					I am a resident of University hills in Northwest Austin. 109905E Th00T's plans for 135 and 109905E expansion. 3.5 has been the historical dividing line in Austin. separating East and West. 20 years of construction for just a few years of complication raide in NOT worth it. divident with to law an intendestable lipsory for explicit offset under 1.5 and other representatives to stand up for me.	
				Do not widen/no build		
				Latent/Induced Demand	TACOT's process in this project in flawed. It ignores indused Demand, construction impacts, particulate matter pollution from the wear, the failure of almost all highesy expansions, the success of freeway removals, and to traffic modeling is flawed.	See Comment #28
			-	Air Quality/Noise	Highway expansions DDNT work. They worsen congestion (as we saw with the Kuty Freeway), air noise and water pollution, safety, and transportation options beyond driving.	San Comment #34
				Multimodal Transportation	We have before us an opportunity to re-envision this headabhs, and embrace visions that create meaningful connections between east and downtown Austin with multi-modal transit at the forefront. I am FOR a bodward going through town, burying laines and a public transit first project.	See Comment #20

					We own it to future generations to come up with planet centered solutions to staffic congestion, not plane that increase the profits of concrete and construction companies. It's 2021, is our imagination death? So dead that the only solution we contained up with its double the save of constituting that has already below on expeciations? Does not make senses to these an ansalve highway coft frough the middle of an agrier to that series? This week liament that TICDOT has divided an incommonate linguist about home sections, expensive in efforts solve it uses the order to what the profit cost is the series were well as well have full to TICDOT on divided an incommonate linguist about profits each order to series the series of the condition of the third process. In order to the profit solve it uses the code that the process. Law well havened that ITDOT on order data deem? support their claims for expension. What	
2223	Mark Armstrong				am I supposed to conclude other than that TUDOT is making a bad faith argument? Please find an alternative to explansion, one that will work for current residents, for the planet, and for future generations.	
				Latent/Induced Demand	Think yet to find any authoritative evidence that supports the claim that this expansion will alleviate congestion. I've read the opposite. Expansion will resid in Induced Demand, an increase in buffic congestion. Given that we read daily about the climate crisis and the destruction it's already causing, it's abound that this expansion is even being considered.	See Comment #18
				Recial Justice	The highway is a wound that we residents live with daily, Historically LSS has segregated the city. This expension will do nothing to heal the environmental radium that communities of color in Audin have endured for a contary.	Sea Comment #3

As a contract with the contrac						Riverside Dr. This design would properly separate local and through raffic, similar to an HOV laine, and allows the Intentate to be as wide as 5 laines in each direction within its existing right of way limits. Very few properties would be displaced, fulfilling the City Council's request. The 1-35 foretage road is named "East Ave" in all figures.	
Do not extensive this property formers and the first of the state of the first of t	2664	Phillip Hissam	3/5/2023	Fmail	Do not widen/no build	To improve connections between either side of the highway, connections to the highway must be broken. Using the design above, easil-vest connections can easily be created at: Lamble 93, 3rd st, 5th st, 5th st, 5th st, 15th 15th st, 30th 93, Concordia Awa, and 44.st 52/Wilshire Blvd. The Waterbo Generous Project will indicented be existing Pairs Park. The cap designed adjacent to this park between 5th st and Chear Chavez, and between Chear Chavez and Lamble 92, would be the largest Cass within the creiest limits.	
Do not extensive this property formers and the first of the state of the first of t						As stanted earlier, it is unclear why the narrow highway design between Dean Keeton and Manter is not continued throughout the project. To reduce Induced Demand and promote carpoding, do 2 HOV lanes and 3 maintaines per direction. Or, do 1 HOV lanes and 4 maintaines per direction. Do not create a 6-lane highway per direction. Unclear why HOV lanes have dedicated entrance/exit overpasses if the lane is intended for through traffic. These entrance/exit overpasses create

						Recommendation: TPMD recommends that compensatory mitigation for impacts to Waters of the U.S. should be listed in all necessary sections. Additionally, TPMD recommends compensatory mitigation for all losses of Waters of the U.S. due to unavoidable impacts from the
						project, including (non-normalization reasonsesse primities). TabOT Reasones: TabOT is exercised with the LA. Army Cores of Engineering on all water resources related permitting. More information on this topic will be available in the Final ES.
						Recommendation: TPMD recommends the placement of energy dissipators to reduce water velocity to minimize ension in the project area. T.XOT Response: TxDOT is planning to incorporate energy dissipation at the drainage turnel outfall into the Colorado River.
					Mobility35 Program Manager Tommy Abrego, 1 am a resident of Audith (District 6) and am writing to express my opposition to TiCOT's proposed plan to expand Intensitate 35 through Austin. It is my belief that this plan is not in the public's best intensit. As more drivers begin to use the	See Contrient #5
					I am a resident of Austin (District 6) and am writing to express my opposition to TxXXV proposed plan to expand inventors the St through Austin. It is my belief that this plan is not in the public these interest. As more drivers being to use the amended hybrid through traffic volumes inventors are inventors and an inventor of the standard inventors are inventors.	
					leading to more congestion and pollution. This means that the proposed plan would only create more congestion and gridlock, which is not a long-term solution to Austin's traffic problems.	
				Do not widen/no build	and the figure of the control of the	
					I hope that you will consider these concerns and reconsider the proposed plan for expanding Intensiste 35.	
3141	SYDNEY BECKNER			Latent/Induced Demand	Equanding highways and adding more laines may seem like a logical studenth or veduors traffic congestion. However, studies have shown that this approach actually leads to increased traffic and congestion in the long for. This phenomenon is brown as included between the contract. When additional laines or result are added to a highway, it could not now provide for cars to more, which should you that in feature has been destinated in the contract and the contract	See Comment #18
					However, this additional capacity util mately attracts more drivers who may have previously excided the highway due to traffic.	
				Business/residential displacement	Additionally, I am deeply concerned about the displacement of homes and businesses that would be caused by this plan. These individuals and femilies have built their fives and livelihoods in these areas, and their fives and scientificant discontine to their fives and invalidation of the caused by this plan. These individuals and femilies have built their fives and invalidation of the caused by this plan.	Sas Germant #21
					and their displacement would close a significant disoption to their lines.	
				Public transit/Multimodal transportation	Therefore, instead of experiong highways and adding more laines, it is essential to invest in sustainable transportation options such as public bankit, biking, and walking infrastructure. These options can promote a more efficient and equitable transportation system, reduce traffic congestion, and mitigate climate change.	See Comment #13
