# APPENDIX G
# HAZARDOUS MATERIALS TECHNICAL REPORT

# Hazardous Materials Technical Report

## North Houston Highway Improvement Project

From US 59/I-69 at Spur 527 to I-45 at Beltway 8 North
CSJ 0912-00-146
Prepared by: TxDOT Houston District
Date: February 2017

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327, and a Memorandum of Understanding dated December 16, 2014 and executed by FHWA and TxDOT.

# Introduction

The presence or suspected presence of hazardous material that may potentially influence a project creates a multitude of problems affecting right-of-way (ROW) acquisition, project development and construction. This Hazardous Materials Technical Report analyzes the potential hazardous materials effects (or "impacts") that would result from the construction and operation of the project as discussed below. The proposed project begins at the interchange of Interstate Highway 45 (I-45) and Beltway 8 North and continues south along I-45 to Downtown Houston where it terminates at the interchange of United States Highway (US) 59/I-69 and Spur 527 south of Downtown Houston. The project area also includes portions of I-10 and US 59/I-69 near Downtown Houston. The proposed project is composed of three segments, Segments 1-3, for which reasonable alternatives are evaluated in the Draft Environmental Impact Statement (DEIS) (Exhibit 1).

## *Existing Facilities*

**Segment 1: I-45 from Beltway 8 North to north of I-610 (North Loop)**

I-45 within this segment consists of eight general purpose lanes (i.e., mainlanes; four lanes in each direction), four frontage road lanes (two lanes in each direction), and a reversible high occupancy vehicle (HOV) lane in the middle, all within a variable ROW of 250 to 300 feet. The existing posted speed limit along the general purpose lanes and reversible HOV lane is 60 miles per hour (mph). The existing posted speed limit for the frontage roads is 45 mph. The length of Segment 1 is approximately 8.8 miles, and the area of the existing ROW is approximately 347 acres.

**Segment 2: I-45 from north of I-610 (North Loop) to I-10**

I-45 within this segment primarily consists of eight at-grade general purpose lanes (four lanes in each direction), six frontage road lanes (three lanes in each direction), and a reversible HOV lane in the middle, all within a variable ROW of 300 to 325 feet. Segment 2 also includes a depressed section that consists of eight general purpose lanes (four lanes in each direction) and a reversible HOV lane in the middle, all below grade, within a 245-foot ROW. The six frontage road lanes associated with the depressed section (three lanes in each direction) are located at-grade. The existing posted speed limit is 60 mph along the general purpose lanes, 55 mph along the reversible HOV lane, and 40 mph along the frontage road lanes. The I-45 and I-610 frontage roads are discontinuous at the I-45/I-610 interchange. The length of Segment 2 is approximately 4.5 miles, and the area of the existing ROW is approximately 220 acres.

**Segment 3: Downtown Loop System (I-45, US 59/I-69, and I-10)**

The Downtown Loop System consists of three interstate highways that create a loop around Downtown Houston. I-45 forms the western and southern boundaries of the loop and is known locally as the Pierce Elevated because it partially follows the alignment of Pierce Street. I-10 forms the northern boundary of the loop, and US 59/I-69 forms the eastern boundary of the loop. The loop includes three major interchanges: I-45 and I-10, I-10 and US 59/I-69, and US 59/I-69 and I-45. The interchange of US 59/I-69 and Spur 527 is located south of Downtown Houston.

I-45 along the west side of Downtown Houston consists of six elevated general purpose lanes (three lanes in each direction) within an existing ROW of 205 feet. I-45 along the south side of Downtown Houston (the Pierce Elevated) consists of six elevated general purpose lanes (three lanes in each direction). I-10 north of Downtown Houston, between I-45 and US 59/I-69, consists of 10 general purpose lanes (five lanes in each direction) within an existing ROW of 420 feet. US 59/I-69 along the east side of Downtown Houston consists of six general purpose lanes (three lanes in each direction) within an existing ROW of 225 feet. Generally, local streets serve as one-way frontage roads within Segment 3, except near the I-10 and US 59/I-69 interchange, where the frontage roads are discontinuous. The length of Segment 3, which includes the Downtown Loop System, is approximately 7.1 miles, and the existing ROW area is approximately 637 acres.

## *Proposed Alternatives*

**Segment 1: I-45 from Beltway 8 North to north of I-610 (North Loop)**

*Segment 1, Alternative 4: Widen I-45 Mostly to the West (Proposed Recommended)*
Alternative 4 would widen the existing I-45 on the west side of the roadway to accommodate four managed express (MaX) lanes. The proposed typical section would include eight general purpose lanes (four lanes in each direction), four MaX lanes (two lanes in each direction), and six frontage road lanes (three lanes in each direction), all at-grade. Alternative 4 would require approximately 200 to 225 feet of new ROW to the west of the existing I-45. This alternative would require small amounts of land to the east of the existing I-45 ROW at major intersections and between Crosstimbers Street and I-610. Approximately 212 acres of new ROW would be required for this alternative. The length of this alternative would be approximately 8.8 miles.

*Segment 1, Alternative 5: Widen I-45 Mostly to the East*
Alternative 5 would widen the existing I-45 along the east side of the roadway to accommodate four MaX lanes. The proposed typical section would include eight general purpose lanes (four lanes in each direction), four MaX lanes (two lanes in each direction), and six frontage road lanes (three lanes in each direction), all at-grade. Alternative 5 would require approximately 200 to 225 feet of new ROW to the east of the existing I-45. This alternative would require small amounts of land to the west of the existing I-45 ROW at major intersections. Approximately 239 acres of new ROW would be required for this alternative. The length of this alternative would be approximately 8.8 miles.

*Segment 1, Alternative 7: Widen I-45 on Both Sides*
Alternative 7 would widen the existing I-45 along both the east and west sides of the roadway to accommodate four elevated MaX lanes. The proposed typical section would include eight general purpose lanes (four lanes in each direction) at-grade, four elevated MaX lanes (two lanes in each direction) on a single structure constructed along the center of the roadway, and six frontage road lanes (three lanes in each direction) at-grade. Alternative 7 would require approximately 45 to 80 feet of new ROW along both sides of the existing I-45. Approximately 120 acres of new ROW would be required for this alternative. The length of this alternative would be approximately 8.8 miles.

**Segment 2: I-45 from north of I-610 (North Loop) to I-10 (including the interchange with I-610)**

*Segment 2, Alternative 10: Add Four MaX Lanes to I-45 (Proposed Recommended)*
Alternative 10 would widen the existing I-45 to accommodate four MaX lanes. Within the at-grade section of I-45, the proposed typical section would include eight general purpose lanes (four lanes in each direction), four MaX lanes (two lanes in each direction), and four frontage road lanes (two lanes

in each direction), all at-grade. For this alternative, I-45 would be depressed from north of Cottage Street to Norma Street, a distance of approximately 1,800 feet. Within the depressed section of I-45, the proposed typical section would include eight below-grade general purpose lanes (four lanes in each direction), and four below-grade MaX lanes (two lanes in each direction), while the four frontage road lanes (two lanes in each direction) would be at-grade. The proposed I-45 and I-610 frontage roads would be continuous through the I-45/I-610 interchange. Alternative 10 would require new ROW for the at-grade section between I-610 and Cottage Street, and between Little White Oak Bayou and Norma Street. Approximately 19 acres of new ROW would be required for this alternative. The length of this alternative, including interchange improvements, would be approximately 4.5 miles.

This alternative provides an opportunity to include a structural "cap" over a portion of the depressed lanes of I-45 from north of Cottage Street to south of N. Main Street. This area could be used as open space. The open space option is conceptual only and would be separate from the Texas Department of Transportation's (TxDOT's) roadway project. Any open space would require development and funding by parties other than TxDOT.

*Segment 2, Alternative 11: Add Four Elevated MaX Lanes in the Center of I-45*

Alternative 11 would widen the existing I-45 and add four elevated MaX lanes. Within the at-grade section of I-45, the proposed typical section would include eight general purpose lanes (four lanes in each direction) and four frontage road lanes (two lanes in each direction), all at-grade, while the four MaX lanes (two lanes in each direction) would be elevated on a single structure at the center of the roadway. Within the depressed section of I-45, the proposed typical section would include eight general purpose lanes (four lanes in each direction) below grade, four MaX lanes (two lanes in each direction) elevated on a single structure at the center of the roadway, and four frontage road lanes (two lanes in each direction) at-grade. The proposed I-45 and I-610 frontage roads would be continuous through the I-45/I-610 interchange. New ROW would be required for the at-grade section between I-610 and Cavalcade Street to accommodate the proposed improvements at the I-45/I-610 interchange. No new ROW would be required for the depressed section. Approximately 10 acres of new ROW would be required for this alternative. The length of this alternative, including interchange improvements, would be approximately 4.5 miles.

*Segment 2, Alternative 12: Add Four MaX Lanes (Two Elevated) in the Center of I-45*

Alternative 12 would widen the existing I-45 and add two elevated and two at-grade MaX lanes. Within the at-grade section of I-45, the proposed typical section would include eight general purpose lanes (four lanes in each direction) and four frontage road lanes (two lanes in each direction), all at-grade, while the four MaX lanes (two lanes in each direction) would be stacked (the two northbound MaX lanes would be at-grade and the two southbound MaX lanes would be elevated on a single structure along the center of the roadway). Within the depressed section of I-45, the proposed typical section would include eight general purpose lanes (four lanes in each direction) below grade, four MaX lanes (two lanes in each direction) that would be stacked (the two northbound MaX lanes would be below grade and the two southbound MaX lanes would be elevated on a single structure along the center of the roadway), and four frontage road lanes (two lanes in each direction) that would be at-grade. The proposed I-45 and I-610 frontage roads would be continuous through the I-45/I-610 interchange. New ROW would be required for the at-grade section between I-610 and Cavalcade Street to accommodate the proposed improvements at the I-45/I-610 interchange. No new ROW would be required for the depressed section. Approximately 12 acres of new ROW would

be required for this alternative. The length of this alternative, including interchange improvements, would be approximately 4.5 miles.

**Segment 3: Downtown Loop System (I-45, US 59/I-69, and I-10)**

*Segment 3, Alternative 10: Widen I-45 to 10 Lanes*

Alternative 10 is an "improve existing" alternative, with the existing interstate highways around Downtown Houston remaining in their current configuration. Alternative 10 would widen the existing I-45 within its existing footprint along the west and south sides of Downtown Houston. The elevated portion of I-45 west and south of Downtown would be reconstructed. The proposed typical section of the widened I-45 would include 10 elevated general purpose lanes; however, the lane configuration would be altered to have six northbound lanes and four southbound lanes. The I-45 MaX lanes proposed in Segments 1 and 2 would terminate in the Downtown area in Segment 3. The I-45 MaX lanes would be parallel to I-10 in the vicinity of the I-45/I-10 interchange and would terminate/begin at Milam Street/Travis Street, respectively. I-10 along the north side of Downtown, between I-45 and US 59/I-69, would be slightly realigned to accommodate four elevated I-10 express lanes (two lanes in each direction) on this segment of I-10. The I-10 express lanes would generally be parallel to I-10, and located on the north side of White Oak Bayou. West of the I-45/I-10 interchange, the I-10 express lanes would connect to the existing I-10 HOV lanes. US 59/I-69 along the east side of Downtown would generally remain in its current configuration. Alternative 10 would require new ROW along I-45 from I-10 to Houston Avenue and from Brazos Street to US 59/I-69. Alternative 10 would require approximately 76 acres of new ROW. The length of this alternative, including interchange improvements, would be approximately 4.4 miles.

