- Evaluation of how citizen comments were used in the decision-making process and how that information was conveyed back to the public
- Evaluation of how citizen survey responses were used in the decision-making process
