STRATEGIC PUBLIC ENGAGEMENT MEETING OPPORTUNITIES

The goal is to ensure that the right meeting group(s) are engaged at the right time. This may require multiple meetings with different meeting groups to arrive at a decision.

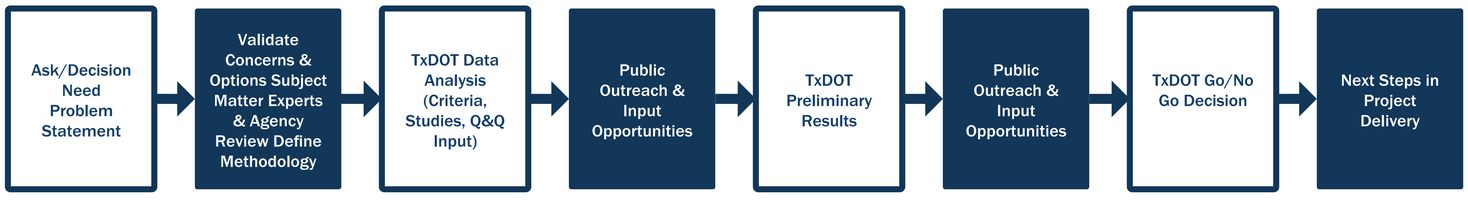

PUBLIC ENGAGEMENT OBJECTIVES

1. **Transparent Communication:** Establishing transparent and bidirectional communication avenues to foster open dialogues between decision-makers and the public.
2. **Stakeholder Engagement:** Soliciting input from all stakeholders, especially those directly impacted by the project, including residents, business proprietors, property holders, commuters, and community leaders.
3. **Clear Information Dissemination:** Providing clear and easily understandable information regarding the NHHIP to empower the public to contribute constructively to decisions.
4. **Inclusiveness:** Actively involving a diverse array of perspectives and voices in the decision-making process, including representatives from traditionally marginalized communities.
5. **Collaboration and Partnership:** Leveraging collaboration and partnership with grassroots community groups, advocacy organizations, and other stakeholders to tap into collective knowledge and expertise.
6. **Continuous Improvement:** Proactively seeking input on the public involvement process itself to consistently enhance future decision-making endeavors.

PUBLIC ENGAGEMENT TOOLS

THE CONSENSUS BUILDING PROCESS

STRATEGIC STAKEHOLDER RESOURCE GROUP MEETINGS