*Segment 3, Alternative 11: Realign I-45 along I-10 and US 59/I-69 (Proposed Recommended)*

Alternative 11 would reroute I-45 to be coincident with US 59/I-69 on the east side of Downtown Houston. The existing elevated I-45 roadway along the west and south sides of Downtown would be removed and relocated to be parallel to I-10 on the north side of Downtown and parallel to US 59/I-69 on the east side of Downtown. Access to the west side of Downtown would be provided via "Downtown Connectors," which would provide access to and from various Downtown streets. To improve safety and traffic flow in the north and east portions of the proposed project area, both I-10 and US 59/I-69 would be realigned to eliminate the current roadway curvature. I-45 and US 59/I-69 would be depressed along a portion of the alignment east of Downtown. South of the George R. Brown Convention Center, I-45 would begin to elevate to the interchange of I-45 and US 59/I-69 southeast of Downtown, while US 59/I-69 would remain depressed as it continues southwest toward Spur 527. The four proposed I-45 MaX lanes in Segments 1 and 2 would terminate/begin in Segment 3 at Milam Street/Travis Street, respectively. I-10 express lanes (two lanes in each direction) would be located generally in the center of the general purpose lanes within the proposed coincidental alignment of I-10 and I-45 on the north side of Downtown. The I-10 express lanes would vary between being elevated and at-grade. Approximately 190 feet of new ROW to the east of the existing US 59/I-69 along the east side of Downtown would be required to accommodate the proposed realigned I-45. The existing Hamilton Street would be realigned to be adjacent to US 59/ I-69 to serve as the southbound frontage road, and the existing St. Emanuel Street would serve as the northbound frontage road. Alternative 11 would require approximately 160 acres of new ROW, the majority of which would be for the I-10 and US 59/I-69 realignments, and to construct the proposed I-45 lanes adjacent to US 59/I-69 along the east side of Downtown. The length of this

alternative, including roadway realignments and interchange improvements, would be approximately 12.0 miles.

This alternative provides an opportunity to include a structural "cap" over the proposed depressed lanes of I-45 and US 59/I-69 from approximately Commerce Street to Lamar Street. This area could be used as open space. The open space option is conceptual only and would be separate from TxDOT's roadway project. Any open space project would require development and funding by parties other than TxDOT.

*Segment 3, Alternative 12: Realign Northbound I-45 along US 59/I-69 and I-10*
Alternative 12 would reroute northbound I-45 to be coincident with US 59/I-69 on the east side of Downtown Houston. An elevated structure would be constructed to accommodate four I-45 northbound general purpose lanes that would be located east of the existing US 59/I-69 general purpose lanes. Northbound I-45 traffic would continue on elevated lanes constructed between the I-10 general purpose lanes, then would move northward into Segment 2. Southbound I-45 traffic at the I-45/I-10 interchange northwest of Downtown would be directed onto one-way general purpose lanes along the west and south sides of Downtown, following the existing Pierce Elevated footprint. The four proposed I-45 MaX lanes in Segments 1 and 2 would terminate/begin in Segment 3 at Milam Street/Travis Street, respectively. I-10 express lanes (two lanes in each direction) are proposed to be located along the portion of the existing I-10 north of Downtown between the interchanges of I-10 and I-45, and I-10 and US 59/I-69. Near the US 59/I-69 interchange, the I-10 express lanes would be located at-grade in the center of the general purpose lanes, then would shift to become elevated and generally parallel to I-10, but located on the north side of White Oak Bayou. West of the I-45/I-10 interchange, the I-10 express lanes would connect to the existing I-10 HOV lanes. US 59/I-69 along the east side of Downtown would generally remain in its current configuration, with the I-45 one-way northbound lanes being immediately adjacent to this segment of US 59/I-69. Alternative 12 would require approximately 109 acres of new ROW. The length of this alternative, including interchange improvements, would be approximately 9.8 miles.

The project area traverses urbanized areas of Houston with minimal undeveloped spaces. The project area is composed of existing I-45 and other roadway ROW, and the proposed ROW for project alternatives (Segment 1 – Alternatives 4, 5, and 7; Segment 2 – Alternatives 10, 11, and 12; and Segment 3 – Alternatives 10, 11, and 12).

For any of the nine reasonable alternatives, impacts associated with hazardous materials would most likely occur during construction and would be related to activities on or near existing hazardous material sites present in the vicinity of the ROW. The hazardous material sites either have impacted or have the potential to impact the existing environment due to the presence or likely presence of hazardous substances or petroleum products in, on, or at a site. Regulated sites also have the potential of affecting adjacent properties, creating an environmental risk associated with the acquisition of those properties. ROW acquisition would be required for the Preferred Alternative. Prior to ROW negotiation and/or acquisition, a Phase I Environmental Site Assessment (ESA) would need to be conducted for the Preferred Alternative in accordance with the current American Society for Testing Materials (ASTM) Standard and TxDOT guidance. Based on the results of the Phase I ESAs, additional sampling and analysis activities (and possibly remedial activities) may be necessary at

certain sites or facilities. If contamination were to be confirmed at different sites, TxDOT would develop appropriate soil and/or groundwater management plans for activities within these areas.

The proposed project poses a risk of encountering hazardous materials during project development due to the extensive length of the project corridor the size of the area potentially affected (acreage), and the current and past land use. Constraints mapping has been conducted to document and communicate hazardous materials issues that may potentially impact project design or construction and provides an understanding of the possible need for further investigation, consideration and/or coordination required for subsequent stages of project development.

## *Sites of Potential Contamination Search*

A preliminary assessment was conducted to identify sites potentially affected by or affecting one or more of the NHHIP reasonable alternatives that are at "risk" of environmental contamination by hazardous materials. This initial assessment or Hazardous Materials Initial Site Assessment (ISA) was conducted to identify areas of potential concern for further investigation or precautionary actions. The components of an ISA include reviewing project design and ROW requirements, reviewing existing and previous land use, reviewing federal and state regulatory databases and files, conducting project site visits or field investigations, and conducting interviews, as needed. No title searches, interviews, or consultation with local, state, or federal authorities were conducted for the ISA. Further discussion regarding the findings of the ISA is presented in subsequent sections of this document; a copy of the Hazardous Materials ISA Report is provided in Appendix A.

## *Review of Regulatory Agency Databases and Files*

A review of selected environmental regulatory databases published by federal and state agencies was conducted to determine the potential for hazardous material issues within and near the NHHIP Corridor project area. The review of the regulatory databases was performed in general accordance with the ASTM Standard E1527-13 and TxDOT guidelines, which defines the environmental record sources to be reviewed and their minimum search distances.

Geographic Information System (GIS) spatial data layers of the available hazardous material environmental records were overlaid onto existing maps of the proposed project area for the three segments in order to locate the documented sites associated with the ASTM regulatory database search. The database report compiled for this study originally consisted of 97 environmental regulatory database reports prepared by Environmental Data Resources, Inc. (EDR) on May 22, 2014. A total of 4,691 sites (many of which are listed across multiple databases) were identified in the project area. However, for the purposes of identifying potential hazardous material sites and issues within the project area, only ASTM-specified standard record sources and search criteria were used for the regulatory records review. The limits of the study area were extended slightly during the planning process and additional database reports and GIS spatial data layers for these areas were prepared by EDR on March 23, 2015. Table 1 lists the standard federal and state agency databases that were searched within the minimum recommended search distances from the project area, as defined by ASTM E1527-13. The table also includes other non-ASTM records and search criteria provided in TxDOT's Hazardous Material ISA guidelines. Summary information of the regulatory database reports are provided in Appendix B. Complete copies of the EDR environmental database reports are on file at the TxDOT Houston District office.

Table 1: Summary of Search Distances and Environmental Database Record Results

| Database | Radius Searched from Project Limits (miles) | Number of Sites Recorded within Search Radius |
|---|---|---|
| **Federal ASTM Standard Records** | | |
| Federal National Priority List (NPL) | 1.00 | 0 |
| De-listed NPL | 0.50 | 0 |
| Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) | 0.50 | 4 |
| Federal CERCLIS-No Further Action Planned (NFRAP) | 0.50 | 12 |
| Federal Corrective Action Report System (CORRACTS) | 1.00 | 2 |
| Federal Resource Conservation and Recovery Act [RCRA] Information System (RCRIS)-TSD (RCRA Treatment, Storage and Disposal [TSD] Facility) | 0.50 | 0 |
| Federal RCRA Large Quantity Generator | 0.25 | 4 |
| Federal RCRA Small Quantity Generator | 0.25 | 19 |
| Federal RCRA Conditionally Exempt Small Quantity Generator | 0.25 | 28 |
| Emergency Response Notification System (ERNS) | property only | 26 |
| Engineering Controls Sites List (EC) | property only | 0 |
| Sites with Institutional Controls (IC) | property only | 0 |
| **State ASTM Standard Records** | | |
| State Superfund Registry (SHWS) | 1.00 | 0 |
| Permitted Solid Waste Facilities (SWF/LF) | 0.50 | 0 |
| Closed Landfill Inventory (CLI) | 0.50 | 4 |
| Leaking Petroleum Storage Tanks (LPST) | 0.50 | 397 |
| Underground Storage Tanks (UST) | 0.25 | 508 |
| Aboveground Storage Tank Database (AST) | 0.25 | 58 |
| Sites with Institutional Controls (AUL) | 0.50 | 21 |
| Voluntary Cleanup Program Database (TX VCP) | 0.50 | 92 |
| Brownfields Site Assessments (BROWNFIELDS) | 0.50 | 13 |
| Industrial & Hazardous Waste Database with Corrective Action (IHW CORR ACTION) | 1.00 | 28 |
| **Tribal ASTM Standard Records** | | |
| Indian Reservations (INDIAN RESERV) | 1.00 | 0 |
| LUSTs on Indian Land (INDIAN LUST) | 0.50 | 0 |
| USTs on Indian Land (INDIAN UST) | 0.25 | 0 |
| Indian Open Dump Inventory (INDIAN ODI) | 0.50 | 0 |
| Indian VCP (INDIAN VCP) | 0.50 | 0 |
| **Other Records (Non-ASTM Standard)** | | |
| TCEQ Innocent Owner/Operator Program (IOP) | 0.50 | 9 |
| Texas Railroad Commission VCP (RRC VCP) | 0.50 | 0 |
| Texas Drycleaners (TX Drycleaners) | 0.50 | 34 |
| EDR proprietary records - Manufactured Gas Plants | 1.00 | 4 |
| EDR proprietary records – Former Hist. Auto Stations | 1.00 | 1,568 |
| EDR proprietary records – Former Hist. Dry Cleaners | 1.00 | 594 |

Source: EDR DataMap Corridor Study, May 22, 2014 and EDR DataMap Area Study, March 24, 2015, TxDOT Hazardous Materials ISA Report, ASTM Standard E1527-13.

Review of the regulatory databases identified 1,216 federally-and state-listed facilities within the ASTM search radii of the three highway Segments. Four facilities are listed on the EPA's CERCLIS list, 12 facilities are listed on the EPA's NFRAP database, 2 facilities are listed on the EPA's CORRACTS list, 51 facilities on the EPA's RCRIS database, 26 facilities on the EPA's ERNS database, 4 facilities are listed on the TCEQ CLI database, 397 facilities are listed on the TCEQ's LPST database, 508 facilities are listed on the TCEQ's UST database, 58 facilities are listed on the TCEQ's AST database, 21 facilities are listed on the TCEQ's AUL database, 92 facilities are listed on the TCEQ's VCP database, 13 facilities are listed on the TCEQ's BROWNFIELDS database, and 28 facilities are listed on the TCEQ's IHW CORR ACTION list. The database also included a review of non-ASTM databases including the TCEQ's IOP program and TX Drycleaners, the RRC VCP program, and EDR's proprietary databases which includes listings of former Auto Stations, Dry Cleaners, and Manufactured Gas Plants located within the ASTM search radius. The EDR proprietary databases represent a collection of business directories compiled by EDR that presents unique data about past sites and operations that typically create environmental concerns but may not show up in current government record searches. The former historical auto station database includes mainly gas station/filling station/service station establishments and the historical dry cleaners database includes mainly former dry cleaning, laundry, and laundromat establishments. Manufactured gas plants were used in the United States from the 1800's to 1950's to produce gas that could be distributed and used as fuel. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals) were frequently disposed of directly at the plant site, potentially causing a continuous source of soil and groundwater contamination.

A total of 1,362 ASTM hazardous material records are associated with the 1,216 sites within the study area. There are more hazardous material records than sites recorded because many individual sites are listed in more than one environmental database. For example, the Greenspoint Dodge facility at 11655 North Freeway is listed on multiple databases, including the UST, LPST, VCP and IHW CORR ACTION lists. In addition, a total of 2,166 EDR proprietary record sites (Non-ASTM Standard Database sites including former gas stations, dry cleaners and manufactured gas plants compiled by EDR researchers) are located within the project area.

A field investigation was conducted on April 21 and 22, 2015 to verify approximate locations of the documented sites within the proposed ROWs of the nine alternatives identified in three Segments for the proposed project corridors and to identify other potential environmental concerns and risks that may not have been previously documented for the project area. Table 2 identifies regulated hazardous material sites within the ASTM search distances for the nine alternatives. Exhibits that depict the general location of these sites, as mapped by EDR, are provided in Appendix B.

Table 2: Regulated Hazardous Materials Sites Within ASTM Standard Search Distance of the Nine Reasonable Alternatives

| MAP ID | Facility Name | Facility Address | Status/Comments | Within ASTM Standard Search Radius of Alternatives |
|---|---|---|---|---|
| **EPA - Comprehensive Environmental Response, Compensation & Liability Information System (CERCLIS)** | | | | |
| 153 | Dee Foundries Inc. | 2408 EVERETT STREET | Not on the NPL. Referred for removal, no further assessment. | Segment 3, All |
| 161 | Davis Road Drum Site | 1705 DAVIS STREET | Not on the NPL. Event occurred in 1990. | Segment 3, All |
| 161 | May Cooperage, Inc. | 1714 DAVIS STREET | Not on the NPL. | Segment 3, All |
| 189 | RIO NEUQUEN/ALUMINUM PHOSPHIDE | Houston, Texas 77201-PORT OF HOUSTON AUTHORITY | Not on the NPL. Located at Port of Houston Authority - Dock 9. | Segment 3, All |
| **EPA - No Further Remedial Action Planned (NFRAP)** | | | | |
| 23 | Duke's Disposal | 10303 NW Freeway 77092 | Not on the NPL. | Segment 1, All |
| 71 | TREES INC | 7072 STUEBNER AIRLINE | Not on the NPL. | Segment 1, All |
| 51 | SOUTHWEST OIL SERVICE | 1403 ENNIS STREET | Not on the NPL. | Segment 3, All |
| 55 | ATOCHEM CHEMICALS | 1606 HENDERSON STREET | Not on the NPL. | Segment 3, All |
| 109 | JAMES DAVIS SITE | 150 VAN MOLAN | Not on the NPL. | Segment 1, All |
| 164 | HERRING SERVICE CO | 1706 MAURY | Not on the NPL. | Segment 3, All |
| 170 | NL INDUSTRIES INC | 1417 HARDY ST | Not on the NPL. | Segment 3, All |
| 189 | MEKLO PROCESSING COMPANY | 1803 DALLAS | Not on the NPL. | Segment 3, All |
| 189 | HOUSTON GAS LIGHT COMPANY | 1515 COMMERCE | Not on the NPL. | Segment 3, All |
| 199 | ALLEN PARKWAY VILLAGE | 1600 ALLEN PARKWAY | Not on the NPL. | Segment 3, All |
| 202 | LEAD PRODUCTS COMPANY INC | 709 N VELASCO | Not on the NPL. | Segment 3, All |
| 215 | HARRISON JET GUNS | 6915 HUDSON VILLAGE CREEK ROA | Not on the NPL. | Segment 3, All |
| **EPA - Corrective Action Report System (CORRACTS)** | | | | |
| 202 | LEAD PRODUCTS COMPANY INC | 709 N VELASCO | Certification Of Remedy Completion; this site is located greater than 3,500 feet from existing ROW. | Segment 3, All |
| 204 | DIXIE ELECTRO PLATING | 3001 ENGELKE ST | Stabilization Measures Implemented; this site is more than 3,000 feet from existing ROW. | Segment 3, All |
| **EPA - Resource Conservation and Recovery Information System (RCRIS) Generators** | | | | |
| There are 51 RCRIS Generator facilities within the searched area. RCRIS facilities located within the right-of way of the proposed alternatives are summarized in Table 3 below. RCRIS facilities located outside of the proposed ROW or not adjacent to the proposed ROW are not considered an environmental concern to the proposed project. A complete list of the RCRIS Generator facilities in the searched area is provided in Appendix B. | | | | Segments 1, 2, 3, All |

| TCEQ - Industrial & Hazardous Waste Database with Corrective Action (IHW CORR ACTION) | | | | |
| There are 28 IHW CORR ACTION facilities within the searched area. IHW CORR ACTION facilities that are located within or adjacent to the proposed right-of way are summarized in Table 3 below. IHW CORR ACTION facilities located outside of the proposed ROW or not adjacent to the proposed ROW are not an environmental concern to the proposed project. A complete list of the IHW CORR ACTION facilities in the searched area is provided in Appendix B. | | | | All |

There are four CERCLIS Sites in the searched area of the project limits. The four CERCLIS sites are commercial and industrial facilities including an aluminum and copper foundry and a drum storage facility located more than one mile north of Downtown Houston. The closest CERCLIS site is the Rio Neuquenal/Aluminum Phosphide Site, which is related to a 1984 release of aluminum phosphate into the Buffalo Bayou from a vessel (the Rio Neuquenal) located at the Port of Houston near Downtown. Although these sites were identified in the searched area, none of the four CERCLIS sites are located within or adjacent to the proposed ROW. Based on the current regulatory status and distance from the proposed ROWs, none of these four CERCLIS sites are likely to pose an environmental risk to the proposed project.

The 12 CERCLIS NFRAP facilities include commercial and industrial facilities where preliminary assessment has been completed and determined that no further remedial action is planned. There is one CERCLIS NFRAP facility plotted within the proposed ROW of Alternatives 4, 5 and 7 of Segment 1. Further information regarding this facility and its current regulatory status and estimated level of risk is provided in Table 3 below. None of the remaining 11 CERCLIS NFRAP facilities are located within or adjacent to the proposed ROW of the three Segments. Based on the regulatory status and distance of these sites from the proposed ROWs, none of the 11 CERCLIS NFRAP sites are likely to pose an environmental risk to the proposed project.

The two CORRACTS sites include an electroplating company and a lead product company that are registered as handlers of hazardous waste with corrective action activity. Although these two sites were plotted in the searched area, neither of the two CORRACTS sites are located within or adjacent to the proposed ROW. Based on the review of the EDR database and GIS dataset analysis, the two sites are located more than 3,000 feet away from the proposed ROWs. Based on their current regulatory status and distance from the proposed ROWs, neither of these CORRACTS sites are likely to cause an environmental risk to the proposed project.

The RCRIS facilities plotted within the searched area include four large quantity generators, 19 small quantity generators and 28 conditionally exempt small quantity generators. There are 12 small quantity generator sites (SQG), seven conditionally exempt small quantity generator (CESQG) sites

and one large quantity generator (LQG) site located within or adjacent to the proposed ROWs. Further information regarding these facilities and their current regulatory status and estimated level of risk is provided in Table 3 below. None of the remaining RCRIS facilities are located within or adjacent to the proposed ROWs. Based on the regulatory status and distance of these sites from the proposed ROWs, none of the remaining RCRIS sites are likely to pose an environmental risk to the proposed project.

The 26 ERNS facilities are associated with accidental releases of oil and hazardous substances. There are two ERNS facilities plotted within or adjacent to the proposed ROWs of Alternatives 10, 11 and 12 of Segment 3. Further information regarding these facilities and their current regulatory status and estimated level of risk is provided in Table 3 below. None of the remaining ERNS facilities are plotted within or adjacent to the proposed ROW. Based on the regulatory status and distance of these sites from the proposed ROWs, none of the remaining ERNS sites are likely to pose an environmental risk to the proposed project.

Four CLI facilities are located in the searched area of the project limits. None of the four CLI sites are plotted within the proposed ROWs of the three segments. One CLI facility is plotted adjacent to the proposed ROWs of Segment 3. Further information regarding this facility and its current regulatory status and estimated level of risk is provided in Table 3 below. Based on the regulatory status and distance of the three remaining CLI sites from the proposed ROWs, none of the remaining CLI sites are likely to pose an environmental risk to the proposed project.

There are 508 UST sites and 58 AST sites documented in the searched area of the project limits. There are 126 UST and 5 AST records documented within or adjacent to the proposed ROWs. Further information regarding these facilities and their current regulatory status and estimated level of risk is provided in Table 3 below. The UST and AST sites were evaluated and assigned a risk ranking of either low, moderate or high. For example, a UST site was evaluated as a low risk to the proposed project if the tanks were recorded as removed from the ground, or if the site was an active site and the tanks were not reported to be leaking and/or not listed on any other regulatory database, such as the LPST list. The site was evaluated as a moderate risk if the tanks at the site were recorded as temporarily out of use, or permanently filled in place, or if the site was also listed on the LPST database where records indicated that groundwater at the site was not impacted by petroleum constituents. An UST site that was also listed on the LPST database was evaluated as a high risk if records indicated that the groundwater at the site had been impacted by petroleum constituents. Based on the regulatory status and distance of the remaining UST or AST sites in the project area, none of the remaining UST or AST sites documented in the searched area of the project limits are likely to pose an environmental risk to the proposed project.

There are 397 LPST sites documented in the searched area of the project limits. There are 92 LPST records documented within or adjacent to the proposed ROWs. The regulatory status of the LPST facilities range from active, discovery, monitoring and assessment, to closed cases. Further information regarding these facilities and their current regulatory status and estimated level of risk is provided in Table 3 below. The LPST sites were evaluated as either a moderate or a high risk site to the design and construction of the proposed project. The risk determination was made based on the nature of the release and the potential for encountering residual or migrated contamination within affected soils or groundwater at or near these locations. For example, a LPST site was evaluated as a

moderate risk if available records indicated that there was soil contamination only or minor soil impact and that groundwater at the site was not impacted. A LPST site was evaluated as a high risk if records indicated that the groundwater at the site had been impacted by petroleum constituents. Based on the distance of the LPST sites from the proposed ROWs, none of the remaining LPST sites documented in the searched area of the project limits are likely to pose an environmental risk to the proposed project. These LPST sites may still pose a risk to the environment within the searched area of the project limits, but based on their distance from the proposed ROWs and the low permeability clays mapped in the area, their potential to impact the proposed project is estimated to be low.

BROWNFIELD facilities include sites that are being cleaned or have been cleaned under EPA grant monies. There are 13 BROWNFIELD sites in the searched area of the project limits. There is one BROWNFIELD site plotted within the proposed ROW of Alternative 11 of Segment 3 and there are two other BROWNFIELD sites located adjacent to the existing ROW in Segment 3. One other BROWNFIELD site is located adjacent to the existing ROW in Segment 2. Further information regarding these facilities and their current regulatory status and estimated level of risk is provided in Table 3 below. None of the remaining bine BROWNFIELD facilities are located within or adjacent to the existing ROW or the proposed ROWs. Based on the regulatory status and distance of these sites from the proposed ROWs, none of the remaining BROWNFIELD sites are likely to pose an environmental risk to the proposed project.

IHW CORR ACTION facilities include industrial hazardous waste facilities with corrective actions. There are 28 IHW CORR ACTION sites in the searched area of the project limits. There are two IHW CORR ACTION sites plotted within the proposed ROW of Segment 1 and another three IHW CORR ACTION sites plotted within or adjacent to the proposed ROW of Segment 3. Further information regarding these facilities and their current regulatory status and estimated level of risk is provided in Table 3 below. None of the remaining 23 IHW CORR ACTION facilities are located within or adjacent to the proposed ROWs. Based on the regulatory status and distance of these sites from the proposed ROWs, none of the remaining IHW CORR ACTION sites in the project area are likely to pose an environmental risk to the proposed project.

Other non-ASTM databases prepared include a review of the Texas Railroad Commission (RRC) VCP list, the TCEQ's IOP list, TX Drycleaners and EDR's list of proprietary records of former manufactured gas plants, gas stations, and dry cleaners within the project area. No RRC VCP sites were identified in the searched area of the project limits. Nine sites are listed on the TCEQ's IOP list and 34 sites are listed on the TX Drycleaners database. None of the IOP sites are plotted within the proposed ROW of the three segments and seven of the 34 drycleaner sites are plotted within the proposed ROW of the three Segments. A total of 2,166 EDR proprietary record sites (Non-ASTM Standard Database sites including former gas stations, dry cleaners and manufactured gas plants) are located within the project area. Using the plotted location of these sites provided by EDR, the site locations were overlain onto existing aerial photographic base maps and Harris County Appraisal District tax parcel maps of the proposed project area. Using this methodology and the GIS datasets, the number of former gas stations, dry cleaner sites, or manufactured gas plants that are plotted within the proposed ROW was determined. Further information regarding these facilities and their estimated level of risk is provided in Table 3 below.

Of the 1,216 regulated sites located within the ASTM standard search radius of the project area, approximately 106 of the documented sites were determined to fall within the proposed ROWs of one or more of the nine reasonable alternatives. Many of the locations of the regulated sites plotted on the EDR maps, as well as EDR's GIS spatial data points for the regulated sites, were determined to be inaccurate based on the field investigation conducted or during the review of site locations/addresses. The location of the regulated sites was refined during the field investigation of the proposed ROWs of the reasonable alternatives using GIS analysis of recent aerial photography overlain with the tax parcel outlines and physical addresses of property tax parcels (obtained from the Harris County Appraisal District). Only parcels located within and adjacent to the proposed ROWs on either side of the roadway for the three highway Segments under review were included in the hazardous materials review and evaluation. Using this methodology, a focused evaluation of the current land use and regulatory status of the recorded sites within and adjacent to the proposed ROWs was conducted for the project limits. In addition to the field investigation performed, each of the regulated sites located within the proposed ROWs was ranked on an estimated level of environmental risk (low, moderate, or high) based on the likelihood for encountering hazardous material issues during the construction phase of the proposed project. The risk evaluation was based on the review of available information provided in the EDR database and observations made during the field investigation. In general, the estimated level of risk assigned to a site was based on the following criteria:

Low - are those sites where a potential environmental risk exists because of reported or documented historical activities, but either the likelihood for the site to affect the planned highway construction is low or the contamination at the site, if any, has been addressed to the satisfaction of the regulatory authority. For example, an active UST facility within the proposed ROW that is not listed on the LPST database or an adjacent VCP facility that has been addressed to the satisfaction of the applicable regulatory authority would be considered a low risk site.

Moderate - are those sites where an environmental risk exists because of reported historical activities, and the site has the potential to adversely impact the project during construction, but there is no conclusive evidence. Many of the EDR former gas station and dry cleaning facilities fall into this category unless there was associated EDR regulatory data revealing that the facility was also listed on other state and federal databases where there was reported or documented contamination issues.

High - are those sites where an environmental risk exists because of reported historical activities, and the determination that the site has existing contamination issues with a high potential for encountering contamination during construction and that these conditions would require additional consideration during ROW acquisition. These sites also typically have a long history of industrial or commercial use.

The documented sites identified within or adjacent to the proposed ROWs and their estimated level of risk are summarized in Table 3. Figure 2 depicts the location of each site.

Table 3: Regulated Hazardous Materials Sites Within the Proposed ROW of Reasonable Alternatives

| Map ID | Facility Name | Within Proposed Footprint or Adjacent to Reasonable Alternatives | Database | Status | Estimated Level of Risk |
|---|---|---|---|---|---|
| SEGMENT 1 – Regulated Facilities Located Within or Adjacent to Proposed ROW of Alternatives 4, 5, or 7 | | | | | |
| 11 | GREENSPOINT DODGE | Within Proposed ROWs of Alternatives 4, 5, and 7 | UST | Inactive- 4 tanks – filled in place or removed. | High |
| | | | LPST | Final concurrence issued, case closed; No groundwater (GW) impact. | |
| | | | GCC | Chlorinated solvents in GW. | |

SEGMENT 3 Notes – Summary of Findings for Former Gas Stations and Dry Cleaning facilities within Proposed ROWs of Alternatives 10, 11 or 12:
SEGMENT 3 - Alternative 10 - 4 total sites - 2 former gas stations, 2 former dry cleaners
SEGMENT 3 - Alternative 11 - 21 total sites - 13 former gas stations, 8 former dry cleaners
SEGMENT 3 - Alternative 12 - 20 sites - 10 former gas stations, 10 former dry cleaners

## *Sites of Potential Contamination and Discussion*

Table 4 provides a summary of the ASTM Regulatory Database Sites recorded within the proposed ROW for each of the nine reasonable alternatives within the study area. The table also provides a summary of regulated sites located within the proposed ROWs that are evaluated as moderate or high risk sites. The table also summarizes the EDR Proprietary Data which includes the number of former gas stations and dry cleaner sites located within the proposed ROW for each of the reasonable alternatives.

Table 4: Summary of Number of ASTM Regulatory Database Sites within the Proposed ROW of the Reasonable Alternatives

| | ASTM Regulatory Database Sites (Number of regulated sites/records within proposed ROW) | ASTM Regulatory Database Sites (Number of regulated sites within proposed ROW evaluated as either Moderate or High Risk Sites) | EDR Proprietary Data Sites (Number of former gas station and dry cleaning facilities within proposed ROW) |
|---|---|---|---|
| SEGMENT 1 | | | |
| Alternative 4 | 49 Sites/88 Records | 34 | 51 Sites – 46 former gas |

| | ASTM Regulatory Database Sites (Number of regulated sites/records within proposed ROW) | ASTM Regulatory Database Sites (Number of regulated sites within proposed ROW evaluated as either Moderate or High Risk Sites) | EDR Proprietary Data Sites (Number of former gas station and dry cleaning facilities within proposed ROW) |
|---|---|---|---|
| | | | stations and 5 former dry cleaners. |
| Alternative 5 | 58 Sites/102 Records | 44 | 31 Sites – 26 former gas stations and 5 former dry cleaners. |
| Alternative 7 | 78 Sites/135 Records | 56 | 52 Sites – 48 former gas stations and 4 former dry cleaners. |
| **SEGMENT 2** | | | |
| Alternative 10 | 1 Site/4 Records | 1 | 3 Sites – 3 former gas stations. |
| Alternative 11 | 1 Site/4 Records | 1 | 3 Sites – 3 former gas stations. |
| Alternative 12 | 1 Site/4 Records | 1 | 3 Sites – 3 former gas stations. |
| **SEGMENT 3** | | | |
| Alternative 10 | 6 Sites/9 Records | 5 | 4 Sites – 2 former gas stations and 2 former dry cleaners. |
| Alternative 11 | 16 Sites/25 Records | 11 | 21 Sites – 13 former gas stations and 8 former dry cleaners. |
| Alternative 12 | 11 Sites/18 Records | 7 | 20 Sites – 10 former gas stations and 10 former dry cleaners. |

**Summary of Findings**

*Segment 1:*

A total of 88 records associated with 49 regulated sites were documented within or adjacent to the proposed ROW of Alternative 4. Thirty-four of the 49 regulated sites were evaluated with either a moderate or a high estimated level of environmental risk. In addition, review of the EDR Proprietary Data documents 46 former gas stations and 5 former dry cleaner facilities (51 total sites) located within the proposed ROW of Alternative 4.

A total of 102 records associated with 58 regulated sites were documented within or adjacent to the proposed ROW of Alternative 5. Forty-four of the 58 regulated sites were evaluated with either a moderate or a high estimated level of environmental risk. In addition, review of the EDR Proprietary Data documents 26 former gas stations and 5 former dry cleaner facilities (31 total sites) located within the proposed ROW of Alternative 5.

A total of 135 records associated with 78 regulated sites were documented within or adjacent to the proposed ROW of Alternative 7. Fifty-six of the 78 regulated sites were evaluated with either a moderate or a high estimated level of environmental risk. In addition, review of the EDR Proprietary Data documents 48 former gas stations and 4 former dry cleaner facilities (52 total sites) located within the proposed ROW of Alternative 7.

*Segment 2:*
A total of 4 records associated with one regulated site were documented within or adjacent to the proposed ROW of Alternative 10. The regulated site was evaluated with a high estimated level of environmental risk. In addition, review of the EDR Proprietary Data documents three former gas stations located within the proposed ROW of Alternative 10.

Likewise, a total of 4 records associated with one regulated site were documented within or adjacent to the proposed ROW of Alternatives 11 and 12. The regulated site was evaluated with a high estimated level of environmental risk. In addition, review of the EDR Proprietary Data documents three former gas stations located within the proposed ROW of Alternative 11 and 12.

*Segment 3:*
A total of nine records associated with six regulated sites were documented within or adjacent to the proposed ROW of Alternative 10. Five of the six regulated sites were evaluated with either a moderate or a high estimated level of environmental risk. In addition, review of the EDR Proprietary Data documents two former gas stations and two former dry cleaner facilities (four total sites) located within the proposed ROW of Alternative 10.

A total of 25 records associated with 16 regulated sites were documented within or adjacent to the proposed ROW of Alternative 11. Eleven of the 16 regulated sites were evaluated with either a moderate or a high estimated level of environmental risk. In addition, review of the EDR Proprietary Data documents 13 former gas stations and 8 former dry cleaner facilities (21 total sites) located within the proposed ROW of Alternative 11.

A total of 18 records associated with 11 regulated sites were documented within or adjacent to the proposed ROW of Alternative 12. Seven of the 11 regulated sites were evaluated with either a moderate or a high estimated level of environmental risk. In addition, review of the EDR Proprietary Data documents 10 former gas stations and 10 former dry cleaner facilities (20 total sites) located within the proposed ROW of Alternative 12.

*Other Suspect Properties*
In addition to the ASTM Regulated Database Sites summarized above, two other suspect buildings or properties were noted within the proposed ROW that were not affiliated with or listed on the EDR database. The first suspect property, located within the proposed ROW of Alternatives 4 and 7 of Segment 1 at 10155 North Freeway, is currently operating as an oil lube facility. It is described as Site AA in Table 3 and in Exhibit 2. The other suspect property, located within the proposed ROW of Alternatives 5 and 7 of Segment 1 at 10206 North Freeway, is a tract of land improved with a one-story building (currently vacant) with three industrial grade overhead doors that was apparently an automotive repair facility in the past. It is described as Site BB located at 10206 North Freeway in Table 3 and Exhibit 2. The status of any former USTs located at these two sites, past releases, and other potential environmental concerns is unknown at this time.

**Oil/Gas Well and Pipeline Sites**

*Oil and Gas Wells*
The Railroad Commission of Texas (RRC) regulates and issues permits for drilling of oil and gas wells within the state of Texas. According to the RRC Geographic Information System, there are 41 permitted oil and/or gas wells within one mile of the centerline of the NHHIP project limits (Exhibit 2).

Two of the 41 permitted wells are plotted within the proposed ROWs, five of the 41 wells are plotted within 500 feet of the proposed ROWs, and the remaining 36 wells are plotted more than 500 feet from the existing and proposed ROWs. A summary of the oil and/or gas wells located within or adjacent to the proposed alternative ROW is provided in Table 5.

Table 5: Oil And Gas Wells Within or Adjacent to the Proposed ROW of Alternatives

| Map ID | Well Type | Well ID | API #/Lease Name | Within or Adjacent to Segment/Alternative |
|---|---|---|---|---|
| 9 | Gas Well | TXOG50000277964 | 201 | Segment 1, Alternative 4 (within proposed ROW) |
| 27 | Cancelled/Abandoned Location | TXOG50000276621 | 201 | Segment 1, Alternative 4 (within proposed ROW) |
| 7 | Dry Hole | TXOG50000278180 | 201 | Segment 1, Alternative 5 (within 500 feet to the east of the proposed ROW) |
| 8 | Permitted Location | TXOG50000277998 | 201 | Segment 1, Alternative 5 (within 500 feet to the east of the proposed ROW) |
| 12 | Permitted Location | TXOG50000277813 | 20103264 | Segment 1, Alternative 5 (within 500 feet to the east of the proposed ROW) |
| 17 | Dry Hole | TXOG50000277663 | 20182951/ Gillespie RM | Segment 1, Alternative 5 (within 500 feet to the east of the proposed ROW) |
| 20 | Gas Well | TXOG50000277549 | 20103262 | Segment 1, Alternative 5 (within 500 feet to the east of the proposed ROW) |

Source: RRC 2015

The gas well identified as Map ID No. 9 is identified as an active permitted gas well located in the proposed ROW of Segment 1, Alternative 4. No evidence of this gas well was observed within the proposed ROW during the field investigation conducted on April 20-21, 2015. The well identified as Map ID No. 27 is also mapped within the same proposed ROW, but is classified as a cancelled or abandoned location and is therefore not an environmental concern. A second active gas well, Map ID No. 20, is located within 500 feet to the east of Segment 1, Alternative 5. The remaining wells are not classified as active oil and/or gas wells, or were never advanced, or are categorized as dry holes. On the basis of this information, none of these wells are an environmental concern to the proposed project.

Active gas wells that are located within the footprint of the preferred build alternative would be required to be properly plugged and abandoned prior to construction. Requirements for the proper procedures in plugging these types of wells are provided in the Texas Administrative Code (TAC), Title 16, Part 1, Chapter 3, Section 3.14 under the jurisdiction of the Railroad Commission of Texas. Well plugging would need to be performed by cementing companies, service companies, or operators approved by the Railroad Commission of Texas. Arrangements with the responsible well operator for proper plugging according to applicable regulations would be addressed during the ROW acquisition and negotiation process. If not plugged prior to construction, the wells would be addressed per TxDOT Standard Specification Item 103, Disposal of Wells. If contamination were encountered at any

of the identified well or abandoned well sites, remediation would be conducted prior to construction. If a well were damaged during construction, the responsible party would be required to correct the damage and remediate any pollution resulting from the damage.

*Pipelines*

The RRC GIS maps show natural gas transmission lines and pipelines for non-HVL (high volatile liquid) products (liquid products that are not highly volatile in the project area as well as numerous liquid propane tank locations). There are approximately 19 petroleum pipelines that cross or are in the ROW of one or more of the proposed alternatives (Exhibit 2). Table 6 provides a listing of major pipelines, pipeline companies, and line diameter size within the project area. No documentation of releases or spills was noted during the review of available regulatory data. No evidence of past releases, spills, or stained soils were noted during the field investigation in the areas where the pipeline easements intersect the project limits or during the review of the available regulatory data.

Table 6: Pipelines Within the Proposed ROW of Alternatives

| Pipeline Name | Owner/Operator | Diameter (Inches) | Commodity Description |
|---|---|---|---|
| Katy to Baytown Main Line | Kinder Morgan Texas Pipeline LLC | 30 | Natural Gas |
| Seminole Loop | Enterprise Products Operating LLC | 14 | Natural Gas Liquids |
| South Texas – TX 150 | Enterprise Products Operating LLC | 12.75 | Natural Gas |
| TGPL Mustang | Kinder Morgan Texas Pipeline LLC | 30 | Natural Gas |
| TEPPCO South Texas Crude | Enterprise Products Operating LLC | 8.63 | Crude Oil |
| TEPPCO South Texas Crude | Enterprise Products Operating LLC | 8.63 | Crude Oil |
| Lake Creek Lateral | Copano Pipeline/UP Gulf Coast LP | 8.63 | Natural Gas |
| Mexia | BP Pipelines (North America), Inc. | 12.75 | Crude Oil |
| South Texas – TX 150 | Enterprise Products Operating LLC | 10.75 | Natural Gas |
| Durkee Field | Kinder Morgan Texas Pipeline LLC | 4.5 | Natural Gas |
| Fairbanks – Aldine Junction | BP Pipelines (North America), Inc. | 6.63 | Crude Oil |
| Netco Pipeline | Netco Pipeline, LLC | 14 | Natural Gas |
| BIPL Baytown-Irving RP | ExxonMobile Pipeline Company | 10.75 | Gasoline |
| Satsuma-Baytown LPG | ExxonMobile Pipeline Company | 8.63 | Liquified Pet. Gas |
| Magellan Pipeline | Magellan Pipeline Company, LP | 20 | Gasoline/Jet Fuel/Diesel |
| Katy Field Main Line | Kinder Morgan Texas Pipeline LLC | 16 | Natural Gas |
| TEPPCO South Texas Crude | Enterprise Crude Pipeline LLC | 12.75 | Crude Oil |
| Line No. 7 (I-10) | Centerpoint Energy Intra Pipeline, LLC | 8.63 | Natural Gas |
| Line No. 7 (US 59) | Centerpoint Energy Intra Pipeline, LLC | 8.63 | Natural Gas |

Source: RRC 2015

The petroleum pipelines do not appear to have a negative impact within the project area and impacts related to buried petroleum pipelines would be expected to be negligible. Exact locations

and depths of the pipelines would need to be determined. During ROW negotiation, determinations would be required to make necessary adjustments and/or relocations of these pipelines. Location and depth of pipelines that would remain in place would need to be marked on the ground (in the field) prior to construction activities in order to prevent the accidental damage rupture to the pipelines. If proper precautions are taken, impacts related to petroleum lines within the project area should be minimal.

**Other Sites of Concern**

*Asbestos and Lead-Based Paint*

The proposed project would include the widening and/or removal of bridge structures with steel structures, construction of retaining walls, and the relocation and/or removal of existing building structures in the ROW. Suspect asbestos-containing materials and lead-based paint may be encountered during this process. Prior to project letting, structures to be demolished would be analyzed for the presence or absence of lead-based paint. Asbestos and lead-based paint issues would be addressed during the ROW process prior to construction. If suspect asbestos material is encountered, a mitigation plan for the removal and disposal of materials containing hazardous materials would need to be developed according to federal, state, and local regulations. Asbestos and lead-based paint inspections, specifications, notification, license, accreditation, abatement, and disposal, as applicable, would be in compliance with federal, state, and local regulations. If lead-based paint is detected, contingencies would be developed to address worker safety, material recycling, and proper management of any paint-related wastes, as necessary.

## *Construction*

The proposed project would include the construction of drilled shafts and retaining walls within all three segments. Excavation in these areas may increase the potential of encountering hazardous material contamination during construction. Additional subsurface environmental investigation services would be required to determine whether possible contamination might be encountered during construction. If hazardous constituents were confirmed, then appropriate soils and/or groundwater management plans for activities within these areas would be developed.

## *Conclusion*

The No Build Alternative would not result in hazardous materials impacts associated with the construction or operation of the proposed project. The No Build Alternative would provide no immediate changes within the project study area as the outlying communities continue to expand along with the need for available land for development and transportation. Existing land use would change over time and transportation and area development would change in response. Residential, commercial, and industrial growth or redevelopment would also continue within the study area, except were development is prohibited or regulated.

For any of the nine alternatives, impacts associated with hazardous materials would most likely occur during construction and would be related to activities on or near existing hazardous material sites. The hazardous material sites either have already impacted and/or have the potential to impact the existing environment. The regulated sites also create the potential of contaminating sites adjacent to them, posing a risk for the acquisition of those properties. ROW acquisition would be required for the preferred alternative. However, risks can be minimized by conducting ESAs

according to the ASTM standards to identify, avoid, and mitigate hazardous materials sites. Further investigation of potential hazardous materials sites, including Phase I and Phase II ESAs, if necessary, would be completed before project development and prior to ROW acquisition. Coordination with federal and state regulatory agencies for hazardous materials contamination would be handled in accordance with applicable regulations per TxDOT Standard Specifications.

# APPENDIX A

# HAZARDOUS MATERIALS INITIAL SITE ASSESSMENT (ISA) REPORT

# Hazardous Materials Initial Site Assessment (ISA) Report

Completion of the ISA complies with the Federal Highway Administration's (FHWA's) policy dealing with hazardous materials discussed in FHWA's *Supplemental Hazardous Waste Guidance* (January 16, 1997) located at http://www.environment.fhwa.dot.gov/guidebook/vol1/doc7b.pdf.

This FHWA policy emphasizes three objectives: 1) the need to identify and assess potentially contaminated sites early in project development, 2) to coordinate early with federal/ state/ local agencies to assess the contamination and the cleanup needed; and 3) to determine and implement measures early to avoid or minimize involvement with substantially contaminated properties.

In addition, completion of the ISA will reduce construction delays that result from unexpected hazardous material discoveries and reduce the department's liability associated with the purchase of contaminated right of way.

Maintain a copy of the completed ISA report with all applicable attachments in the project administrative record.

For additional information, refer to TxDOT's online manual: *Hazardous Materials in Project Development:* http://onlinemanuals.txdot.gov/txdotmanuals/haz/index.htm

**Abbreviations and Acronyms**

| | |

# TxDOT Hazardous Materials Initial Site Assessment (ISA) Report

| Project Information | | | |
|---|---|---|---|
| CSJ No:0912-00-146 | City:Houston | Zip Code:Multiple | County:Harris |
| HWY:I-45 (NHHIP) | Limits:I-45 from Beltway 8 North to I-10, plus realignment of sections of I-45, I-10, and US 59 in the downtown Houston area. | | |

| **Section 1: Identify Previously Completed Environmental Site Assessments, Known Hazmat Conditions, Preliminary Project Design and Right-of-Way Requirements** | |
|---|---|
| **Yes/No** | **Obtain information/comments from design, right of way, and/or environmental staff. Attach maps and/or details as appropriate.** |
| ☐ Yes<br>☒ No | Has a Phase I Environmental Site Assessment (ESA) been prepared for this project? If one or more Phase I ESAs have been prepared for this project, please use applicable information from the Phase I ESA(s) to help complete the ISA. |
| ☐ Yes<br>☐ No<br>☒ Unknown | Are there any previous environmental assessments, testing or studies performed within the proposed project area related to contamination issues? If yes, explain here if there are any concerns to the proposed project:Review of the environmental regulatory database identified more than 1,000 federal and state-listed facilities sites within the project limits search criteria, as defined by ASTM E1527-13. The sites were further evaluated for their potential to adversely impact the project based on their proximity and type of contamination. On the basis of this information, the sites were assigned a ranking of low, moderate and high potential environmental risk and many of the sites in the project area have been identified as moderate and high risk sites (See Figure 2 in Hazardous Materials Technical Report). |
| ☐ Yes<br>☒ No | Are preliminary plans detailed enough to show excavation, ROW features, pipelines, utilities and storm sewer details? If no, explain here what information is limited or unavailable: Preliminary plans are under development and this item will be addressed as information becomes available. |

| **Section 2: Demolition and Renovation Information** | |
|---|---|
| ☒Yes<br>☐No | Are there proposed bridge or building demolition or renovation operations for this project? |
| If yes, describe the bridge or building locations, anticipated demolitions and/or renovations here:Proposed bridge or building demolition or renovation operations would occur at multiple locations that will be further refined as project planning and design continues. The EPA's National Emission Standards for Hazardous Air Pollutants and Occupational Safety and Health Administration (OSHA) regulations require that asbestos be properly handled during renovation or demolition. Asbestos inspections, notifications, abatement and disposal, as applicable, would be in compliance with federal, state, and local regulations. Asbestos and lead-in-paint issues would be addressed prior to construction. | |
| If yes, record asbestos and/or lead-in-paint concerns or testing needs on an IIR form in ECOS. Detailed instructions for completing an ECOS IIR Form are located in the Non-Project Documentation section of ECOS under the heading Hazmat. Contact the ECOS help desk for assistance preparing the IIR Form, if necessary. | |
| **Note:** ACM inspections are required for all bridge and building renovation and demolition projects. Refer to the guidance found at TxDOT's *Environmental Compliance Toolkit* web page for additional information.<br><br>**Note:** Contact ENV-HMM staff for assistance with lead-in-paint issues. | |

| **Section 3: Identify Project Activities** |
|---|

| 3.1 Yes/No | **Using the preliminary design and ROW information for this project, determine if the project includes any of the activities listed below.** |
|---|---|
| ☒ Yes<br>☐ No | **Project Excavations:** Will the work consist of substantial excavation operations. Substantial excavation includes, but is not necessarily limited to:<br>• Underpass construction,<br>• Storm sewer installations,<br>• Trenching or tunneling that would require temporary or permanent shoring. |
| ☒ Yes<br>☐ No | **Dewatering:** Are there proposed de-watering operations. If yes, what is the estimated depth to groundwater? Mainlanes to be depressed roadway design in certain areas of Segments 2 and 3. Depth to groundwater estimated to be less than 15-20 feet below ground surface depending on location. |
| ☒ Yes<br>☐ No | **Utility Adjustments:** Are there proposed pipeline and underground utility installation or adjustments? |
| ☒ Yes<br>☐ No | **Encroachments:** Are there known or potential encroachments into the project area? Encroachments include soil and groundwater contamination, dump sites, tanks, and other issues in the ROW. |
| ☒ Yes<br>☐ No | **ROW and Easements:** Are there any acquisitions of new ROW, easements, temporary construction easements planned for the project? |

**3.2 Complete the appropriate box below:**

☒ If Section 3.1 contains any "Yes" answers, please proceed to Section 4.

☐ If Section 3.1 contains all "No" answers, proceed to Section 6, Site Survey. Please perform a site survey documenting the results in Section 6 and then mark the appropriate box below. If a Phase I ESA has been prepared for this project, you may use the applicable site survey information from the Phase I ESA.

☐ The site survey did not identify evidence of any environmental concerns listed in Section 6. The ISA is complete. Complete section 10 and maintain a copy of the ISA and all applicable attachments in the administrative record.

☐ The site survey identified evidence of environmental concerns listed in Section 6. Continue with Section 4.

| **Section 4: Current and Past Land Use Information** | | | |
|---|---|---|---|
| **Reviewed?** | **Review and assess current and past land use (up to 50 years) in the project area. Document and attach sources that were reviewed.** If one or more Phase I ESAs were prepared for this project, please use applicable information from the Phase I ESAs to help complete this section of the ISA. | | |
| ☒Yes<br>☐ No<br>☐ Not Available<br>☐ Not Applicable | **4.1 Review Current and if possible Past USGS 7.5 Minute Topographic Maps of the project area:** Look for oil & gas pipelines, tanks, landfills or other industrial features.<br>Describe any concerns:Several oil & gas pipelines transect the project limits. Multiple tanks located in the proposed ROW of alternatives. See Hazardous Materials Technical Report for Summary Table of Regulated Hazardous Material Sites (Table 3). | | |
| | List Topo Maps Reviewed: | Dates: | Comments: |

| Section 4: Current and Past Land Use Information | | | |
|---|---|---|---|
| **Reviewed?** | **Review and assess current and past land use (up to 50 years) in the project area. Document and attach sources that were reviewed.** If one or more Phase I ESAs were prepared for this project, please use applicable information from the Phase I ESAs to help complete this section of the ISA. | | |

| ☐ Yes<br>☐ No<br>☒ Not Available<br>☐ Not Applicable | **4.6 Review TxDOT Geotechnical Soil Boring Logs:**<br>Any concerns noted on the boring logs such as unusual odors, visible contamination, trash, waste or debris?<br>If yes explain: | | |

| Section 4: Current and Past Land Use Information | |
|---|---|
| **Reviewed?** | **Review and assess current and past land use (up to 50 years) in the project area. Document and attach sources that were reviewed.** If one or more Phase I ESAs were prepared for this project, please use applicable information from the Phase I ESAs to help complete this section of the ISA. |
| ☐ Yes<br>☐ No<br>☒ Not Available<br>☐ Not Applicable | **4.7 Review TxDOT Temporary Use ROW Agreements (permits issued by the district to entities to occupy a portion of the ROW):**<br>Any concerns such as monitor wells or treatment systems within the ROW?<br>If yes, explain: |
| ☐ Yes<br>☐ No<br>☒ Not Available<br>☐ Not Applicable | **4.8 Review Notifications of Contamination to TxDOT** (These are typically letters from TCEQ or third parties explaining the presence of contamination on TxDOT ROW):<br>Any concerns regarding contamination of ROW from off-site sources?<br>If yes, explain: |

**Section 5: Complete a Regulatory Records Review (Database Search)**

**Note:** The purpose of the database search is to obtain and review standard sources of environmental information from government agency records that will help identify potential hazardous material issues within the project limits and surrounding properties. A list of standard databases of environmental information from government agency records is included in Section 5.1.

To enhance and supplement the standard sources of environmental information, other information such as local records and/or additional state records should be reviewed when, in the judgment of the environmental professional, such additional records are (1) reasonably ascertainable, and (2) are sufficiently useful, accurate, and complete in light of the objective of the regulatory records review.

Standard database source information or other record information from government agencies may be obtained directly from appropriate government agencies or from commercial services.

If one or more Phase I ESAs were prepared for this project, please use applicable information from the Phase I ESAs to help complete this section of the ISA.

**Mark the appropriate box below:**

☒ A Database search was conducted through a contracted service. Indicate in Section 5.1, and if applicable, Section 5.2, the regulatory records searched and make any comments if potential environmental concerns are identified. A complete copy of the database search findings (contractor's report deliverable) should be maintained in the project administrative record with the ISA.

☐ A Database search was conducted in-house. Include in Section 5.1 the regulatory records searched and make any comments if potential environmental concerns are identified. For in-house database searches, not all databases need to be reviewed for each project, but at a minimum the databases listed in Section 5.1 marked in bold with a star must be reviewed. Include database records that list potential issues in the project administrative record with the ISA. It is not necessary to include records of negative findings in the project administrative record.

**Section 5.1 Standard Database Sources of Environmental Information from Government Agency Records**

| Regulatory Record | Reviewed | Recommended Minimum Search Distance from Project Limits | Comment Field: Provide any comments related to potential issues discovered within the database. |

| | ☐ Yes<br>☐ No |
| | |

**Section 6: Complete a Project Site Survey**

**Note:** Document site survey and findings. Describe location, size of concern. Attach site maps and photographs as appropriate. If a Phase I ESA has been prepared for this project, you may use the applicable site survey information from the Phase I ESA.

**Site Survey Date(s):April 20 & 21, 2015**

**6.1 Current Land Use Type:**

☒ Undeveloped to light commercial (agricultural, residential, offices, retail, light commercial).

☒ Developed/commercial (automotive repair, gas stations, manufacturing, dry cleaners, military base, waste collection and handling facilities, other industrial sites).

Describe: See Summary Table 3 provided in the Hazardous Materials Technical Report.

| Evidence? (Yes/No) | 6.2 Specific Concerns Identified (as necessary provide a description for each "Yes" checked). |
|---|---|
| ☒Yes ☐No | • underground storage tanks. See Summary Table 3 |
| ☐Yes ☒No | • vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground. Not noted; subsequent field visit is recommended once preferred alternative is selected. |
| ☒Yes ☐No | • aboveground storage tanks. See Summary Table 3 |
| ☐Yes ☒No | • electrical and transformer equipment storage or evidence of release. Not noted; subsequent field visit is recommended once preferred alternative is selected. |
| ☐Yes ☒No | • injection wells, cisterns, sumps, dry wells. Not noted; subsequent field visit is recommended once preferred alternative is selected. |
| ☒Yes ☐No | • groundwater monitoring wells and/or groundwater treatment systems. Several former gas station facilities, now vacant, were observed within the proposed ROWs. |
| ☐Yes ☒No | • flooring, drains, or walls stained by substances other than water or emitting foul odors. Not noted; subsequent field visit is recommended once preferred alternative is selected. |
| ☐Yes ☒No | • vats, 55-gallon drums (labeled/unlabeled), canisters, barrels, bottles, etc. Not noted; subsequent field visit is recommended once preferred alternative is selected. |
| ☐Yes ☒No | • stockpiling, storage of material. Not noted; subsequent field visit is recommended once preferred alternative is selected. |
| ☐Yes ☒No | • evidence of liquid spills. Not noted; subsequent field visit is recommended once preferred alternative is selected. |
| ☒Yes ☐No | • surface dumping of trash, garbage, refuse, rubbish, debris half exposed/buried, etc. Miscellaneous dumping of trash noted on some parcels located within the proposed ROW but not considered a significant environmental concern or recognized environmental condition. |
| ☐Yes ☒No | • damaged or discarded automotive or industrial batteries. Not noted; subsequent field visit is recommended once preferred alternative is selected. |
| ☐Yes ☒No | • stained, discolored, barren, exposed or foreign (fill) soil. Not noted; subsequent field visit is |

| | |
|---|---|
| | recommended once preferred alternative is selected. |
| ☐Yes ☒No | • dead, damaged or stressed vegetation. Not noted; subsequent field visit is recommended once preferred alternative is selected. |
| ☐Yes ☒No | • oil sheen or films on surface water, seeps, lagoons, ponds, or drainage basins. Not noted; subsequent field visit is recommended once preferred alternative is selected. |
| ☐Yes ☒No | • pits, ponds, or lagoons associated with waste treatment or waste disposal. Not noted; subsequent field visit is recommended once preferred alternative is selected. |
| ☐Yes ☒No | • changes in drainage patterns from possible fill areas. Not noted; subsequent field visit is recommended once preferred alternative is selected. |
| ☒Yes ☐No | • security fencing, protected areas, placards, warning signs. Exxon Mobil North Houston Terminal located at 8700 North Freeway. |
| ☐Yes ☒No | • dead animals (fish, birds, etc.) possibly due to contamination. Not noted; subsequent field visit is recommended once preferred alternative is selected. |
| ☒Yes ☐No | • other concerns. See attached descriptions of regulated hazardous materials sites within the reasonable alternatives proposed ROW – See Summary Table 3 of the Hazardous Materials Technical Report. |
| **6.3 Describe adjoining properties and any visible hazardous material concerns.** List adjacent businesses, factories, abandoned sites, etc. that may be the source of hazardous materials concerns. See Hazardous Materials Technical Report for discussion of adjoin properties and visible hazardous materials concerns. | |
| **6.4 Describe Concerns Observed in the Site Survey.** Indicate whether the concern is associated with existing ROW, proposed ROW acquisition or easements. As necessary, provide additional information about the evidence identified; include photographs as an attachment to the ISA. See Hazardous Materials Technical Report for discussion of adjacent properties and visible hazardous material concerns. | |

| **Section 7: Interviews** | | |
|---|---|---|
| **Section 7.1 Were interviews conducted? ☐Yes ☒No**<br>Possible interviewees include: local residents, TxDOT staff, fire department personnel, city or county department of health/environmental staff; city or county planning staff; TCEQ staff; TRC staff; current and former property owners or operators.<br><br>If one or more Phase I ESAs were prepared for this project, please use applicable interview information from the Phase I ESAs to help complete this section of the ISA. | | |
| **Section 7.2 Interview Summary:** Complete this section if interviews were conducted. Add additional rows as needed. Attach record of communications to the ISA. | | |
| Name: | Title: | Date: |
| Describe any potential concerns: | | |
| Name: | Title: | Date: |
| Describe any potential concerns: | | |
| Name: | Title: | Date: |
| Describe any potential concerns: | | |

| **Section 8: Identified Hazardous Material Concerns** |
|---|

On the list below, indicate Yes or No whether the hazardous material concern was identified. If Yes, record the hazardous material concern on an Issues Identification and Resolution (IIR) Form in ECOS. If the ISA preparer is unsure how to complete the IIR Form, the responsibility to complete the Hazmat IIR may be assigned within ECOS to ENV Hazmat Staff. *Detailed instructions for completing an ECOS IIR Form are located in the Non-Project Documentation section of ECOS under the heading Hazmat. Contact the ECOS help desk for assistance preparing the IIR Form if necessary.*

Hazardous materials concerns identified below will require additional assessment work. In most cases, resolution to the concerns should be completed prior to project letting.

For additional information regarding scheduling considerations, internal/external coordination and recommended practices for resolving hazmat issues please refer to TxDOT's *Environmental Tool Kit* web site.

Contact ENV Pollution Prevention and Abatement (PPA) for additional assistance.

| **8.1 Identify the Hazardous Material Concerns** | | |
|---|---|---|
| **Concern Identified?** | **Type of Concern**<br>Record the hazardous material concerns on an Issues Identification and Resolution (IIR) Form in ECOS. | |
| ☒**Yes** ☐**No** ☐**NA** | **Current or Past Land Use Concern:** This concern is associated with hazardous material issues identified in Section 4. Note: *On the ECOS IIR, the Available Contaminated Media would be "Other".* | |
| | ☒Yes ☐No | One or more concerns identified in Section 4. |
| | ☐Yes ☐No | No obvious concerns were identified but additional research is needed as a result of unique or unusual current or past land use. Request additional assistance from ENV. |
| ☒**Yes** ☐**No** | **Site Visit Concerns:** This is associated with any hazardous material issues discovered following the completion of Section 6. On the *ECOS* IIR, the Available Contaminated Media would be "Other". | |
| | ☒Yes ☐No | One or more concerns identified. |
| | ☐Yes ☐No | No listed concerns identified but additional research is needed as a result of unique or unusual project site conditions. Request assistance from ENV. |
| ☐**Yes** ☐**No** ☒**NA** | **Interview Concerns:** This concern is associated with any hazardous material issues discovered during an interview listed in Section 7. In the IIR, the Available Contaminated Media would be "Other". | |
| | ☐Yes ☐No | One or more concerns identified after completing interviews. |
| | ☐Yes ☐No | No listed concerns identified but additional research is needed as a result of unique or unusual project site conditions. Request assistance from ENV. |
| ☒**Yes** ☐**No** | **Asbestos and/or Lead in Paint Concerns:** The following are related to ACM and LBP identified in Section 2. Select below all that apply. | |
| | ☒Yes ☐No | Bridge Demolition/ Renovation without Steel Structures |
| | ☒Yes ☐No | Bridge Demolition/ Renovation with Steel Structures |
| | ☒Yes ☐No | ROW Structure(s) Demolition |
| | ☒Yes ☐No | Enhancement Project Demolition/Renovation |
| | ☒Yes ☐No | Other- Describe: Anticipated demolition/renovation for the proposed project to be prepared/edited as plans become available. |
| ☐**Yes** ☐**No** | **Petroleum Storage Tank Concerns:** PSTs can be any underground or aboveground storage tanks that are used to store petroleum based fluids. Typically, these are gasoline and diesel refueling facilities. Select below all that apply. | |
| | ☒Yes ☐No | ROW acquisition or partial acquisition of a parcel with one or more PSTs. |
| | ☐Yes ☐No | Other- Describe: |

|---|---|---|
| **Concern Identified?** | **Type of Concern**<br>Record the hazardous material concerns on an Issues Identification and Resolution (IIR) Form in ECOS. | |
| ☒**Yes** ☐**No** | **Leaking Petroleum Storage Tank (LPST) Concerns:** An LPST parcel will only need to be identified once in the following list. LPST sites are PSTs that have caused or suspected to have caused a release to the environment. | |
| | ☒Yes ☐No | Additional Research is needed or uncertain of impacts from an LPST. Request assistance from ENV. |
| | ☒Yes ☐No | Acquisition of a Parcel with an LPST. |
| | ☒Yes ☐No | An LPST is located within 0.25 miles of the project. |
| | ☐Yes ☒No | Other- Describe: |

| | | |
|---|---|---|
| ☒**Yes** ☐**No** | **Oil and Gas Production Activity Concerns**: TxDOT is concerned with the acquisition of oil and gas production wells (and ancillary equipment). Typically, these are oil/gas wells, piping, ancillary production equipment, pipelines, etc. Select below all that apply. | |
| | ☐Yes ☒No | Additional Research needed or uncertain of impacts. Request assistance from ENV. |
| | ☐Yes ☒No | Database search identified TRC VCP Site within 0.5 miles of project. |
| | ☐Yes ☒No | Oil/ Gas Wells within future ROW. |
| | ☒Yes ☐No | Pipelines requiring adjustment. |
| | ☐Yes ☒No | Other- Describe: |
| ☒**Yes** ☐**No** | **Non-LPST Source Contamination Concerns**: These parcels or locations have a potential for soil and/or groundwater contamination. Typically, they are contaminated locations (even potentially contaminated locations) that are not associated with LPST sites. Select below all that apply. | |
| | ☐Yes ☒No | Additional Research is needed or uncertain of impacts from a Non-LPST site. Request assistance from ENV. |
| | ☐Yes ☒No | Database search identified a CERCLA NPL(s) site within 1 mile of project. |
| | ☒Yes ☐No | Database search identified CERCLA (to include NFRAP) within 0.5 miles of project. |
| | ☒Yes ☐No | Database search identified RCRA Corrective Action(s) site within 1 mile of project. |
| | ☐Yes ☒No | Database search identified RCRA TSD Facilities within 0.5 miles of project. |
| | ☒Yes ☐No | Database search identified TCEQ IHW Corrective Action Sites within 1 mile. |
| | ☐Yes ☒No | Database search identified TCEQ Superfund Sites within 1 mile of project. |
| | ☒Yes ☐No | Database search identified TCEQ VCP Sites within 0.5 miles of project. |
| | ☒Yes ☐No | Database search identified TCEQ IOP Sites within 0.5 miles of project. |
| | ☒Yes ☐No | Other- Describe: Former Gas Station and Dry Cleaners in Proposed Rights of Way. |
| ☒**Yes** ☐**No** | **Landfills/ Waste Pits/ Dump Site Concerns:** This is associated with any known or unknown (based on visual observations) landfills, dump sites, or waste pits. Typically, the local Council of Governments (COG) should maintain a list of all closed and open landfills in your project area. Select below all that apply. | |
| | ☐Yes ☒No | Additional research is needed or uncertain of impacts. Request assistance from ENV. |
| | ☒Yes ☐No | Database search identified active/closed/abandoned MSW landfill sites within .5 miles of the project. |
| | ☐Yes ☒No | Other- Describe: |

**8.2 Did the ISA identify any potential Hazardous material concerns?**

☐ No hazardous materials concerns were identified as a result of the ISA performed for the proposed action. No further hazardous materials action is required. The ISA is complete for this project. Any unanticipated hazardous materials impacts encountered during the project construction phase will be addressed in accordance with regulatory requirements. No further assessment is required. Complete Sections 9 and 10 and maintain a copy of the ISA and all applicable attachments in the project administrative record.

☒ Yes, the ISA identified one or more hazardous materials concerns for this project. An IIR form has been completed in ECOS. Complete Sections 9 and 10 and maintain a copy of the ISA and all applicable attachments in the project administrative record.

| Section 9: Reference Materials Utilized (Identify any referenced materials attached to this ISA) | | | |

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

**FEDERAL RECORDS**

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there are 4 CERCLIS sites within the searched area.

# EXECUTIVE SUMMARY

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 10 CERC-NFRAP sites within the searched area.

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 3 RCRA-LQG sites within the searched area.

# EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 17 RCRA-SQG sites within the searched area.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 26 RCRA-CESQG sites within the searched area.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/11/2014 has revealed that there are 191 RCRA NonGen / NLR sites within the searched area.

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there are 17 HIST FTTS sites within the searched area.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, and dated 10/23/2013 has revealed that there are 12

US AIRS sites within the searched area.

TX IOP: Contains information on all sites that are in the IOP. An IOP is an innocent owner or operator whose property is contaminated as a result of a release or migration of contaminants from a source or sources not located on the property, and they did not cause or contribute to the source or sources of contamination.

A review of the TX IOP list, as provided by EDR, and dated 04/14/2014 has revealed that there are 7 TX IOP sites within the searched area.

# EXECUTIVE SUMMARY

TX UIC: Class V injection wells regulated by the TCEQ. Class V wells are used to inject non-hazardous fluids underground. Most Class V wells are used to dispose of wastes into or above underground sources of drinking water and can pose a threat to ground water quality, if not managed properly.

A review of the TX UIC list, as provided by EDR, and dated 05/07/2013 has revealed that there are 2 TX UIC sites within the searched area.

TX UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Texas Commission on Environmental Quality's Petroleum Storage Tank Database.

A review of the TX UST list, as provided by EDR, and dated 03/20/2014 has revealed that there are 410 TX UST sites within the searched area.

TX MSD: An MSD is an official state designation given to property within a municipality or its extraterritorial jurisdiction that certifies that designated groundwater at the property is not use as potable water, and is prohibited from future use as potatable water because that groundwater is contaminated in excess of the applicable potable-water protective concentration level.

A review of the TX MSD list, as provided by EDR, and dated 04/07/2014 has revealed that there are 6 TX MSD sites within the searched area.

# EXECUTIVE SUMMARY

TX GCC: Texas Water Code, Section 26.406 requires the annual report to describe the current status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The report is required to contain a description of each case of groundwater contamination documented during the previous calendar year. Also to be included, is a description of each case of contamination documented during previous periods for which voluntary clean up action was incomplete at the time the preceding report was issued. The report is also required to indicate the status of enforcement action for each listed case.

A review of the TX GCC list, as provided by EDR, and dated 12/31/2012 has revealed that there are 68 TX GCC sites within the searched area.

# EXECUTIVE SUMMARY

**EDR PROPRIETARY RECORDS**

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 4 EDR MGP sites within the searched area.

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 1568 EDR US Hist Auto Stat sites within the searched area.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 594 EDR US Hist Cleaners sites within the searched area.

# EXECUTIVE SUMMARY

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

**FEDERAL RECORDS**

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERC-NFRAP site within the searched area.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 2 RCRA-SQG sites within the searched area.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2014 has revealed that there are 8 RCRA NonGen / NLR sites within the searched area.

GCC: Texas Water Code, Section 26.406 requires the annual report to describe the current status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The report is required to contain a description of each case of groundwater contamination documented during the previous calendar year. Also to be included, is a description of each case of contamination documented during previous periods for which voluntary clean up action was incomplete at the time the preceding report was issued. The report is also required to indicate the status of enforcement action for each listed case.

A review of the GCC list, as provided by EDR, and dated 12/31/2013 has revealed that there are 14 GCC sites within the searched area.

**EDR PROPRIETARY RECORDS**

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 45 EDR US Hist Auto Stat sites within the searched area.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 13 EDR US Hist Cleaners sites within the searched area.

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

# EXECUTIVE SUMMARY

**FEDERAL RECORDS**

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2014 has revealed that there is 1 RCRA-CESQG site within the searched area.

| Site | Address | Map ID | Page |
|---|---|---|---|
| ***CVS PHARMACY 7162*** | ***1003 RICHMOND AVE*** | ***38*** | ***296*** |

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2014 has revealed that there are 9 RCRA NonGen / NLR sites within the searched area.

# EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 08/16/2014 has revealed that there are 17 FINDS sites within the searched area.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, and dated 10/16/2014 has revealed that there is 1 US AIRS site within the searched area.

| Site | Address | Map ID | Page |
|---|---|---|---|
| ***DEUTSCHLAND AUTOWERKS*** | ***4901 MAIN ST*** | ***56*** | ***474*** |

**STATE AND LOCAL RECORDS**

IOP: Contains information on all sites that are in the IOP. An IOP is an innocent owner or operator whose property is contaminated as a result of a release or migration of contaminants from a source or sources not located on the property, and they did not cause or contribute to the source or sources of contamination.

A review of the IOP list, as provided by EDR, and dated 01/14/2015 has revealed that there is 1 IOP

site within the searched area.

| Site | Address | Map ID | Page |
|---|---|---|---|
| ***HARGEST COLLEGE*** | ***2800 MAIN ST*** | ***4*** | ***17*** |

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Texas Commission on Environmental Quality's permitted Solid Waste Facilities list.

A review of the SWF/LF list, as provided by EDR, and dated 01/29/2015 has revealed that there is 1 SWF/LF site within the searched area.

| Site | Address | Map ID | Page |
|---|---|---|---|
| DOTY SAND PIT VENTURE LANDFILL | 12000 BISSONNET ST | 96 | 672 |

CLI: Closed and abandoned landfills (permitted as well as unauthorized) across the state of Texas. For current information regarding any of the sites included in this database, contact the appropriate Council of Governments agency.

A review of the CLI list, as provided by EDR, and dated 08/30/1999 has revealed that there is 1 CLI site within the searched area.

| Site | Address | Map ID | Page |
|---|---|---|---|
| DOTY LANDFILL | 12000 BISSONET | 96 | 671 |

LPST: The Leaking Petroleum Storage Tank Incident Reports contain an inventory of reported leaking petroleum storage tank incidents. The data come from the Texas Commission on Environmental Quality's Leaking Petroleum Storage Tank Database.

A review of the LPST list, as provided by EDR, and dated 01/29/2015 has revealed that there are 61 LPST sites within the searched area.

GCC: Texas Water Code, Section 26.406 requires the annual report to describe the current status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The report is required to contain a description of each case of groundwater contamination documented during the previous calendar year. Also to be included, is a description of each case of contamination documented during previous periods for which voluntary clean up action was incomplete at the time the preceding report was issued. The report is also required to indicate the status of enforcement action for each listed case.

A review of the GCC list, as provided by EDR, and dated 12/31/2013 has revealed that there are 15 GCC sites within the searched area.

**EDR PROPRIETARY RECORDS**

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 175 EDR

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 126 EDR US Hist Cleaners sites within the searched area.

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

# EXECUTIVE SUMMARY

**FEDERAL RECORDS**

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERCLIS sites within the searched area.

|---|---|---|---|
| ***DAVIS ROAD DRUM SITE*** | ***1705 DAVIS ST.*** | ***11*** | ***63*** |
| MAY COOPERAGE, INC. | 1714 DAVIS ST. | 11 | 66 |

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERC-NFRAP sites within the searched area.

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 2

RCRA-LQG sites within the searched area.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2014 has revealed that there is 1 RCRA-SQG site within the searched area.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2014 has revealed that there are 2 RCRA NonGen / NLR sites within the searched area.

PRP: A listing of verified Potentially Responsible Parties

A review of the PRP list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 PRP site within the searched area.

| Site | Address | Map ID | Page |
|---|---|---|---|
| ***DAVIS ROAD DRUM SITE*** | ***1705 DAVIS ST.*** | ***11*** | ***63*** |

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, and dated 10/16/2014 has revealed that there is 1

US AIRS site within the searched area.

| Site | Address | Map ID | Page |
|---|---|---|---|

# EXECUTIVE SUMMARY

GCC: Texas Water Code, Section 26.406 requires the annual report to describe the current status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The report is required to contain a description of each case of groundwater contamination documented during the previous calendar year. Also to be included, is a description of each case of contamination documented during previous periods for which voluntary clean up action was incomplete at the time the preceding report was issued. The report is also required to indicate the status of enforcement action for each listed case.

A review of the GCC list, as provided by EDR, and dated 12/31/2013 has revealed that there are 11 GCC sites within the searched area.

**EDR PROPRIETARY RECORDS**

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 4 EDR MGP sites within the searched area.

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station,

service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 99 EDR US Hist Auto Stat sites within the searched area.

# EXECUTIVE SUMMARY

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 155 EDR US Hist Cleaners sites within the searched area.

RGA LF ---- Recovered Government Archive Solid Waste Facilities List

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

# EXECUTIVE SUMMARY

**FEDERAL RECORDS**

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 3 CERC-NFRAP sites within the searched area.

| Site | Address | Map ID | Page |
|---|---|---|---|
| MEKLO PROCESSING COMPANY | 1803 DALLAS | 2 | 13 |

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2014 has revealed that there is 1 RCRA-LQG site within the searched area.

| ***HARRISON JET GUNS*** | ***6915 HUDSON VILLAGE CRE*** | ***65*** | ***482*** |

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 2 RCRA-CESQG sites within the searched area.

# EXECUTIVE SUMMARY

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2014 has revealed that there are 13 RCRA NonGen / NLR sites within the searched area.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 08/16/2014 has revealed that there are 16 FINDS sites within the searched area.

GCC: Texas Water Code, Section 26.406 requires the annual report to describe the current status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The report is required to contain a description of each case of groundwater contamination documented during the previous calendar year. Also to be included, is a description of each case of contamination documented during previous periods for which voluntary clean up action was incomplete at the time the preceding report was issued. The report is also required to indicate the status of enforcement action for each listed case.

A review of the GCC list, as provided by EDR, and dated 12/31/2013 has revealed that there are 11 GCC sites within the searched area.

**EDR PROPRIETARY RECORDS**

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include

gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 155 EDR US Hist Auto Stat sites within the searched area.

# EXECUTIVE SUMMARY

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 104 EDR US Hist Cleaners sites within the searched area.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**FEDERAL RECORDS**

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/16/2014
Date Data Arrived at EDR: 01/08/2015

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/16/2014

Next Scheduled EDR Contact: 04/20/2015
Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994
Number of Days to Update: 56

Source: EPA
Telephone: 202-564-4267
Last EDR Contact: 08/15/2011
Next Scheduled EDR Contact: 11/28/2011
Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013
Date Data Arrived at EDR: 11/11/2013
Date Made Active in Reports: 02/13/2014
Number of Days to Update: 94

Source: EPA
Telephone: 703-412-9810
Last EDR Contact: 02/27/2015
Next Scheduled EDR Contact: 06/08/2015
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013
Date Data Arrived at EDR: 11/11/2013
Date Made Active in Reports: 02/13/2014

Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/18/2014
Date Data Arrived at EDR: 03/18/2014

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/09/2014

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2014
Date Data Arrived at EDR: 12/29/2014
Date Made Active in Reports: 01/29/2015

Telephone: 214-665-6444
Last EDR Contact: 12/29/2014
Next Scheduled EDR Contact: 04/13/2015
Data Release Frequency: Varies

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

US HIST CDL: National Clandestine Laboratory Register
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

**STATE AND LOCAL RECORDS**

SHWS: State Superfund Registry

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

GCC: Groundwater Contamination Cases

Texas Water Code, Section 26.406 requires the annual report to describe the current status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The report is required to contain a description of each case of groundwater contamination documented during the previous calendar year. Also to be included, is a description of each case of contamination documented during previous periods for which voluntary clean up action was incomplete at the time the preceding report was issued. The report is also required to indicate the status of enforcement action for each listed case.

**EDR PROPRIETARY RECORDS**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Data Release Frequency: No Update Planned

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

**OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Facility List
Source: Department of Protective & Regulatory Services
Telephone: 512-438-3269

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey
